

anti-oxidant eye contour gel

CHARACTERISTICS

An extremely effective treatment, the result of the synthesis between nature and biotechnology, specifically for treating the eye contour area, with a soft, light texture. It endows the skin with greater compactness and increases its elasticity, protecting the eye area from environmental damage. The appearance and firmness of the skin will improve thanks to the antioxidant power of vitamin C and vitamin E. The lavender immediately soothes sensitive skin while pomegranate has excellent antioxidant and elasticising properties. Chamomile promotes a calming and soothing action on the epidermis.

MAIN INGREDIENTS

Bio SuRice®, Vitamin C, Vitamin E, Lavender, Pomegranate, Chamomile.

INSTRUCTIONS FOR USE

In the evening and morning, apply a small amount to the eye contour area, tapping gently until fully absorbed.
