GROUP

# ABOUT US

**Aeris Group** is an **Italian holding** controlling companies operating for over thirty years in the mechanical plant engineering and building sector. Through coordination and strategic management, Aeris Group takes care of the investments within the group, proposing itself not only as a controlling holding, but also as a co-investor partner and investment manager, with a completely innovative vision.

Aeris Group is a **multi-brand** that actively operates in international contexts and in the different relevant sectors, with a volume of turnover that is constantly growing over time.

The logo for Aeris Group, featuring the word "Aeris" in a stylized, bold, white font with a blue outline, and the word "GROUP" in a smaller, plain white font below it. The logo is positioned in the bottom right corner of the image, which shows a modern glass-fronted building under a blue sky.

GROUP

# OUR LOCATION

Starting from January 2020 the **new Aeris head offices** have been expanded in space and with a completely new design. In the same period, a new logistics centre was also inaugurated with the purpose to optimize operational efficiency with the centralization of transport and warehouse activities. The choice of the Aeris hub **near Bergamo** is a signal and a confirmation for the economic development of the territory. Aeris wishes to continue the philosophy of company growth, in a proactive and innovative way, where technics, innovation, quality and service are among the key words that make the difference for the company.

It is a new page in the history of the Group that continues to grow to follow market changes, team growth, care for relationships with customers and suppliers to create valuable partnerships.

**New projects, new experiences, new horizons.**

The Aeris Group logo is positioned in the bottom right corner of the image. It features the word "Aeris" in a bold, white, sans-serif font, with the word "GROUP" in a smaller, white, sans-serif font directly beneath it. The logo is set against a background of a modern office interior with large windows and a tiled floor.

GROUP

# OUR TEAM

A team of 30 experts divided among asset management, marketing and sales, project management, purchase, quality control and service. A valuable organization, where each member of the team has the knowledge, the ability, the desire, and the opportunity to have personal success, which creates the growth of the company as well. The flexibility of managing the activity and the necessary resources allows to the Operating Companies of the group to present themselves as **EPC** Companies able to manage and grant the execution of works perfectly done in all phases:

- **Engineering**
- **Procurement**
- **Construction**

as well as all directly connected auxiliary services.

# MAZZINIICI - TEXTILE BRAND AERIS

**Mazziniici**, an historical Italian brand, deals with **solutions regarding filtration and air treatment for textile field**. Starting from suction, filtration, fibres and waste removal, up to humidification systems and air mixing, the plants must have, as a common denominator, the guarantee to achieve thermal and humidity conditions required by each production process with minimal power and water consumption.

# EDENYA – COOLING SYSTEMS & LOCALIZED HEATING

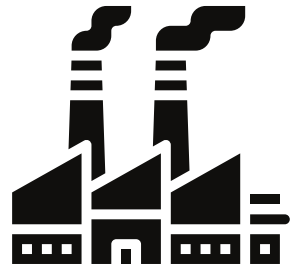

**Edenya** offers **direct infrared irradiation systems** for the localized heating in delimited areas and the **cooling** of all those areas that reach temperatures often intolerable for workers and machinery, but where a traditional air conditioning system is uneconomical.

Edenya cooling units are eco-friendly, easy, and quick to install, modular and able to cover localized areas from 200 m<sup>2</sup> surface up to complete industrial warehouses, perfectly integrated with any existing air extraction and filtration systems.

The best alternative to traditional air conditioning, easy, economical but highly performing. All Edenya solutions can be integrated with **Industry 4.0** guidelines and within the highest technological solutions actually available.

# SERVICES

**Our Services** start from feasibility studies up to energy efficiency, including installation, testing, training, maintenance, and spare parts. Together with each new installation, we provide a complete list of recommended spare parts and consumables necessary to keep the system always in optimal maintenance during its lifetime. It is possible to upgrade the service with a customized **SAMP contract**, which includes scheduled maintenance interventions, preventive analysis, and availability of our technicians. The remote-control service is free of charge and consists in scheduled checks of the system, the verification of the guaranteed conditions, the proper working of each equipment, the efficiency of the systems and running costs control; Aeris control systems are based on remote platforms equipped with an advanced interface and an open platform that makes the complete plant conform to **Industry 4.0** guidelines.

# CERTIFICATIONS

**Aeris Group Companies** are the only ones, in the reference market, who obtained the **ISO 9001:2015 Quality Certificate**. This important acknowledgment aims to ensure that the supplies of equipment and services completely satisfy the customer requirements, comply with the International Technical Regulations in force and continuously improve the process efficiency, for the benefit of all interested parties.
