Protect the baby

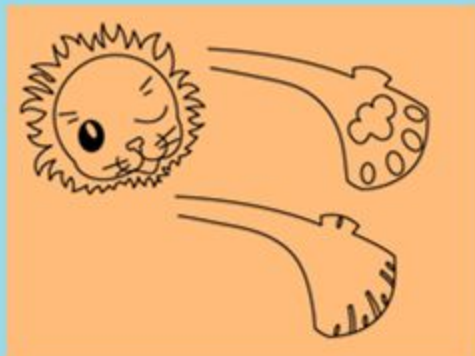

Animals Sunglasses

Babies loves animals

Animals loves babies

Animals sunglasses is the innovative brand created by eyes4you team in order to protect and loves babies by using all the knowledge in optics, in row materials, in components as lens and in high technology process, made in Italy.

Babies will love Animals sunglasses due to the innovative style "paws animals design"

Eyes4you

You can see differently

Eyes4you is an Italian start-up born to drive the realities that are willing to offer on the market ranges of glasses that represent their own values.

FR GGY

Eyes Protection

Easy Fit

Innovation

ISOFIX
LENS

No lenses
Ingestion risk

An innovative manufacturing process "fixes" the lenses into the frame.

Children are free to manipulate Froggy sunglasses without the risk of breaking it and without the risk to remove and put the lenses in his mouth

This result is obtained without the use of any glue.

We have created innovation tools, and in our factory we produce with high technology injection system with robot precision

WEAR & PLAY SAFETY

Froggy are made of soft, hypoallergenic and non-toxic materials

The structure of the hinges and the materials used make Froggy sunglasses foldable and unbreakable

The frame colours is obtained without any paint or varnish. The hinge are without screw or other metal parts

Froggy can protect your baby and your baby can "play" with it without any risk.

Froggy Pink Cat 4

EASY BABY FIT

The inner part of the nose is designed starting from the study of younger children nose's conformation

*Head Hug
System*

Innovation

*No need Cordon
Adaptive fitting*

**Flexibles
Hinges**

Multisizes & Easy Fit

The flexible hinge and the high technology material used allow the sunglasses temples to be opened at 360° and then came back immediately in the correct wearing position.

Thanks to this system

- You can easily wear the sunglasses to the baby by using only one hand!
- You can adapt Froggy for different dimension of babies face, different ages

The ends of the sunglasses are designed with an innovation shape: "Frog Paw"

This geometric structure is not only very nice, but most of all, it improves eyewear hold without any needs of annoying lanyard

A Animals Sunglasses

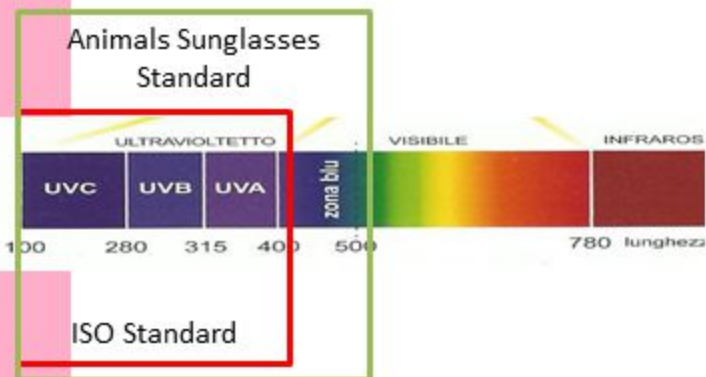

Froggy Blu Cat 4

EYES PROTECTION

For Froggy sunglasses we have chosen polycarbonate unbreakable lenses, UVA UVB and UVC filter with blu light filter to reduce glare.

You can find three models with category 4 lenses for a maximum protection and one model with polarized lenses in category 3 for a better vision of each real colors and to reduce any reflexes.

The lenses in production are cutted and mounted with the better performed CNC Robot in order to respect as best all the standards: Iso, US and Australian one.

PC lens - UV 400

Blue Light Protection

Excessive exposure to Ultraviolet Rays (up to 400nm) has been linked to a series of eye problems such as photokeratitis and macular degeneration (American Optometric Association; November, 1993).

Froggy Lenses filter 100% of ultraviolet rays according to ISO 12312-1 2013 and / 1: 2015

Blue light (380 to 500nm) is the part of visible light closest to UV rays. Blue light is visible light with higher energy (also called HEV - High Energy Visible). Medical-scientific studies claim that exposure to blue light can negatively affect the health of developing eyes.

Froggy Lenses filter between 95% (lenses in category 4) to 90% (lenses Polarized category 3) of blue light.

This leads a protective and restful effect for children's eyes
