

EUROPA- THE STORY- KI-PON SLIM

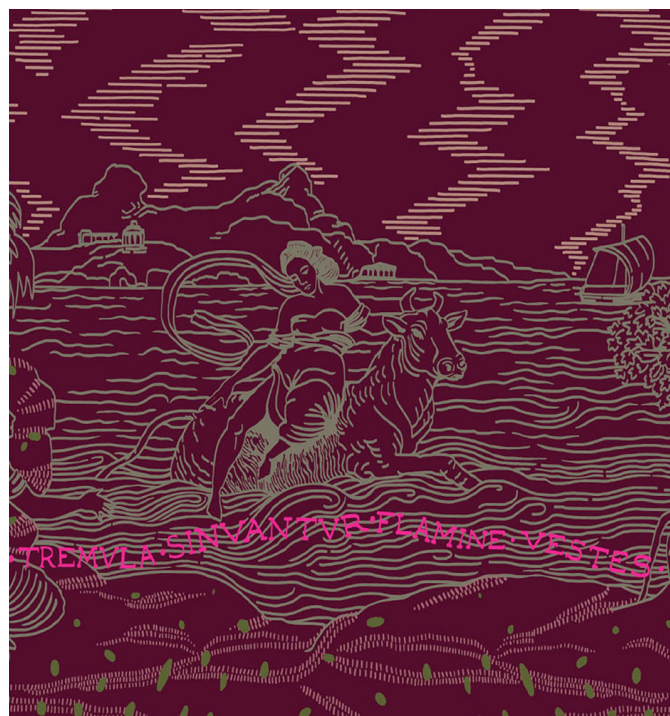

This is the story of the myth of Europe and Jupiter, one of the most beautiful of ancient times that tells us the origin of our civilization

Ovidio narrates in the "Metamorphoses" that Jupiter, falling in love with a beautiful girl named Europa, devised a plan to kidnap her. He went down to the beach, where the girl used to go with her companions and turned himself into a candid bull. Europa conquered by the beauty and meekness of the animal sat on its back. Immediately the bull got up and started running towards the sea. They flew away towards the island of Crete and once they arrived in Crete Jupiter revealed himself and from that moment made Europa queen of Crete. In memory of his transformation, Zeus created the constellation of Taurus.

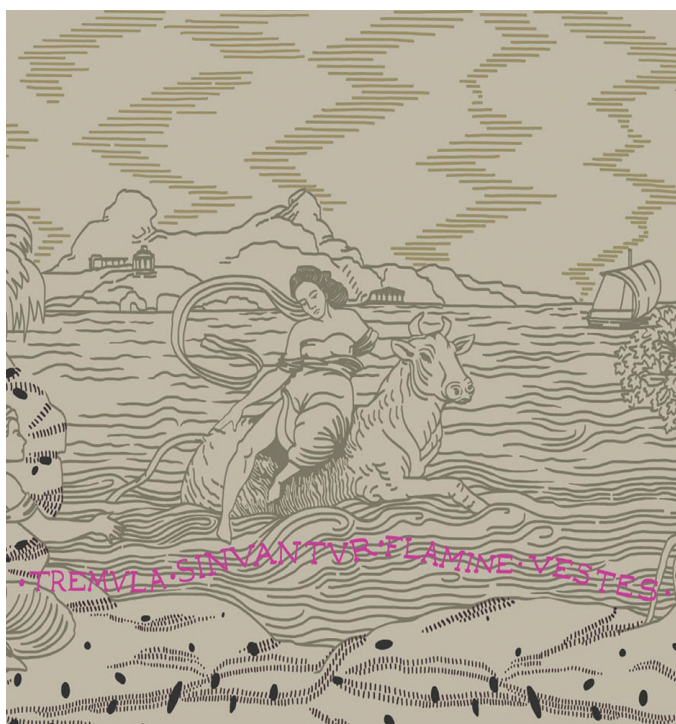

The design is available in four color variations.
