The muco-adhesive tablet for the treatment of **dry-mouth** (xerostomia) symptoms and complications

24 x 400mg
Blistered Tabs

90 x 400mg
Tabs in
plastic bottle

USE 3 tabs a day,
after meals and oral hygiene

MEDICAL DEVICE – CLASS I (EU)

Key ingredients: Dietary peptide and food grade excipients

Oral Care

Xerostomia is defined as dry mouth resulting from reduced or absent saliva flow and affects about 20% of the elderly population. It is an original hidden cause of gum disease and tooth loss in 3 out of every 10 adults, it is usually associated with a reduction in the oral pH and is often a contributing factor for both minor and serious health problems. Individuals with xerostomia often complain of problems with eating, speaking, swallowing and wearing dentures.

SALIFLUSS®

Simple, discreet and long-lasting xerostomia management^{1,2,3}

Safely and Effectively
increases saliva
production¹

Maintains
physiologic pH¹

Has rapid and
prolonged efficacy²

Simple & discreet^{1,2,3}

Food-grade
ingredients

MH-Innovabuffer™
technologie

MH-Flux+™
technologie

In clinical trials, on patients with xerostomia, SALIFLUSS shown to be effective in **increasing saliva** production, in **regulating** the produced **saliva's pH** that otherwise tends to be acid, and in improving dry mouth symptoms, **from the first day**^{1,2}.
