CONNECTION

www.connectioncocktails.com

CONNECTION

The new machine for the preparation of cocktails, easy and precise. An automatic dispenser for quick and perfect cocktails. Connection is also a design object: made of glossy black plexiglass, that enhances every bar counter for its captivating lines and lighting LED that highlights the product on display. All this in just 60cm of height, 25cm deep and 90cm wide.

MAKE A COCKTAIL WITH A SIMPLE TOUCH

AMERICAN TECHNOLOGY AND ITALIAN DESIGN

Connection was born from the idea of professional barmen who, after years of activity in the sector, saw the possibility of creating a product that could improve the management of bar, reduce waste, increase the speed and quality of service. Thought and designed therefore by operators in the sector for the best possible simplicity and practicality. Italian software and hardware made in USA.

CONNECTION

The new machine for a practical and quick preparation of cocktails, easy and precise.

Thanks to Connection it is possible to be fast, avoid unwanted waste and overdosing.
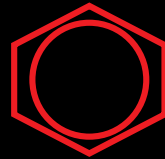

PRECISION

Higher quality

- Cocktails always perfect as the recipe commands.
- Total control and exploitation of every single centiliter per bottle, available in real time.
- Complete cocktail with centiliter portions.

TIME

Speed

- Prepare 6 cocktails per minute, about 360 cocktails per hour in a continuous cycle without any effort on the part of the operator.
- Significant lowering of waiting time for customers = possibility of a greater number of drinks a person during the evening.
- Better warehouse management; awareness of quantity used and therefore of product to be reordered.

MONEY

Zero waste

- Control of the real income per bottle over the real one consumption (drinks offered, consumed by staff, waste etc ...).
- Low power consumption.
- Minimum maintenance.

SPEED
SIMPLICITY
PRECISION

Connection's automatic dosing system allows the controlled administration of ingredients by optimizing consumption and reducing no need for cocktail preparation times of specific skills. With a management simple and intuitive through the touch screen integrated, you can make cocktails quickly. Connection is suitable for all types of businesses: from small bar, which has no experienced staff but wants to propose excellent cocktails, both for those activities of great afflow with professional bartenders, to which it integrates perfectly, bringing speed, quality, precision and ensuring control total amount of goods sold.

For everyone the possibility of having more time to devote to contact with the customer.

WITH "CONNECTION" YOU GET ABOUT 25% MORE ON EACH INGREDIENT! (no waste, always perfect, same quantity)

COMPARED TO THE BARMAN THERE ARE ABOUT 5 MORE COCKTAILS ... AND THEREFORE AN FURTHER EARNINGS

1 BOTTLE OF 1 LITER = ON AVERAGE COST € 10.00
1 LITER = 20 DOSES OF 0.5 CL

BARMAN
waste and
poor precision,
15 doses per liter

CONNECTION
20 doses per liter

WITH CONNECTION AN AVERAGE OF 5 MORE DOSES

FOR A SMALL BUSINESS, THANKS TO THE SAVINGS AND TO THE NEW GAIN OBTAINED, DEPRECIATION OF THE INVESTMENT MADE IN CONNECTION TAKES PLACE OVER THE ARCH OF A SEASON

FOR A MEDIUM / LARGE ACTIVITY THE INVESTMENT PAYS BACK IN 1 MONTH. AFTER THAT, FOR ALL ACTIVITIES, THE DISCOVERY OF A NEW PROFIT

EASY TO USE

Choose the cocktails from the menu of international recipes, with description of the preparation, the type of glass with which to serve the drink and even some decoration: press and the mix is dispensed.

Connection employs in average 5 seconds to prepare complex cocktails with different ingredients.

TECHNOLOGY

Directly from the integrated touch screen You can manage recipes and ingredients, view the usage statistics, which allow a control instant on cocktails delivered per day, for type and actual consumption of ingredients.
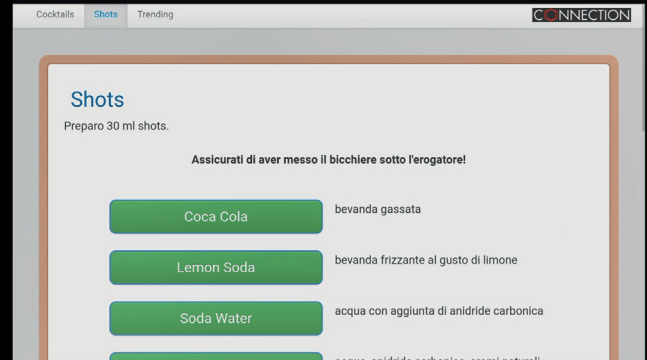

Thanks to the app in wi-fi connection it's possible check, using the administrator password, the different functionalities, among the most important that of verifying the real income by number of cocktails / bottles (cocktails offered or consumed by personnel, waste).

You can also create a cocktail line customized to your liking, thanks to possibility of using up to 15 ingredients such as liqueurs, juices, syrups and carbonated drinks e add it to the selection menu screen.

OVERVIEW OF FUNCTIONS

- **100 Ingredients and 100 recipes/drinks in memory**

- **Automatic creation of the drinks in menu based on the selected ingredients and recipes in memory.**

- **4 GB of memory available for insertion of new ingredients and new recipes**

- **Automatic counting and quantity control for dispensing of single ingredients and total number of dispensed cocktails**

- **SHOT function**
  - Possibility of dispensing "shots" of all 15 ingredients present on "connection". Customizable 30 ml quantity
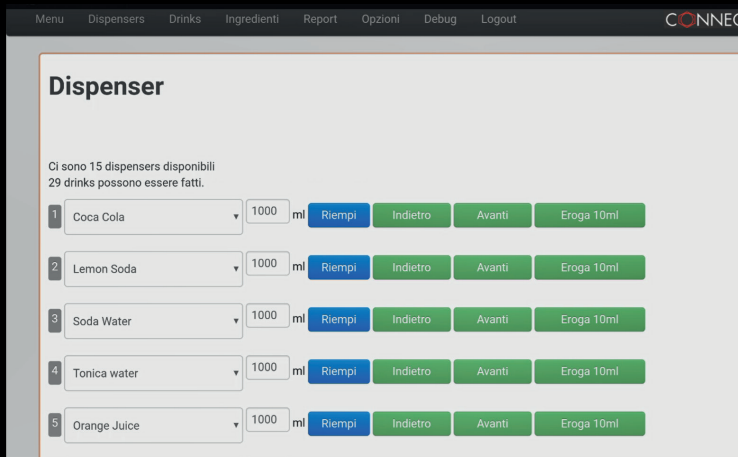

- **Ingredient level capacitive sensors**

  - Insertion of ingredients / bottles of various quantitiesof your choice or already set (500 Ml, 750 ml, 1000 ml, 1500 ml, etc.).

  - Visual warning of the end of the ingredient.

  - When the ingredient is finished, if not replaced, the machine removes cocktails that contain that ingredient from the menu, in order to avoid waste of the others ingredients with incomplete cocktails.
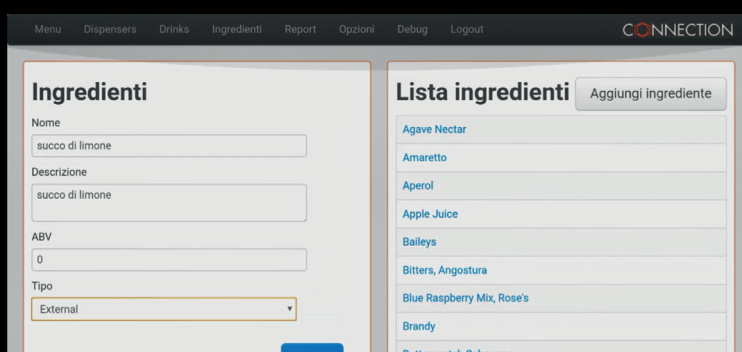

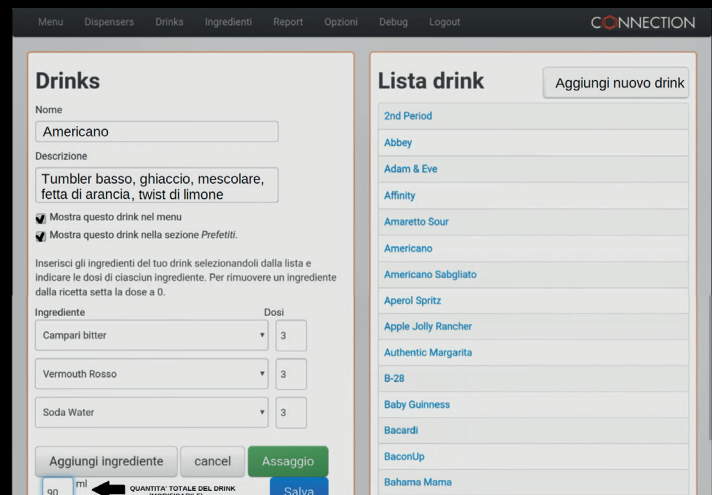

- **"Forward" and "backward" functions**

  - Possibility of filling the suction tubes of the ingredients with the "forward" button to dispense cocktails complete from the first one. At the end of the Service, by pressing the "back" button, we can put the ingredients back from the tube to the bottle, so as not to Never waste Nothing!

- **Customizable recipes / drinks**

  - Name

  - Description of service or features

  - Ingredient

  - Ingredient quantity dosage
  - Total quantity / size in ml

- **Insertion of new ingredients**

  - Possibility to choose the characteristics of the ingredient (alcoholic, non-alcoholic, sweet, dry, "external") in order to balance real-time choices like +/- sweet, +/- Dry, + strong, - strong and the total amount in ml to be poured

Statistics

- Possibility of viewing in real time the number of drinks dispensed per operator in the last 12 hours, 24 hours, 3 days, 1 week, 1 year, everything. Possibility of viewing in real time by quantity of single ingredient for total warehouse management. Possibility to download reports on .csv files

- Two-level reporting:

  - Operator: statistics on the main screen: consultation in real time of the number and type of cocktails dispensed. It is not possible to make any changes.

  - Administrator: from the administrator menu under the report item it is possible to consult: Statistics by name and number of cocktails dispensed, by name and quantity, by single ingredient dispensed, by "operator" and by hour and date (From - to). It is possible to download the report with .csv file and modify all the settings of the functions of "Connection".

- **Modalità barman**

  - It is possible to immediately dispense the selected drink without going through the second screen (+/- sweet,+/- strong).

- **Own line / wi-fi signal "Connection"**

  - Does not require telephone lines, adsl, internet, etc. Thanks to its own wi-fi line

- **Remote control**

  - Possibility of connection from any device (smartphone, tablet, computer)
  - Cocktail delivery / launch
  - Control and management of all functionalities and service statistics
  - Download service statistics report

- **Cleaning program**

  - At the end of service, thanks to the special program, it is possible to clean Connection in just 30 seconds!

- **3 types of passwords**

  - For the operator (barman): For use of "Connection" in one's work shift. For supervisor, manager, administrator: To modify the settings and statistics control. For the customer to serve himself cocktails independently: happy hour, wedding, events, etc.

- **Supplied: tablet for the control and management of the machine connected to its own wi-fi line "Connection"**

IMPORTANT - For Barman with EXPERIENCE

"EXTERNAL" item: when we attribute the "EXTERNAL" characteristic to an ingredient, we are telling to "Connection" that that particular ingredient is not physically present in the machine, but it is "EXTERNAL".
Example: American Cocktail
Campari bitter, red Vermouth and Soda Water (external).

"Connection" will dispense the right amount of campari and vermouth, leaving the necessary space for the missing dose of soda water that will be added by the barman. This function increases considerably the number of feasible cocktails and allows to manage the ingredients of greater value (spirits) with "Connection" and less valuable ingredients (juices, sodas, etc.) manually as "EXTERNAL"
