

## PRODUCT SHEET

**SAND & GRAVEL**

**CALCAREOUS SAND 0/3**

**italiana terricci**

Filed of application	Intervention in situ, background for roadbeds
Features	Correction of acidic soils, roadbeds
Content[1 m <sup>3</sup> ]	≈ 1500 kg
Particle size	0 - 3 mm
pH	9
Carbonates (CaCO <sub>3</sub> )	23,8 g/g
Chlorides	22 mg/g
Water-soluble sulphates	-

### DESCRIPTION

Italiana Terricci's calcareous sand is used for the production of unbound mixtures with excellent bearing capacity and for the correction of very acidic soils (brings the pH level close to neutrality). Thanks to the excellent compressive strength, it is a product appreciated for its frost resistance.
