INTERIOR ARCHITECTURE

Real creativity means inventing rather
than copying

Perfection stems from our
scrupulous quality control

BAt BGroup Studio we're devoted to helping and supporting our customers, bringing their ideas to fruition in solutions that are real works of art. We develop projects for interiors with a boundless range of materials and finishes, giving customers the chance to see for themselves what the end results will be like. We specialize in individually tailored creations, taking charge of both the design and execution stages with the utmost effectiveness.

We design and create superior interiors in our offices in Alpago, which is just a few kilometres from Venice. Designs by architects are given concrete form by accomplished artisans.

We believe in a world where technology and people work together to create a new approach to living spaces, based on art, beauty and technology.

BGroup Studio's values:

- Caring for the environment
- Work that revolves around people
- Quality in our work
- Gaining customer trust
- Transparency in everything we do
- Prompt replies and punctuality at work
- Constant innovation
- Supporting Italian creativity
- Improving life with technology
