THE TECHNOLOGY AT THE SERVICE
OF BEEKEEPERS

www.arniaperfecta.it

Recycling paper is simple. Make sure to throw away this brochure in the given bin for its recycle.
In doing so, we will help preserve the Planet!

With **ARNIA PERFETTA** you'll have the complete coverage of the apiary, you can **remotely monitor** your hives and the **production of the honey**.

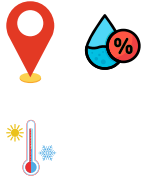

The **data** are visible on the **webapp** using any device (SIM included + no subscription fee)

OUR **4** DEVICES:

BATTERIES ARE LITHIUM AND FULLY RECHARGEABLE.

1

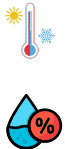

BHUB PLUS

bHub Plus is a hive frame with an invisible sensor capable to detect: **temperature, humidity, the overturning and movement of the hive** (with tracking)

2

BSENTINEL PLUS

bSentinel Plus is capable to detect the same types of signals managed by bHub Plus with which it communicates, except for the tracking. bSentinel Plus can also be linked to the bScale

3

BMETEO HUB

bMeteo Hub independently manages the alarms for humidity and temperature of the apiary's **microclimate**. It is useful to compare the **internal and external parameters of the hives** and to know when is the best moment to perform the **treatments**.

4

BSCALE PLUS

bScale Plus is a wireless scale, that can **weight** up to 4/5 hives. It performs **4 daily weight** (one customizable to the desired time). Duration of the battery 2 years.

ADVANTAGES FOR BEEKEEPERS:

Savings of time and money, reducing the trips to the apiary

Constant monitoring of **bees' health**

Post sale **Assistance** from the dedicated staff with certified beekeeping knowledge
