100%MONOCULTIVAR
FAVOLOSA**

HISTORY

The ancient Apulian jars are the objects that most represent the world of terracotta. The tradition about their realization has remained faithful over the centuries, making this handmade product unique and inimitable in its kind.

The first appearance may date back to the 14th century. At that time the ancient families and farms of central-southern Italy needed containers suitable for storing and preserving the processed products of the earth, such as oils and wines.
