Switches

- B4B12V
- B4C12V

INNOVATION

This Foot Switch family are designed in a new concept of switch.

IT IS UNIQUE

The electrical activation arrives by a magnetic field. A magnet is integrated in the head of the rubber button, by pressing it, the magnet approaches the completely resin-coated integrated electronic board. THE SWITCH HAS A VERY HIGH PROTECTION FROM ANY MOISTURE-OXIDATION-OR WATER INNER.

INNOVATION

Cette famille de pédales est conçue selon un nouveau concept d'interrupteur.

C'EST UNIQUE

L'activation électrique se fait par l'intermédiaire d'un champ magnétique. Un aimant est intégré dans la tête du bouton en caoutchouc, en appuyant dessus, l'aimant s'approche de la carte électronique intégrée entièrement recouverte de résine. L'INTERRUPTEUR A UNE TRÈS HAUTE PROTECTION CONTRE L'HUMIDITÉ, L'OXYDATION OU L'EAU À L'INTÉRIEUR.

Created for Joy but not only, these double and single switches with their dedicated control box allow to control any DC motor. The Double switch can active the motor in cw and ccw rotation. The Single switch can active any motor.

Créés pour Joy, mais pas seulement, ces interrupteurs doubles et simples avec leur boîtier de commande dédié permettent de contrôler n'importe quel moteur à courant continu. L'interrupteur double peut activer le moteur en rotation droite et gauche. L'interrupteur simple peut activer n'importe quel moteur.

This Double switch and its Electronic Control box are created for JOY as Optional. It can be installed as double command to active the motor in Cw and CCW rotation

Ce double interrupteur et son boîtier de contrôle électronique sont créés pour JOY en tant qu'option. Il peut être installé comme double commande pour activer le moteur en rotation Cw et CCW.

TECHNICAL DATA

Model	B4B12V
Power Supply Voltage	12VDC- 24VDC
Maximum Contact Voltage	200VDC
Contact Max Current Rating	10 A (on switch box)
IP Rating	IP67* (fully gel filled)
Footswitch Wire Lenght	20cm
Switchbox Wire Lenght	1m
Switchbox Material	Plastic
Footswitch Material	Stainless Steel AISI 316 L
Tot Weight	0,2 kg

The product allows to:
This is a high-performance double footswitch integrated in one product is delivered to the customer with its switch box and is able to activate any DC motor to choice the cw or ccw rotation. The B4B12V provides a reliable and intuitive operation, allowing boaters to control their equipment safely and efficiently. With its suggested construction and advanced features, the product is the ideal solution for a wide range of marine applications.

Pay attention to the electrical connection,
NEVER connect the Switches without
its electronic switch box
