Client

AUSL Toscana Nord Ovest

Project Manager

Eng. Michele Ombrato

Service

technical-economic feasibility project

Execution

2023

Amount of works

7.000.000,00 €

The project team is made up of 2Zero Projects, MU Associati Milano and iBi Studio and it carries out the technical-economic feasibility project of Community Health House and Community Hospital, acting on behalf of Local Health Unit Toscana Northwest.

The assignment refers to the National Recovery and Resilience Plan Mission 6 - Healthcare (M6), aimed to increase effectiveness, efficiency and resilience of the Italian healthcare. The project involves the construction of a single three-storey building with separate functions: Hospital (north side) and Community Health House (south side).

Community Health House and Community Hospital aim to become a new social Hub in Massa hinterland. A sustainable building, which is innovative and traditional.
