

HYDRO-PNEUMATIC DISC CULTIVATOR WITH ROLLER

DIR PLATINUM R

PLATINUM R is a hydro-pneumatic disc cultivator with roller, suitable for cultivation of any type of soil (loose, medium, hard and stony). PLATINUM is an innovative disc cultivator and its features make it completely unique. The discs arrangement ensures the machine straight advance avoiding lateral drifts and the consequent greater fuel consumption. In addition, the soil is worked homogeneously, ensuring intensive mixing over the entire surface and up to the depth.
