

About us and our journey

We are an Italian start-up whose purpose is the production of prickly pear liqueur handcrafted in Sicily, where the prickly pear grows in all its flavor and deliciousness. As often, our journey started by chance. The passion of an Italian manager who produced artisanal liqueurs for personal use met the creativity of an Italian entrepreneur, who immediately perceived the value of this product and conceived its name.

Fichissimo

With great care and passion, we handed over the original techniques and steps of liquor-making to a Sicilian distillery, which carefully preserves the same characteristics of simplicity and craftsmanship, without using any additives. The choice to cultivate our prickly pear trees and to produce our liqueur in Sicily is a tribute to this wonderful land: a warm and welcoming land, where such a juicy plant found a perfect home.

Fichissimo our liqueur

The Fichissimo logo is a reminder of the artisanal character and strong bond with Sicily, but also expresses a sense of modernity, which makes our product a worthy new entry in the world of liqueurs.

We suggest drinking Fichissimo at the end of a meal and to share this moment with others, similarly to what people do when they drink “amaro” or other liqueurs. Fichissimo is an excellent digestif, which should be served cold. Thanks to the fruit’s properties, this liquor is also energizing, antioxidant, and has anti-inflammatory properties. Fichissimo offers the palate a pleasant sensation of freshness and brings joy to the body and the mind, with its persistence.

Fichissimo is crafted with simple ingredients, is of yellowish color, and has 32% alcohol content.
