

Latte Arredamenti

About us

The company was founded in the 1940s in Bolotana, a small town in central Sardinia, by Francesco Latte, then a carpenter but with a broader and far-sighted vision from the start. He quickly transformed his carpentry shop into a commercial resale, immediately gaining great general appreciation for his seriousness and professionalism. But his strength is his three sons, who, endowed with great ambitions and abilities, built a new store in the 80s and then later in the 90s decided to make the leap in quality by building a new structure in the commercial center of Bolotana. . The new store currently has a 2000m2 showroom and an artisan carpentry shop.
