ENGINEERING IMMERSIVE EXPERIENCES

VIRTUAL REALITY ATTRACTIONS

VR Motion Theatre

Virtual worlds. Physical response.

Virtual reality and synchronised motion bring guests inside the story. Headsets create the virtual environment, while physical movement and selected effects connect the experience to the real world.

Designed as a shared attraction, the format can be configured around the venue, audience and seating capacity. Content, motion and show operation are considered together as one integrated experience.

CONCEPT ILLUSTRATION FROM THE PARKSOLUTION BROCHURE

THE EXPERIENCE

Immersive films, synchronised motion and optional physical effects, selected to suit the project.

PROJECT OPTIONS

Theming and custom content for family entertainment, adventure and seasonal experiences.

SYSTEM & SUPPORT

VR playback, motion coordination and technical integration, with remote and on-site support.
