

VAMMI

VT-45TI

UNLOADING TABLE

Provides an organized exit point, maintaining workflow efficiency.

LOADING TABLE

Efficiently positions tubes for smooth entry into the system.

INDUSTRIAL SOLUTIONS

VT-45TI

Our automated solutions are already making a difference in pipeyards and tubular services facilities.

Here is an example of how they are being utilized.

VT-45TI is a highly automated loading and unloading table integrated with built-in tube inspection station.

The system is equipped with fully functional electrical and pneumatic actuation ensuring seamless integration and high performance in demanding environments.

FEEDING LINE WITH DRIVEN ROLLERS

For your CNC machine. Facilitates precise and reliable feeding of pipes to your CNC machine.

TUBE ACCUMULATOR

Holds up to six tubes, with pneumatic actuators ensuring secure and controlled handling thanks to tube singularization.

TUBE INSPECTION STATION

Features driven wheels that rotate the tube at low speed, enabling thorough inspection with ease and accuracy.
