

Spazio Calmo®

 Communicator

Design Alberto Manzoni, 2018

Two-way communication system for refuge area, with interactive display to facilitate calling for help and maintaining calm while waiting. The device is plug-and-play, requiring only a 220V power connection and GSM signal coverage (mobile phone). If installed in an area without GSM signal coverage, the COMM001/AE model can be used to remotely position the antenna in an area with signal coverage. The system is eventually equipped with a 24-hour call centre to receive emergency calls, which automatically geolocates the device, acquires the necessary information and transmits it directly to the Fire Brigade Command Centre, or can call the Fire Control Centre inside the building.

Product Data

Product code	COMM001
Height	38,7 cm
Width	28,7 cm
Thickness	10,3 cm
Communication Protocol	GSM
Mounting	Wall mounted
Environment	Interiors / Dry*
Color	Green

*Outdoor installation possible with art. KEPR and KEPV.
IP66 protection rating.

Packaging Data

Height Packed	23,4 cm
Width Packed	41 cm
Thickness Packed	31,5 cm
