MORE TIME FOR CREATIVITY? WE'LL HELP YOU!

just
LooKreate

just **looKreate** helps you index your design archive and create new collections safely through the Artificial Intelligence

WHY LOOKREATE?

Because why minimizing cataloguing and research time, it increases the time available for creativity

just LooKreate

Fast and automatic storage

Thanks to the indexing based on machine learning, just looKreate simplifies the exploitation of your own archives of drawings and fabrics, freeing the user from the need to catalogue them by categories and tags.

Fast multifunction search

Just IcoKreate allows you to search inside your archives using textual descriptions, existing images or a combination of both, and get immediate answers from the system.

Generative Function

In addition to the archiving and search functions, looKreate is able, thanks to the AI, to interpret existing details in a drawing, photo, item, text and generate new drawings within minutes.

Ratio images

Starting from a detail, just leoKreate generates endless all-over proposals already in ratio, with classic cloth, satin, pin or free arrangement. The system will always propose the continuity of the design.

Guaranteed security

With just looKreate, searches and variations ane generated in a secure environment (internal, proprietary server); no files or details of your designs are exchanged with Cloud systems or via the Internet.

Open to integrations

Through simple APIs any system already in place can interact with looKreate and get search results or new proposals generated in a few steps to use them for business processes like creation, editing, prototyping, e-commerce...

JUST LOOKREATE FOR THE TEXTILE AND FASHION INDUSTRY

It supports the creativity of your designers, reducing cataloguing and research time, and does so in an extremely secure way, because operating through a proprietary server no information about your creations is exchanged in the Cloud or via the Internet.
