ITA - Italian Trade Agency

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investments in Italy, through "Invest in Italy", a project operated with Invitalia. With a motivated and modern organization and a global network of 87 offices in 74 countries, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses in the industrial, consumer goods and services sectors.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world. Every year, ITA worldwide offices carry out hundreds of promotional projects and provide personalized services and assistance to thousands of Italian companies. The Italian Trade Agency also assists and supports foreign companies that want to establish or expand business and trade relations with Italian companies or to invest in Italy. The Italian Trade Agency collaborates with Italian Regions, Chambers of Commerce, Industry and Trade Associations and other public and private organizations.

ITA Participation at Enlit

For this edition, the Italian Trade Agency (ITA) will participate with a national pavilion located in Hall A, featuring two exhibition areas (A.D50 and A.E50). Italy will be represented by a group of 28 innovative companies, each showcasing cutting-edge solutions in energy transition, smart grids, digitalization, and sustainable technologies. The Italian pavilion includes individual workstations, a lounge area and shared working spaces to foster networking and collaboration. We warmly invite you to visit our pavilion and discover the excellence of Italian innovation in the energy sector. We are confident that ENLIT Europe 2026 will be a valuable opportunity to strengthen partnerships and accelerate the development of sustainable energy solutions.

As one of Europe's largest energy exhibitions and conferences, ENLIT brings together over 15,000 professionals, 700+ exhibitors, and 500+ expert speakers from 140+ countries, creating a vibrant marketplace for partnerships, investment, and technology adoption. From renewables and hydrogen to flexibility, storage, and smart grids, its thematic zones spotlight the innovations shaping the future of energy.

FEDERAZIONE NAZIONALE IMPRESE ELETTROTECNICHE ED ELETTRONICHE

Federazione ANIE, member of Confindustria, has been representing the Italian Electrical Engineering and Electronic industry for over 80 years.

With over **1,100 member companies**, the ANIE system supplies technologies for public and private infrastructures in strategic markets such as energy, industry, building, infrastructures and transport. Electrical Engineering and Electronic technologies represent the heart of the twin transition – green and digital. They are drivers of innovation and are essential for the modernization of existing infrastructure.

ANIE INDUSTRY FIGURES:

- **112 billion Euros of total turnover**
- **480,000 employees**
- **4% intra-mural R&D expenditure on total turnover**

ANIMA Confindustria is the industrial trade association that, within Confindustria, represents companies in the diverse mechanical engineering and related sectors. The Federation is made up of 35 associations and product groups, and has over 1,000 member companies. The sector represented by Anima:
· Employees: 222,400
· Sales: €59.1 billion
· Exports on sales: 60%

ANIMA's strategic goals include providing companies with skills, knowledge and services of high added value.

Macrosectors represented

- Construction equipment, machines and products
- Goods handling and logistics
- Technologies and equipment for food and water products
- Machines and plants for energy production and for the oil and chemical industry
- Technologies and products for industry
- Machines and systems for personal and environmental safety

Our mission

We protect the interests of the mechanical engineering industry in general, promote our member companies and their products, both in Italy and abroad, and support them in resolving their technical and economic problems.

In Italy

ANIMA is a founding member of UNI (Italian standardization body). ANIMA Confindustria is also the majority shareholder of ICIM Group, a holding that includes ICIM SpA, OMECO, Consorzio PASCAL, TIFQ, TIFQlab.

In Europe

At the European level, ANIMA is a founding partner and an active member of Orgalim (The European Federation of Mechanical Engineering).

Worldwide

ANIMA promotes Italian mechanical excellence by supporting internationalization through trade missions, international trade fairs, and strategic partnerships with global institutions. The Federation assists member companies in navigating international standards and expanding their export presence across key global markets.

The world of betonform®

We bring your ideas to life - we design living spaces from urban centers to rural landscapes using high-precision precast concrete elements for buildings, facades and outdoor environments.

We protect people and natura through innovative precast concrete systems for avalanche, erosion and noise protection.

We support projects in the fields of energy and infrastructure with forwardthinking precast concrete solutions built for the future.

CEMBRE is an European leading manufacturer of electrical connection systems and wiring technologies. Thanks to its extensive Know-how, innovation in manufacturing technologies and strong investment in R&D,

Cembre also offers advanced solutions for industrial marking systems and specialized lines for the railway sector (infrastructure and rolling stock) and power utilities.

In order to grant medium-voltage connections simpler and faster, Cembre has recently introduced a new range of mechanical clamping joints and cable lugs to ensure quick, reliable and safe installation in modern electricity generation, transformation and distribution systems.

Through a global presence and a widespread sales network (from Europe to the USA and China), CEMBRE guarantees excellent quality standards and a timely response to global technological developments.

clampco sistemi
LIGHTING ▪ ENGINEERING ▪ SOLUTIONS

Clampco Sistemi supplies utilities, grid operators and infrastructure companies worldwide with obstruction lighting and monitoring solutions for power transmission and distribution infrastructure.

Since 1989, Clampco has designed and manufactured low-, medium- and high-intensity aircraft obstruction lights for transmission towers, poles and overhead power lines, in compliance with ICAO and FAA standards.

Today, Clampco also develops monitoring sensors for overhead power lines that provide remote visibility of grid assets and environmental conditions, supporting ice and snow load assessment, wildfire risk management and asset management.

COL GROUP is an industrial group with over a century of experience, specialized in developing technological solutions for the transmission and distribution of electrical energy.
Founded in 1920, it has evolved into a benchmark in the electromechanical sector, thanks to its commitment to innovation, quality, and sustainability.

The Group is made up of highly specialized and synergistic companies:

- COL Giovanni Paolo S.p.A., a leader in electrical switchgear for Distribution and automation systems for Transmission;
- IMEGROUP, with its divisions IMEQUADRI (low and medium voltage electrical switchgear) and IMEMONT (plants and substations up to 420kV);
- TW-Teamware S.r.l., focused on digital solutions for power grids and industrial applications.

With operational sites in Turin, Milan, Bergamo, and Catania, COL GROUP has a strong presence across Italy and is steadily expanding into international markets, operating in a strategic and constantly evolving sector.

The true strength of COL GROUP lies in its team of over 400 talented professionals, passionate, skilled individuals who bring together strategic vision, technical excellence, and a spirit of innovation.

Sustainability is central to our strategy: we invest in low-impact technologies, champion the use of renewable energy, and develop solutions that improve energy efficiency across the entire value chain.

COMPASS

MECCANICA DI PRECISIONE - CNC PRECISION MACHINING

COMPASS SRL has been continuously operating in the precision machining sector for over 36 years, combining technology, expertise and reliability to manufacture high-precision components for high-tech applications. The company produces tailor-made turned and milled components according to customer drawings and specifications, supporting leading companies in highly specialized and high-value-added sectors such as medical, aerospace, optical, lighting, electronic engineering, industrial mechanics, cash handling and security.

Compass relies on advanced CAD/CAM software, CNC machining centres and lathes, robotic islands and Coordinate Measuring Machines (CMM) to ensure maximum precision and quality. With a strong customer-oriented approach, Compass develops tailor-made solutions, continuously investing in digitalization, process optimization and employee training. Its commitment to quality and sustainability is ISO 9001 and ISO 14001 certified, ensuring reliability throughout the entire production cycle.

DigitalPlatforms SpA ("DP") is a wholly Italian company founded in 2018 with the mission of providing end-to-end solutions and Internet of Things and cybersecurity technologies to the defense sector, public administration, and leading companies that manage critical infrastructure in the energy/utilities, transportation, and telecommunications sectors, both in Italy and abroad.

With a subsidiary, Gibiesse, and a workforce of over 400 professionals, including engineers, programmers, IT consultants, lab technicians, and researchers, DigitalPlatforms aims to increasingly become the partner of choice for companies seeking innovation and digital transformation of IoT-enabled infrastructure.

DP is a full-service provider, offering all the components necessary to deliver end-to-end IoT solutions. DP's expertise ranges from the development, design, and manufacturing of sensors and industrial electronics, through command and control systems and technologies, to IoT platforms, IT system integration, and cybersecurity.

DP aims to ensure that digital transformation leads to the creation of secure, protected, resilient, and efficient infrastructure.

Holding the key security clearances, DP collaborates with all major system integrators and platform providers in the Italian defense sector and is a member company of AIAD (Italian Association of Defense Companies). It is also a certified vendor with the Council of Europe and NATO.

G2 Misuratori S.r.l.

THE VALUE OF METERING

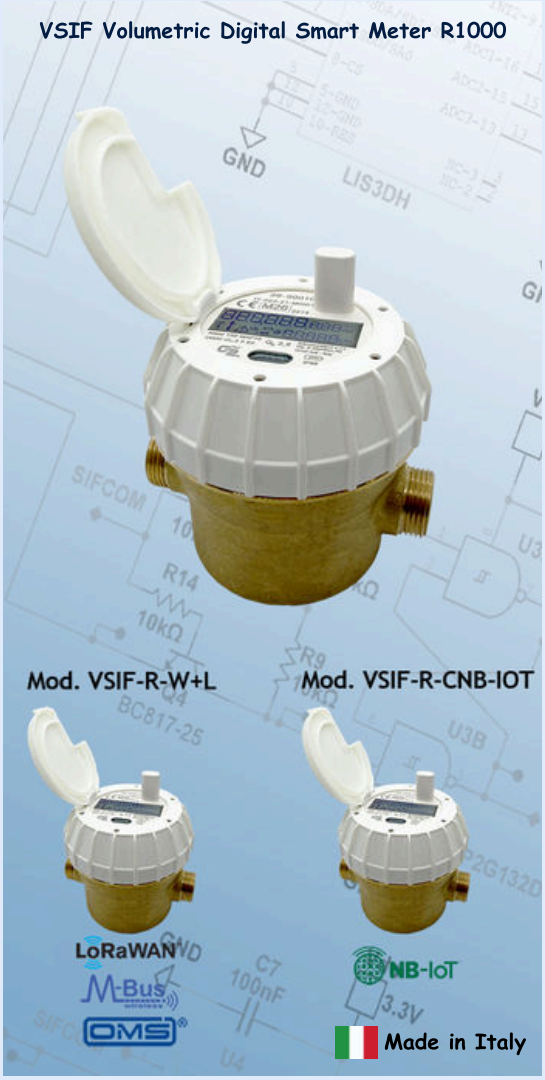

Since 1997 in Italy we manufacture MID approved water meters according to Dir. 2014/32/EU with high metrologic performances currently reaching up to R 1000.

We have developed new product lines of mechanical meters, hybrid direct reading LCD electronic display and radio data transmission meters and static smart meters with embedded radio transmittion based on various protocols: W-MBus OMS, NB-Iot, LoRaWAN and dual mode.

We are suppliers of the most important Water Utilities in Italy and abroad. Our supply chain from raw materials to molding, assembly and testing, is strictly Made in Italy, guaranteeing the highest quality.

In addition to the production lines we have our Internal UNI CEI ENISO / IEC 17025 Laboratory and we are ISO 9001-ISO 14001-ISO 45001-UNI/PdR125:2022 certified.

Our main mission: The Value of Metering is achieved by combining optimization and standardization of production according to the current international standards for measuring devices, with a fine and accurate customization of our smart water meters in order to support the water utilities in technical and operational terms.

SECURITY PATTERN

Security Pattern is a specialized engineering firm in embedded cybersecurity, enabling manufacturers of intelligent connected devices to design and operate systems with a sustainable security posture. The company champions "Security by Design" across the Automotive, Industrial, Medical, and Consumer IoT sectors.

Security Pattern delivers comprehensive technical solutions tailored to mitigate evolving cyber threats.
Core competencies include:

- **IoT Security Assessments:** Comprehensive vulnerability analysis and risk mitigation for connected devices.
- **Secure Development (SDLC):** Integrating robust security architectures throughout the entire product lifecycle.
- **Regulatory Compliance:** Expert guidance on navigating complex frameworks, including the EU Cyber Resilience Act, the RED Delegated Act, and IEC 62443.

Leveraging extensive technical expertise in the semiconductor industry, Security Pattern provides advanced consulting and actionable solutions to ensure seamless market compliance globally.

Technoelectric S.r.l. is an Italian manufacturer specialized in low-voltage switching and changeover solutions for electrical and energy applications. Founded in 1981, the company combines more than 45 years of experience with continuous investment in product development, quality and international growth.

Our portfolio includes manual and motorized switches, changeover switches and solutions up to 4000A, designed for applications such as power generation, UPS systems, renewable energy, industrial automation and electrical distribution.

Technoelectric products are designed and manufactured in Italy, with a strong focus on reliability, flexibility and technical performance. Our international product range includes UL-certified solutions for the North American market.

At Enlit Europe, we are looking to connect with distributors, OEMs, panel builders, system integrators and energy-sector companies interested in reliable European manufacturing and long-term partnerships.

Our goal is to further expand our international presence and develop innovative switching solutions for the evolving energy market.

TESMEC

Tesmec Automation delivers cutting-edge technologies for the protection, monitoring, and control of transmission and distribution networks. With strong expertise in digitalization, automation, and substation systems, it ensures reliable, safe, and efficient grids. Its solutions enhance operational efficiency, reduce downtime, and improve overall system resilience.

As part of Tesmec Group, it combines a long-standing tradition in the energy sector with a global vision, providing utilities and operators with advanced solutions designed to meet the evolving challenges of energy transition, digitalization, and modern infrastructure management.
