TRADE AND INVESTMENT

**OPEN DOORS TO A WORLD
OF OPPORTUNITIES**

Italian Trade Agency – ICE

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

ICE provides a wide range of services overseas helping Italian and foreign businesses to connect with each other, among which:

- Identification of possible business partners
- Bilateral trade meetings with Italian companies
- Trade delegation visits to Italy
- Official participation in local fairs and exhibitions
- Forum and seminars with Italian experts

The ITA's Bangkok Office, in charge also for Myanmar, has been operating in Thailand for more than 30 years, helping link Italian-entrepreneurs with the local partners and supplying companies with commercial support.

Who is ADR S.P.A.?

For over sixty years ADR spa has been one of the Leading industrial groups in the production of axles and suspensions for agricultural machinery, position reached thanks to close collaboration with the manufacturers of the sector. By virtue of that experience ADR often characterizes the market with innovative technical solutions, always aimed at reconciling efficiency and reliability in compliance with the international requirements of quality and safety. Advanced technologies and R&D contribute to success on materials, innovation, quality and, above all, on people. The current Group is based in Italy, France, England, Poland, Australia, Brazil, Canada, China, India, the Middle East, and South Africa.

Totally 14 enterprises for a total of 190,000 square meters, about 1.500 people.

The axles of ADR Group are sold all over the world and they embrace basic components for all agricultural machinery. Rigid axles, axles steering, stub axles, brakes, bogie, mechanical suspension: tandem, tridem, and quadrem, hydraulic and pneumatic suspensions, spare parts.

E-Mail: **nicoleta.axenti@metalmont.it**

About products:

Metalmont designs and manufactures equipment for the mechanization of silo plants and the automation of the flat storage warehouses.

The Mechanization of the silos plants consists basically of handling equipment (Bucket Elevators, Chain Conveyors, Belt Conveyors, Trench Conveyors, Sweep Augers), Pre-cleaning equipment (Rotary and air cleaners) and all the accessories and metal structures such as catwalks, stairs, towers etc. All the mentioned machinery is suitable for products such as grain, paddy rice, seeds, pulses and pellets.

The Automation of a flat storage warehouse is reached thanks to the use of the Robot Automatic Levelling System that allows the filling and emptying of a warehouse without the access of people or vehicles inside. It also allows the use of the entire volume of the warehouse thanks to the levelling process carried out by the Robot and the control of the temperature of the stored product.

More details about this solution at the following link: <https://metalmont.it/en/products/levelling-robot/>

Company name: MIXTRON SRL

Stand: H04

Company name: MIXTRON SRL

Stand: H04

E-Mail: info@mixtron.it

Mixtron represents today the evolution of dosing technology in terms of reliability, robustness and precision.

Mixtron not only provides cutting-edge technical and technological solutions for all types of industry, but also a unique system design and customer service, thanks to its ability to interpret customer needs and market trends.

Mixtron produces proportional dosing pumps. Installed directly in the water supply line, our dosers work without electricity using water flow as an energy source. The water activates the pump, which sucks the concentrated product, doses it in the desired percentage and mixes it. The solution is then pushed out of the water pressure. Once regulated, the dosing pumps do not require any intervention or external control.

The dosage of the injected product is constant, strictly proportional to the volume of water passing through the device, regardless of the variations in pressure and flow that may occur.

This makes Mixtron dispensers particularly suitable for water treatment, disinfection and hygiene, as well as suitable for many other applications (e.g. agriculture, livestock and mechanical processing).

Recently, Mixtron, in order to increase production and efficiency, has invested in a robotic line for assembly and testing of its products.

This investment has allowed Mixtron to become a cutting-edge technological reality, controlling the entire production process, automatically testing products at 100%, maximizing the reliability and quality of its dosing pumps.

Company name: **NARDI SRL**
Stand: **G13**
City: **Via del lavoro 24/26 San Giustino PG**
Postal Code: **06016**
Country: **Italy**
Tel: **+39 0758610611**
Fax: **N/A**
E-Mail: **info@nardigroup.com**
Website: **www.nardigroup.com**
Contact: **Mr. Alessandro Caiella (Export Manager)**
E-Mail: **a.caiella@grupponardi.it**

“Nardi’s history is composed of a continuous series of innovations that stretches along as much as 120 years. It began in 1895 with the first reversible plough sold by the founder, Francesco Nardi, up to the last product of catalogue. A patented plough to fight desertification. An evolution launched Nardi on the international stage and the we accepted the challenges of this new perspective, also in terms of social and environmental responsibility. The factory, established in Perugia, Italy, extends over a surface of 45k covered square meters and at the same time it is also endowed with large tracts of lands both on the hills and in the planes where trials and tests of equipment are continuously carried out for the benefit of all customers. “Implements for professional farming” is the catchphrase that has been with us for years now with a product range wider every day; from ploughs to boom sprayers, cultivators disc harrow, disc ploughs, fertilizer spreader, rotary hoes and seed drill. “

Company name: **SAB SPA**

Stand: **B25**

City: **Via Salvo D' Acquisto - Zona Ind.le S. Angelo in Vado (PU)**

Postal Code: **61048**

Country: **Italy**

E-Mail: maione.d@irriland.it

Irriland Srl is a young and dynamic company specialised in the design, development, manufacture and assistance of hose reel irrigators, irrigation booms, motorpump sets and generating sets. The main fields of application are agriculture for small/large surfaces, golf and football fields etc.

Irriland offers 100% hot-dip galvanized and this creates a greater product strength and no rust, fundamental since the products must be used in external conditions.

Our products are characterized by being one of the most competitive and reliable in the market: machines that can offer in every kind of situation, efficiency and functionality, guaranteeing at the same time safety and reliability.

For over 30 years, Irriland has imposed its name on the domestic and international markets thanks to a wide range of modern products. Design, collaboration, research into the best solutions for the needs of the clientele and the synergy of a group of highly professional staff are the key to Irriland's success.
