**Embassy**

A CENTURY OF PROMOTING MADE IN ITALY WORLDWIDE

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy, through "Invest in Italy", a project operated with Invitalia. With a motivated and modern organization and a global network of 87 offices in 74 countries, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses in the industrial, consumer goods and services sectors.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world. Every year, ITA worldwide offices carry out hundreds of promotional projects and provide personalized services and assistance to thousands of Italian companies. The Italian Trade Agency also assists and supports foreign companies that want to establish or expand business and trade relations with Italian companies or to invest in Italy. The Italian Trade Agency collaborates with Italian Regions, Chambers of Commerce, Industry and Trade Associations and other public and private organizations.

E-commerce agreements  
since 2019

**5.000+**

Companies trained  
in export and development

Italian Trade Agency (ITA) has been supporting Italian companies in their export activities and international growth, for 100 years. With a global network of 69 offices across 133 markets, ITA promotes Made in Italy worldwide.

# THE RENEWABLE ENERGY SECTOR

The renewable energy sector in Italy in 2025 represents an increasingly central component of the national energy transition, boosting production capacity, the number of active businesses, and related employment. According to sector surveys, over 21,000 companies operate directly in Italy in the production, installation, maintenance, and services linked to renewable sources—including solar photovoltaic, wind, hydroelectric, biomass, and other clean technologies—with a significant geographical distribution in the Northern and Central regions, alongside a growing presence in the South.

In Italy, installed renewable capacity exceeded 74,000 MW in 2024, with photovoltaic, wind, and hydroelectric power showing strong growth in recent years. In 2025, expansion continues with the addition of tens of gigawatts of new capacity, fostering an acceleration in infrastructure investments and storage technologies. This contribution to total energy capacities is also reflected in energy generation: during 2025, solar energy reached a new record of 44.3 terawatt-hours (TWh), marking an increase of approximately 25% compared to 2024 and consolidating solar power as one of the main clean generation vectors in the national energy mix.

Overall, in 2025, renewable sources covered approximately 41% of Italian electricity demand.

From an economic perspective, the renewable energy sector has recently generated a total turnover of over 9-12 billion euros, supported both by domestic demand for clean energy and by exports of turnkey technologies and systems to foreign markets. Exports of components and solutions for Italian renewables account for a significant share of the overall revenue of high-tech companies in the industry, strengthening the competitive positioning of "Made in Italy" in international markets.

The sector's outlook points toward further expansion by 2030, aligned with climate and decarbonization

targets: national plans aim to significantly increase total renewable capacity in the coming years, encouraging large-scale solar and wind projects, integrated technologies such as agrivoltaics and energy storage systems, as well as incentives to boost the adoption of clean sources in the national energy mix.

A key reference role in the renewable energy sector is played by ANIE – National Federation of Electrotechnical and Electronic Enterprises, which represents Italian companies active in energy technologies, networks, automation, and systems for renewable generation. The federation brings together businesses across the entire supply chain of photovoltaics, wind power, storage, grid infrastructure, and electrical components, carrying out institutional representation, market analysis, and technical-regulatory support. ANIE also collaborates with ICE Agency on internationalization initiatives, overseas promotion, and participation in trade fairs and business missions, supporting the presence of Italian companies in international energy markets.

# ITALIAN ENERGY DELEGATION

## Workshop and B2B matching meetings

### Location:

Dansk Industri (Industriens Hus)  
H. C. Andersens Boulevard 18, 1553 Copenhagen V

### PROGRAM

The event will be held at Dansk Industri (the Confederation of Danish Industry) and the State of Green, ITA's partners in the organization of the workshop.

.....  
**24 September 2026**

### Arrival of Italian Energy Delegation in Copenhagen

**14:30-17:00:** Optional boat trip to Middelgrunden wind farm

**19:00:** Networking event and aperitivo

.....  
**25 September 2026**

### Workshop and B2B Matching

**08:45:** Arrival of participants at the Dansk Industri lobby, registration and coffee

**09:00-09:10:** Opening and keynote speeches (ground floor meeting room)

**09:10-09:30:** Italian company introductions (3-4 minutes per company)

**09:30-09:45:** Danish company introductions (2-3 minutes per company; timing may vary depending on the number of companies)

**09:45-10:45:** B2B meetings in the ground-floor

meeting room (timing may vary depending on the number of Danish companies)

**10:45-11:00:** Coffee break and networking outside meeting room (ground floor)

**11:00-11:45:** Visit to State of Green showroom (first floor) for presentation of Denmark's green transition and the Danish renewable energy sector

**12:00:** Networking lunch at the State of Green showroom

**13:30:** Optional focus seminar or departure for visit

**16:30:** Closing remarks

**NB: the program may be subject to minor changes**

## Matteo Frighi - General Manager

mfrighi@ceditaly.it  
(+39) 333 9575954

## Company profile

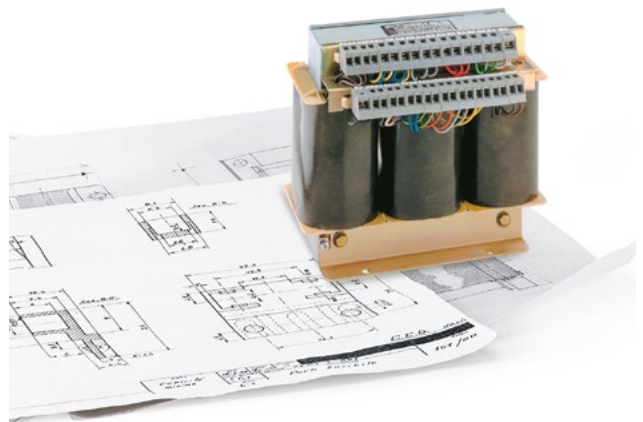

Since 1960, CED has been shaping the future of electrical transformers, combining six decades of expertise with a constant drive for innovation. We deliver high-performance solutions, from fully bespoke transformers to large-scale production, tailored to the needs of companies worldwide. Our commitment to research drives greater efficiency, advanced materials and a lower environmental impact. As pioneers in aluminium-wound technology, we continue to anticipate market needs and deliver smarter, more sustainable solutions.

## Unique Value Point

CED offers unique value points which give it a distinct edge in the sector. Salient among our distinguishing features are custom-made transformers, fast delivery, and aluminum windings for lower powers transformers.

## Profile of commercial contacts wanted

- EPC contractors active in the electrical sector, data centre installers, electrical switchboard assemblers, Importers and distributors of industrial electrical equipment, Machine tool manufacturers

# C.R. TECHNOLOGY SYSTEMS

## Contact

🏠 Via Stezzano, 7E | 24050 Zanica (BG)  
☎️ (+39) 0363 34981  
✉️ info@crtsgroup.com  
🌐 www.crtsgroup.com

## Company profile

We're an Italian company active in the energy sector since 1985, specializing in connection-ready solutions for power generation and distribution. We design switchrooms and control rooms with MV SF6-free switchgear (up to 40.5kV), protection systems, and SCADA for the grid connection of PV plants, BESS and Data Centers. We have enabled the connection of approximately 5GW of PV and 4.5GW of BESS, especially across Europe. These prefabricated, bolted-steel units can be installed in just 2-3 weeks, ensuring fast and reliable grid connection.

## Unique Value Point

Driven by innovation, powered by expertise. We work side by side with our customers, turning their needs into plug-in and tailor-made solutions in record time. Through our Engineering Hub, we anticipate market trends with cutting-edge technology. With a strong global footprint, our Export Expertise ensures seamless management of complex projects worldwide.

**Luca Rigazzi - General Manager**

info@graziadio.it

## Company profile

Manufacturer of busbar trunking systems rated from 25 to 6300 A, available with aluminium or copper conductors, engineered for both indoor and outdoor installation with protection ratings up to IP68.

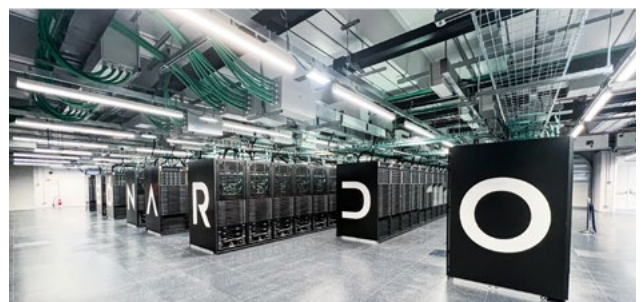

Our systems are primarily deployed in demanding applications including hydrogen refuelling stations, solar power transmission, data centres, and power generation plants.

## Unique Value Point

A complete range of busbar solutions, backed by our specialised expertise in the sector. We pride ourselves on fast response times and a genuinely personal approach - real people who stay closely connected with our clients throughout the process.

## Profile of commercial contacts wanted

- EPC contractors, Engineering and design companies, Switchboard manufacturers

**Giuseppe Maresca - CEO**

[commerciale@greentronics.it](mailto:commerciale@greentronics.it)  
 (+39) 328 9251008

## Company profile

Greentronics produces an innovative photovoltaic storage system for total energy autonomy: REPOWER KIT. With an automatic desulphurizer for lead batteries, it extends their lifespan up to over 10 years, obtaining a bigger storage at a price 3 times lower than other technologies, as lithium, etc. Greentronics produces also an adaptive AI control device with extremely low payback time, for the automatic management of indoor lighting. This device with its performances and with its typical payback time of 12-14 months is considered today the best solution for energy efficiency in lighting systems

## Unique Value Point

Greentronics delivers patented, design-driven energy-efficiency and renewable solutions that reduce energy costs with a faster payback time than conventional market alternatives.

## Profile of commercial contacts wanted

- Sales Agents, Distributors, Importers, EPC contractors, Electrical and Photovoltaics installers, Engineering and Architectural companies, Energy-intensive customers

# LUXSOLAR

## Company profile

CE2K S.r.l. is an Italian engineering and manufacturing company with over 30 years of experience in certified solutions for hazardous and critical environments. Through its LUXSOLAR brand, the company designs and manufactures aircraft warning lighting systems for onshore and offshore wind turbines, including solutions for safe and hazardous areas, as well as heliport and helideck lighting. Its Made-in-Italy products combine in-house engineering, customization and testing, with ATEX/IECEX certification and compliance with ICAO and EASA standards.

## Unique Value Point

Our strength lies in the complete in-house management of engineering, manufacturing and testing, ensuring quality, traceability and fast technical support. We provide highly customizable Made-in-Italy aviation lighting systems for both safe and hazardous areas, combining ICAO/EASA compliance with ATEX/IECEX expertise. Customers choose LUXSOLAR for a single, reliable technical partner able to adapt certified solutions to demanding onshore and offshore projects.

## Company profile

RINA is a multinational company providing engineering, consultancy and inspection services to the energy industry worldwide. With 7,000 professionals operating in 70 countries, RINA supports the full lifecycle of energy assets, from design and development to operation and decommissioning. Strong expertise in offshore energy, renewable energy, hydrogen and decarbonisation enables clients to meet performance targets while progressing towards a sustainable energy transition.

## Unique Value Point

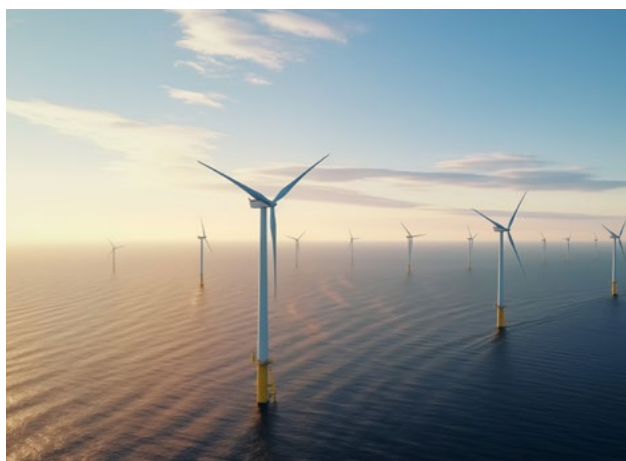

RINA is a knowledge based company built on the high level of expertise and specialisation of its people. As an active member of leading international organisations, RINA combines innovation and sustainability to support companies throughout the full lifecycle of their projects. With deep technical expertise and global reach RINA integrates engineering, advisory and verification services within a single partner, helping clients manage complexity, reduce risk and address the challenges of energy transition, digitalisation and ESG across offshore energy, gas, hydrogen and renewables

## Profile of commercial contacts wanted
