ITALIAN TRADE AGENCY

Italian Trade Agency

Trade Promotion Section of the Italian Embassy

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

AGUZZOLI

We are specializes in die casting of aluminum, mold construction, and precision machining on die castings

🏠 Via Umbria 18
Reggio Emilia (RE)
☎ +39 0522 516897
✉ aguzzolisrl@gmail.com

AGUZZOLI SRL specializes in die casting of aluminum, mold construction, and precision machining on die castings. Our advantage is a 360° service that begins with supporting the customer in optimizing their project, through mold construction, die casting production of aluminum products, finishing, and mechanical processing, all supported by our Quality office which meticulously monitors the quality of the all production process.

BROVEDANI

Brovedani: Your Global Partner
Since 1947

🏠 Via Venzone 9 | 33078
San Vito al Tagliamento (PN)
☎ +39 0434849511
✉ info@brovedanigroup.com
🌐 www.brovedanigroup.com

Since 1947, Brovedani has established itself as a global partner in multi-technology manufacturing for automotive and non-automotive applications. We are a leading company in our sector, specializing in providing solutions based on innovative technologies, distributed worldwide. Precision mechanics and the reliability of automated processes are critical success factors for us. Our excellence methodology allows us to serve the industry by offering high-precision mechanical parts.

CLUSTER COMET

COMET - the Mechanical Engineering Cluster of Friuli Venezia Giulia

A System at the Service of the Metalworking Industry in Friuli-Venezia Giulia

🏠 Via Roveredo 20b
Pordenone (PN)

☎ +39 0434 241071

✉ export@clustercomet.it

🌐 www.clustercomet.it

COMET is a cluster appointed by the Friuli Venezia Giulia Region to support and develop the local engineering supply chain. We represent over 5,000 companies in the metalworking sector, including mechanical, thermo-electro-mechanical, components, plastics, machinery, and metal production. From understanding business needs to creating networks and projects, we believe strong relationships drive local growth.

CONSORZIO NIP

Support the economic growth of the region Friuli-Venezia Giulia

🏠 Via Venezia, 18/d | 33085
Maniago (PN)

☎ 0427 71500

✉ info@consorzionip.it

🌐 www.consorzionip.it

The NIP Consortium works to support the economic growth of the region by encouraging new industrial initiatives and creating the right conditions for businesses to start and grow.

The Consortium also promotes training and career guidance for workers, managers, and young entrepreneurs, along with other social services linked to local industry and production.

ELLENA

Contract manufacturing for mechanical components and systems

🏠 Via Torino 315 | 10032 Brandizzo (TO)

☎ +39 01119324823

✉ torassop@ellenaspa.com

🌐 <https://www.ellenaspa.com/>

With 80 years of history, Ellena is a turnkey solutions provider, supporting its customers in:

- high precision machined components with high performance 7 axis mill turn machines and 5 axis machining centers
- supply chain management, counting on an experienced team of industry professionals and long-term partnerships
- assembly and test, counting on ISO 7 and ISO 5 clean room and test benches
- additive manufacturing with in house capability for AISI 316, Alloy 718, Aluminum and Titanium

FIMA

BRASS FORGING

Brass hot forging and machining

🏠 Via Sacca 132 | IT43052 Colorno (PR)

☎ +39 0521 814150

✉ fima@fimaitalia.it

🌐 www.fimaitalia.it

FIMA is an Italian company with thirty years' experience in the brass and copper processing and hot forging sector and CNC machining.

FIMA exports 90% of its production in several European countries and overseas.

Its business covers a surface area of over 10,000 sqm, including about 4,000 undercover. Its facility incorporates all production processes, starting from design and continuing with the manufacturing of equipment, forging, CNC mechanical machining and even finishing with assembly and packaging

FONDERIA TARONI

Aluminum gravity shell casting

🏠 Via Roma 101
Alfonsine (RA)
☎ +39 0544 84380
✉ sales@fonderiataroni.com

Fonderia Taroni is a gravity aluminium shell foundry specialising in the energy and healthcare sectors. With a strong focus on innovation and technology, we are renowned for our service and the high quality of our products.

We are able to supply both raw and finished products, as we have in-house milling machines and tools for checking for leaks in water and helium. Our technology allows us to achieve excellent technical and finishing characteristics compared to sand casting with significant advantages in terms of price. The size of the products we are able to produce exceeds even 100 kg in weight.

MA.BO.

Small high-precision mechanical parts. Turning and Grinding

🏠 Via Martiri di Cervarolo 6,
42015 Correggio (RE)
☎ +39 0522692144
✉ pierluigi.casadei@mabo-mech.com

Backed by 56 years of experience, MABO is the epitome of excellence in the Small high-precision Mechanical Parts industry. The machinery comprises 60 CNC lathes, grinders, honing and lapping machines for machining from 2 to 50mm diameter bars. The company's business system is produced according to ISO IATF 16949, ISO 9001, ISO 45001, and ISO 14001. A modern company that has never stopped its R&D investments, where the machine tool inventory is regularly innovated, and workplace upgrading is always ongoing. 75 employees, 14 million Euro turnover

MANOMETAL

Turning Company

🏠 Isola Di Sopra 6, 39044
Egna (BZ)

☎ +39 0471812019

✉ manometal@manometal.
com

Manometal is an automatic lathe shop since 1980 and consists of state-of-the-art and innovative manufacturing facilities. Manometal is your partner when it comes to sophisticated turned parts and assemblies made of brass and drinking water alloys, lead-free alloys, Ecobrass, stainless steel, as well as aluminum and free-cutting steel. High customer satisfaction, high-quality and high-precision products, compliance with all relevant legal requirements and the continuous improvement of product quality, our environmental performance and occupational safety are our goals.

MEC-2

Mec-2 Srl - Precision Machining

🏠 Via Mons. Oscar Romero,57
33038 San Daniele del Friuli
(UD)

☎ +39 0427 808061

✉ info@mec2srl.com

🌐 www.mec2srl.com

MEC-2 srl is specialized in the production of parts for machine tools and equipment in general; construction and assembly of equipment for the steel industry; manufacture of spare parts for rolling lines and heating furnaces; assembly of small and medium-sized components. We are able to supply heat treatments and surface treatments. We are also part of Steel Mech Group, a network of competencies for the mechanical and manufacturing sector. Learn more about us in our website: www.mec2srl.com.

MECCANICA RIZZELLO

Turning and milling of mechanical components

- 🏠 Via Miggianno s.n.c. | 73056 Taurisano (LE)
- ☎ +39 0833 622527
- ✉ commerciale@mecrizzello.it

From over 40 years Meccanica Rizzello Srl is specialist in turning and milling using sophisticated high-tech CNC-machines, transfer machines and multi spindle lathes. Production includes hydraulic parts, fittings, blocks, flanges, bushings, spacers, bolts, valve caps of different kind of steel. We work exclusively as subcontractor and we produce high-quality mechanical components according to customers' drawing. ISO9001 and IATF16949 certified. We got Quality Control-Room equipped with many devices.

OFFICINE ARFINO

Precision Turning Technology and Metal Component Manufacturing

- 🏠 Via C. Musati, 3 | z.i. Roccapietra - Varallo (VC)
- ☎ +39 0163 52465
- ✉ info@arfino.it
- 🌐 www.officinearfino.it

Officine Arfino has over 50 years of expertise in producing high-quality turned and milled components for plumbing, HVAC+R, sanitary fittings, and precision mechanics. ISO 9001 certified, we invest in innovation and sustainability, with strong focus on lead-free materials that meet strict international safety and environmental standards. Our skilled team and flexible production ensure reliable, tailor-made solutions.

P.M.

High precision machining

🏠 Via Pietro Miani 14
Marano sul Panaro (MO)
☎ 0599772700
✉ info@pm-spa.it
🌐 <https://www.pm-spa.it/>

PM Spa is an high performance machining company founded in 1976.

Our main field of manufacturing are related to: automotive (main market), hydraulic, motorcycling, marine, electric (also in solar power and energy power).

We are currently certificated as IATF 16949:2016, 9001:2015 14001:2015.

Now we are near to 170 employees, and we are specialised in the machining of different kind of material as cast iron, aluminium (high pressure, gravity, low pressure), steel and also brass.

PRIMAMEC

Precision-turned components manufactured to customer drawings.

🏠 Via Marzabotto 77 | 40050
Funò di Argelato (BO)
☎ +39 0516646894
✉ info@primamec.com
🌐 <https://primamec.com>

Primamec specializes in precision-turned components made to customer drawings, mainly for the automotive and hydraulic sectors. It partners with multinational groups and Italian companies supplying systems to OEMs, ensuring high quality, flexibility, and efficiency. The target market includes automotive, hydraulic systems, valves, pumps, and motors. Exports account for 25% of total sales.

RETTIFICA NORD

Grinding and manufacturing of precision mechanical components

🏠 Via Francia 5 | 35010
Vigonza (PD)
☎ +39 3310498930194
✉ export@rettificanord.com
🌐 www.rettificanord.com

We grind and manufacture mechanical components since 1981. Our facilities house 48 grinding machine, handling components from just 4mm up to 5.000mm in length and 2.000mm in diameter. Together with our sister company, offering heat treatment services, we can manufacture components based on your drawings and manage complex machining, coatings and surface treatments, as well as dimensional and Non Destructive testing and certification. We can manufacture parts with a precision of up to 0,001mm.

RETTIFICA NORD
MECCANICA DI PRECISIONE

RETTIFICA TERRENI

Precision mechanical grinding

🏠 Via Dell'Industria 8 | 26020
Cappella Cantone (CR)
☎ 0374373366
✉ info@rettificaterreni.it

Rettifica Terreni is a dynamic company with a lot of experience in the field of precision mechanical grinding. Today the company is able to provide various types of processing, on materials such as steels, hard metal and ceramics. Rettifica Terreni works from internal to external grinding on centers and centerless, from tangential grinding to radius grinding, from complete special grinding of ceramic details with machinery and diamond tools exclusively dedicated to sphere grinding, in addition to lapping, to balancing and laser marking.

SED

Motor Controllers for Electrification of Industrial Vehicles and Machines

🏠 Via delle Regioni 265,
50052 Certaldo (FI)

☎ +390571664012

✉ info@sedgroup.it

For over 50 years, SED has been designing and producing motor controllers and custom power electronics for OEMs.

Our Made-in-Italy solutions - from inverters to operator displays - deliver proven quality and reliability to thousands of users worldwide. With in-house hardware & software R&D and state-of-the-art SMT assembly lines, we act as a full 360° Original Design Manufacturer and a trusted engineering partner for OEMs across diverse industries.

SILTER

Lsr and thermoplastics injection moulding

🏠 Via Tagliamento 37/39,
Mellaredo di Pianiga (VE)

☎ +39 (0)41 468724

✉ backoffice@silter.it

🌐 www.silter.it

Silter is a manufacturer of custom components in LSR silicone and thermoplastics. Main reference markets: industrial, household appliances, automotive, food and medical grade components. We have also a strong know-how about overmoulding (connectors, electronic parts, aesthetic parts, medical parts): Silicone+Metal, Silicone+Plastic (PA-PC-PBT), Silicone+Glass, Silicone+Plastic+Glass, Plastic+Metal.

The company is certified Moca, ISO 9001, 14001, 45001 and 15593.

SMZ ITALIA

High frequency spindles production and all spindle brands repair for machine tools

🏠 Via Brandizzo 184-186 |
10088 Volpiano (TO)
☎ +39 011 995 35 34
✉ smz@mylspindles.com

WE FIX YOUR PROBLEMS: In 30 years of experience we have repaired over 25.000 spindles. WE REPAIR MULTI BRAND SPINDLES FOR: Milling-Grinding-Turning with high quality, competitive prices, fast delivery, 12 months guarantee.

DESIGN AND PRODUCTION OF NEW BELT DRIVEN AND HIGH FREQUENCY SPINDLES: We design and build reliable spindles for grinding/milling machines under catalogue or on demand for special application. We redesign and rebuild spare spindles out of production. We manufacture and adapt any spindle on the market.

MYL SPINDLES GROUP

TEN-FLUID

Italian Excellence in Rubber Sealing Components

☎ +39 035926363
✉ livia.bergomi@ten-fluid.it
contatto@ten-fluid.it
🌐 <https://www.ten-fluid.it/>

Founded in the 1980s in Vil-longo, Italy, Ten-Fluid manufactures high-performance sealing components in elastomers and thermoplastics.

From O-rings to custom parts, we manage every step in-house, ensuring full traceability, a tailor-made approach and 100% Italian quality. With over 165 million parts yearly across 7,000+ types, we serve industries like Automotive, HVAC, Pneumatics, Hydraulics, Oil&Gas, and Other, meeting global standards with efficient, durable, and sustainable solutions.

T.M.G.

Subcontracting of turned and milled parts

🏠 Via Ing. Bertolaso 146
37040 Zimella (VR)

☎ +390442412271

✉ commerciale@meccanicatmg.it

Since 1996, T.M.G. produces high-quality turned and milled parts and is ISO 9001 certified. Our fleet includes sliding headstock lathes, fixed-head and manual-loading multi-axis lathes, and CNC mills. Parts range from Ø3 to Ø250, batches from 100 to 20,000 pieces. Materials include steels, iron, stainless steel, cast iron, aluminium, brass, and plastics. We serve automation, food, industrial, hydraulics, automotive, agriculture, refrigeration, and plumbing sectors.
