## WELCOME

Dear visitors,

It is with great pleasure that I would like to welcome you at Heimtextil 2024 in Frankfurt am Main - the most important international trade fair for home textiles and contract sectors worldwide.

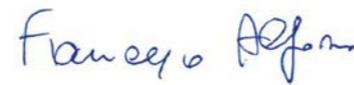

This year, the Italian Trade Agency will participate with a delegation of 29 Italian exhibitors, who will exhibit through ITA in Halls 4.2, 3.0, 11.0 and 12.0. With their innovations in the fields of interior design, architecture and the hospitality industry, they will provide information about their products, emphasizing the creative flair of the land of fashion. The gold exhibitors come from the sectors of textile design, decorative and furnishing fabrics, fine living, bathroom fashion and smart bedding.

The textile sector in Italy experienced a golden year in 2022: according to estimates by Centro Confindustria, it ended the year with a turnover of around EUR 8.1 billion, a growth of 32.4% in 2022 compared to 2021. Exports rose to almost EUR 4.6 billion, an increase of 31.9%. A particular increase was recorded in the processing of wool, leading the textile sector produced in Italy, followed by knitwear and cotton fabrics. The sector's trade surplus grew by approximately EUR 400 million to EUR 2,190 million compared to 2021.

We would be delighted if you would use our presence at Heimtextil 2024 as a starting point to know more about Italy's home textiles industry, beginning with the companies of our delegation.

In renewing my wishes for a successful participation at Heimtextil 2024 and fruitful new business prospects, I would like to remind you that our Berlin Office is at your disposal for any required information and assistance.

Warmest wishes,

Francesco Alfonsi  
Director

Tessilivari is the association that since 1945 has represented companies in numerous sectors and product areas operating in the Italian textile industry, from details for the fashion industry to textiles for technical use, from curtains to furnishing fabrics, and from automotive to construction and medical textiles.

Tessilivari was chosen by the best Italian companies in the textile industry, true examples of Made-in-Italy excellence, turning out products with a global reputation for quality day after day.

Tessilivari is the association that brings together small and medium enterprises at every level of the production chain that work hard every day to continue to produce and generate wealth.

Tessilivari is a member of Confapi - Italian Confederation of Small and Medium Private Enterprises – representing its member companies before national and international institutions and trade unions and providing them with services and assistance in dealing with any industrial and trade policy issues.

Tessilivari has developed a "textile and apparel supply chain portal", which is available on the front page of the [www.tessilivari.it](http://www.tessilivari.it) website, where all companies in the textile supply chain can be found by product type.

Tessilivari promotes and supports Made-in-Italy production by providing services and facilitating the actions of consortia and business groups, including: the Consorzio Promozione Tendaggio Italiano, the most interesting expression of Italian curtain fabric production and promoter of the PROPOSTE trade show ([www.consorziotendaggio.it](http://www.consorziotendaggio.it)).

Tessilivari is among the promoters of Moda In, an international trade show that aims to promote Italian and European textile products around the world.

Experienced weavers and specialized technicians work daily to meet the needs of customers, finding the most suitable solutions to meet even for the most complex production needs. The strength of our sector lies in the dyeing department, which can realize dyeing both on skein machines and on continuous machines. Our systems allow us to dye even minimal quantities not only in the colours shown in the catalogue but also in specific colours requested by customers. In addition to weaving, the company has a department dedicated to the processing of bias ribbons, that expands the existing range to the production of profiles, ruffles, gallons and pleats. Great attention is paid to the creation of prints, hot impressions, aesthetic and technical finishes and in particular to the compacting that allows to give stability even to the less treatable, stiff and elastic fabrics.
