Innovative Sealing Solutions

ATP's experience in more than 25 years of work in the naval sector allows us to design thermoplastic, plastic and elastomeric solutions for both shipyards and storage and shipboard requirements. In particular, our wedges facilitate keel blocking of ships and yachts, allowing the operator to obtain precise adjustments in relation to the height of the hull during the various phases of the maintenance process.

Our plastic screw heels can substitute the traditional wooden block, ensuring the safety of the workers in the shipyard.

BATTOCCHIO SRL

State-of-the-Art CNC Machining Centres and Lathes
Robotic Cells and Coordinate Measuring Machines (CMMs).
Advanced CAD/CAM Software
Maximum Precision and Quality

We are a company with over 35 years of experience in the field of Precision Mechanics and we supply components for High-Tech applications. Our reliability and expertise have been ISO 9001 and ISO 14001 certified thus ensuring quality, safety, and sustainability throughout the entire manufacturing cycle.

We offer a tailor-made approach to our Customers: built around their real needs. We cooperate with EU market-leading companies in order to provide custom-made solutions and precision mechanical components that will become the core of the most advanced and high-performance applications.

We are the ideal partner for international firms operating in highly specialized sectors.

Flexibility – Know How – Precision

Our manufacturing activity is located on a 2400 square meter building. Our CNC-Milling Department counts 20 CNC Vertical Machining Centres with 3 Robotic Islands, while our CNC-Lathing Department has 10 CNC-Lathes: six for bar machining up to Ø 80 mm and four for secondary machining on larger diameters up to Ø 280 mm. Since we started in 1990, we have been constantly investing in new manufacturing technologies.

We have always been environmentally friendly: our plant is equipped with a photovoltaic system that enables our company to keep an excellent level of eco-sustainability. We strictly follow the Regional Guidelines concerning the separate waste collection program and comply with all the environmental regulations according to EU Standards.

93.000 sq total area / 58.000 sq covered area / 177.658 mln company turnover / 3 abroad branches / 1500 customers in the world / 400 human resources

Since 1970, Raccordierie Metalliche is a leading manufacturer in the European civil & industrial plumbing sector landscape. Since 2014 we are present in the shipbuilding sector and the only one in the market being in a position to offer pressfitting systems, steel wastewater systems, welding fittings, threaded fittings and fastenings systems, at the same time.

Every day, more than 400 employees are committed to fulfil Raccordierie Metalliche's mission.

"We constantly offer innovative solutions in terms of both product and process and take the use of pressfitting systems into particular consideration; these solutions allow fitters to work rapidly, safely and suitably." (Pier Luigi CECCARDI, Founder and President of Raccordierie Metalliche).
