

DAR IBN KHALDOUN FOR TRANSLATION

***Your satisfaction is our
motivation for success!***

Translation Service

Dar Ibn Khaldun for Translation is proud to meet virtually any authorized translation need that our customers may have. Whether your task involves simple daily translation or more complex material, you can be confident that your document will be translated in a timely and professional manner.

Other agencies offering translation services may promise you a similar level of quality and professionalism, but Dar Ibn Khaldun for Translation has a proven track record of working with documents in several fields such as legal, medical, technical, commercial, industrial and engineering. Your business cannot settle for a second-rate translation when working with such important documents, thus to prevent poor translation we go above and beyond to ensure only the most qualified and certified translation specialists are assigned to your project.

While our highly skilled and certified translation experts are prepared to handle even the most complex documents, these seasoned professionals bring their authorized translation services to more casual documents such as articles, brochures and certificates.

Today, our enterprise proudly occupies a prominent position in the language solutions' market locally and regionally; with over 300 regular and satisfied clients that range from SMEs and large corporations, to international organizations and government agencies, and our development goals extend beyond that to a more globalized domain.

We serve our clients by offering 24/7 support for each and every project, as our certified translation specialists in Jordan are always available to provide status updates and answer any questions that the client might have.

Interpretation Service

To convey the meaning of our spoken language in another while preserving the semantic and lexical values of both source and target languages; we provide the top effective and competitively-priced interpretation services including consecutive and simultaneous interpretation. We have the necessary top trained and certified interpreters and high-tech equipment to provide highly professional interpretations in almost any event; as our services can accommodate small settings, such as ones used for legal depositions or negotiations, or large and small conferences while ensuring multilingual audiences and/or speakers being able to communicate effectively across many languages.

Our interpreters are specifically trained in consecutive interpretations as it is important not to lose key elements while the speaker finishes the phrase or segment. Our team is also trained in simultaneous interpretations as it requires a specific skill set to translate real-time communications.

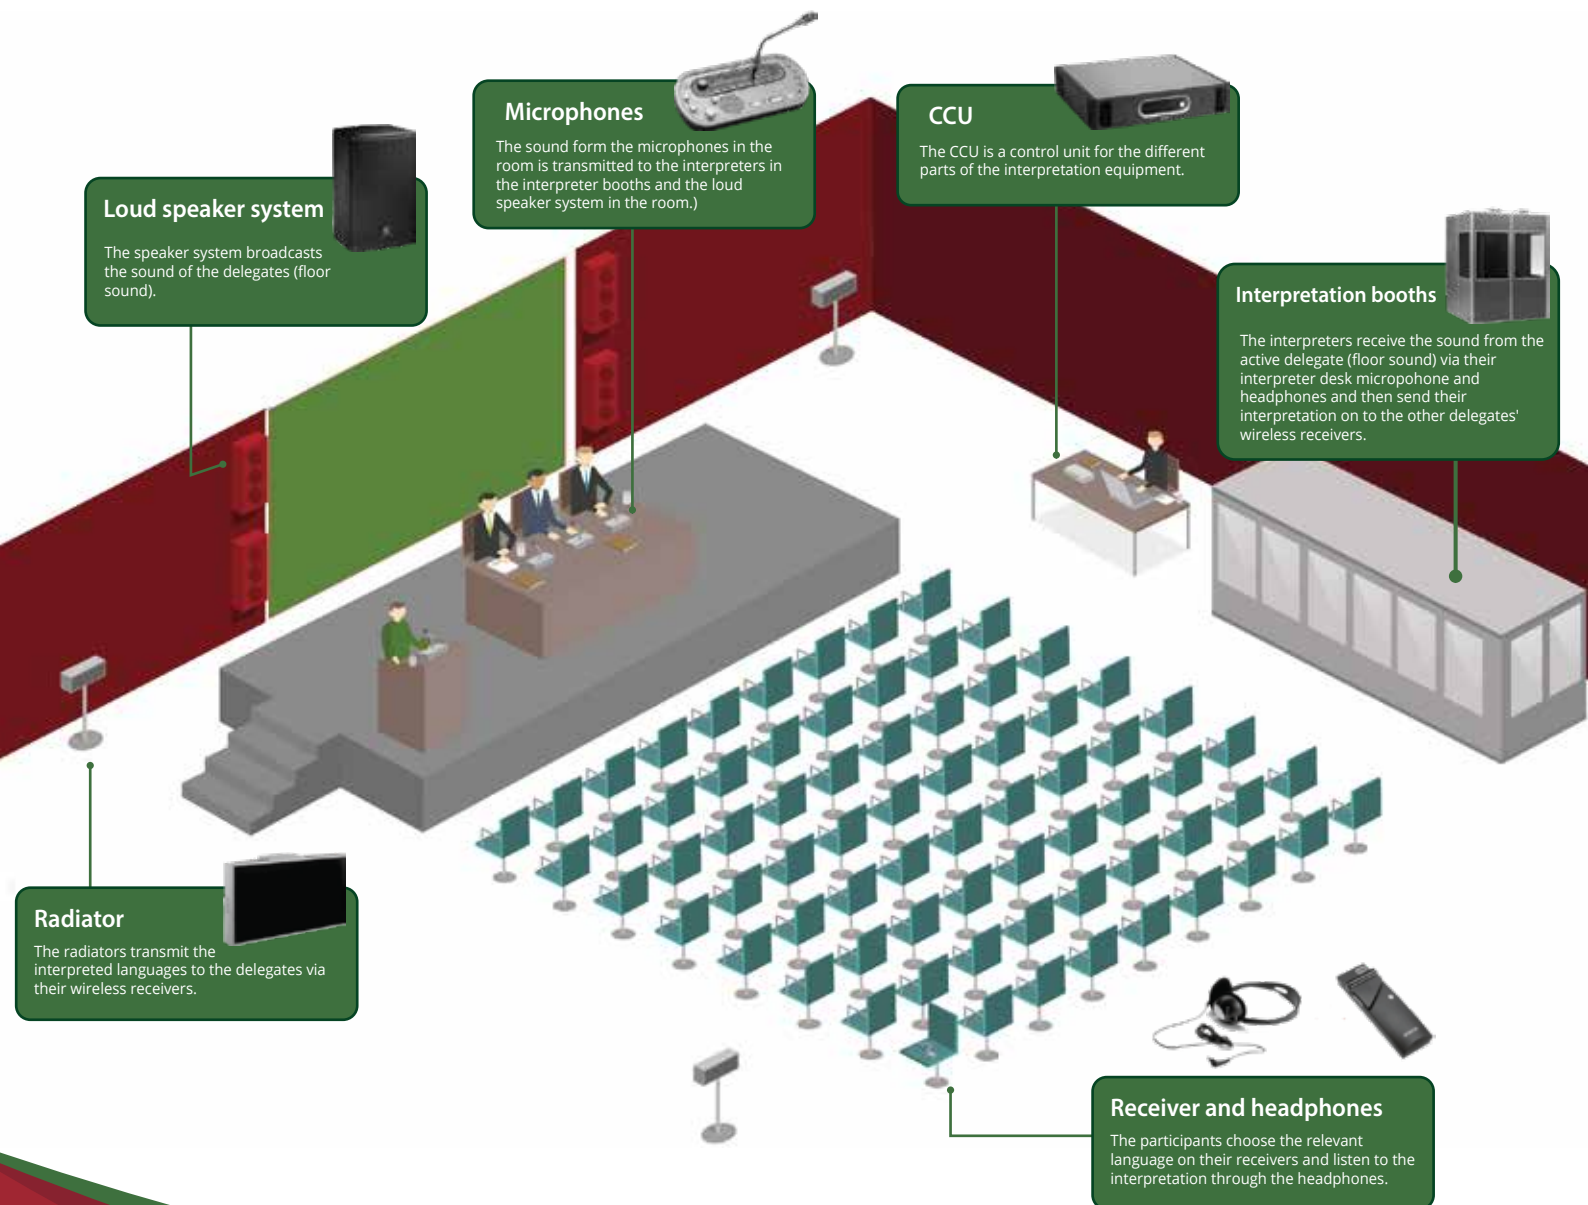

Interpretation Equipment

We take the difficult task of interpretation off your shoulders and provide a complete turn-key solution! We help you design the best system for your meeting, select interpreters with the right experience, and provide you with the staff needed for assembling, operating and dismantling equipment.

For multilingual conferences, where participants' understanding is critical to the success of the event; interpretation systems enable interpreters to render simultaneously the speaker's speech into another language, and distribute the interpreted speech to event attendees who will select and listen to their language of choice.

Our interpretation solutions provide digital audio quality meeting the highest industry standards, offering seamless and effective multilingual communication at your event regardless of size or location.

Interpretation System Components

Special equipment
