30. June - 01. July 2026

Berlin Hall 4.2

Stand 07 & B60

VISIT ITALY AT GITEX EUROPE 2026

IDEAS. INNOVATION. IMPACT.

Dear visitors,

It is my great pleasure to welcome you to the **Italian Pavilion** at **GITEX Europe 2026**, Europe's leading cross-sector event for technology and startups.

Following the success of last year's edition, the Italian Trade Agency is proud to renew its participation at GITEX Europe with an even stronger presence, showcasing more than twice the number of Italian startups presenting their ideas, innovation and technologies.

This year, Italy will be represented across two dedicated areas in **Hall 4.2**: our institutional area at **Booth 07**, and a larger startup showcase area at **Booth B60**, featuring 26 outstanding Italian companies and their cutting-edge products, services and technologies.

Rooted in a rich heritage of creativity, innovation and design, the Italian startup ecosystem continues to bring forward bold and forward-thinking solutions that represent **the very best of Made in Italy**. We are confident that the ingenuity, technological excellence and entrepreneurial spirit of our participating startups will capture your attention, inspire new ideas and create meaningful opportunities for collaboration.

We wish you a successful and inspiring experience at **GITEX Europe 2026**, and fruitful opportunities for collaboration and growth.

Should you need any further information or assistance, please do not hesitate to contact our Berlin Office or visit our team at **Booth 07 and Booth B60, Hall 4.2**.

Yours Sincerely,

Ferdinando Fiore

*Director Berlin Office
Italian Trade Agency*

ITA - Italian Trade Agency is the Governmental Agency which supports the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy. The Italian Trade Agency operates under the authority and supervision of the Ministry of Foreign Affairs and International Cooperation (MAECI).

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

The Italian Trade Agency offers a wide range of initiatives in Italy and worldwide, such as participation in trade fairs, workshops and business delegations, in cooperation with public and private entities and organizations, both in Italy and abroad.

07-2

PIEMONTE AGENCY

Contact: Rosanna Viola
Email: digital@centroestero.org
www.centroestero.org/en

Piemonte Agency is the reference point supporting SMEs in their internationalization process and acting as a one-stop-shop for foreign companies seeking investment opportunities or qualified partners in Piemonte, North-West Italy. Through the ICT Integrated Supply Chain Project, the Agency connects international businesses with highly skilled and qualified companies operating across several industrial sectors. Piemonte region is home to important companies, research centres, universities and top national and international key players: this is a highly competitive hub supplying an extensive offer, guarantee of flexibility, quality and reliability.

The variety of solutions provided covers all segments of the regional manufacture constantly developing new ideas and products according to the latest markets trends in the following fields: automotive & transportation, industrial automation, aerospace, energy, building, energy efficiency, domoethics, digital health, agrifood, oil & gas, banking & finance, retail, e-commerce, ERP, cinema and audiovisual.

**B60-1
AI4IV SRL**

Contact: Fabio Gallo
Email: info@ai4iv.com
www.ai4iv.com

AI4IV is a European deep-tech company redefining machine vision for the era of Physical AI. Inspired by the extraordinary capabilities of biological vision, its proprietary FlyEye™ technology enables machines to perceive the world with unprecedented reliability under extreme lighting conditions.

Unlike conventional cameras, which struggle with glare, reflections, deep shadows, and rapidly changing illumination, FlyEye™ sensors capture clear, artifact-free visual information in a single shot, without the motion artifacts and image distortions often introduced by traditional HDR approaches.

By delivering accurate visual data directly at the source, AI4IV enables AI-powered systems to make faster and more reliable decisions in real-world environments. The technology is designed for next-generation robotics, autonomous systems, industrial automation, smart infrastructure, intelligent mobility, drones, and other Physical AI applications where perception quality is critical.

AI4IV's long-term vision extends beyond sensing. The company is developing a new generation of bio-inspired edge intelligence architectures that tightly integrate perception and AI processing, enabling more efficient, responsive, and autonomous machines.

ASYMMETRICA
SMART INNOVATION FOR FUTURE

**B60-3
ASYMMETRICA S.R.L.**

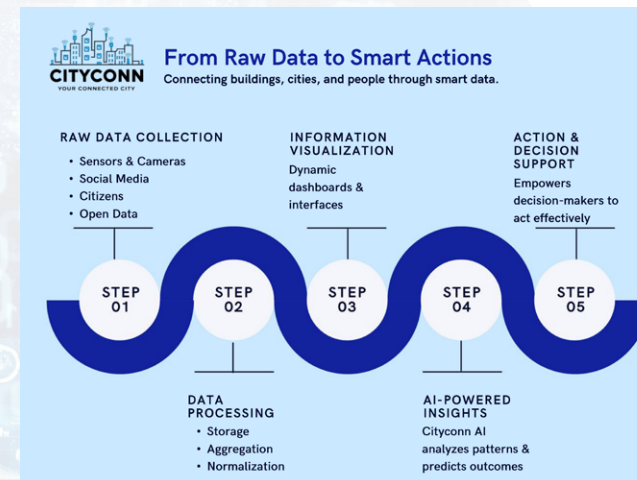

Contact: Capani Marco
Email: capani.m@asymmetrica.it
www.asymmetrica.it

Asymmetrica is a technology company that develops intelligent platforms and solutions to transform urban and complex-system data into decision-making tools. We help cities, public institutions and organizations move from fragmented information to real-time awareness, predictive analysis and data-driven action.

Our approach connects the physical and digital worlds. The Smart Urban Box collects signals from the territory, including environmental, mobility, infrastructure and social data. CityCon connects, organizes and interprets these data flows, transforming them into useful information. The Digital Twin turns them into a living representation of the city, where it becomes possible to observe, understand, predict and simulate different scenarios.

Through sensors, public data, artificial intelligence, interoperability and simulation models, Asymmetrica enables smarter governance, more efficient services and better decisions for sustainable, resilient and human-centered ecosystems.

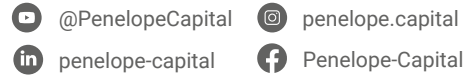

Think like a PRO. Invest with AI.

**B60-4
BXT SRL**

Contact: Mauro Carosso
Email: info@bxt.ai
www.penelope.capital

Penelope is an AI-native, hedge-fund-grade market intelligence platform built to power modern investing experiences.

Running on proprietary AI models—not legacy tools—it delivers short-term market forecasts and standardized signals across equities, forex, commodities, and crypto through a simple, intuitive interface.

Designed around Gen Z expectations for clarity, speed, and transparency, Penelope helps brokerages and digital financial institutions boost engagement, reduce churn, and build sticky daily habits.

For Family Offices and professional investment teams, it acts as an always-on tactical layer: surfacing cross-asset opportunities, highlighting market regimes and key drivers, and supporting faster, more consistent decision-making with explainable insights and performance dashboards.

**B60-6
CHECKSIG**

Contact: Concetta Ingrassia
Email: marketing@checksig.com
www.checksig.com

CheckSig is an Italian fintech company offering a regulated infrastructure for crypto-asset custody and trading. We enable banks, financial institutions, and intermediaries to securely offer digital asset services through a scalable and compliant platform. Our proprietary technology, backed by patented security solutions, ensures safe custody, transaction control, and seamless integration with traditional financial systems.

In May 2026, CheckSig became the first crypto company in Italy to obtain the MiCAR license, enabling expansion across Europe. Backed by a €3.5M Series A extension, we are scaling to become a leading infrastructure provider for institutional crypto adoption.

LECS®

Powered by Cyber Evolution

B60-7 CYBER EVOLUTION - LECS

Contact: Marco Camerinesi
Email: marco.camerinesi@cyberevolution.it
www.lecs.io

-  lecs-security
-  lecs_security

Cyber Evolution is an innovative Italian SME that develops LECS, a patented Made in Italy Plug&Play NDR technology designed to protect IT, OT and IoT environments. Built to simplify cybersecurity, LECS delivers real-time network visibility, autonomous threat detection and automated response without complex configuration or long deployment times, just 10 minutes! Its AI-driven (but not only) and proprietary engines analyze internal traffic, reduce false positives by 87% and support security teams by acting before anomalies become incidents. LECS integrates with SOC and SIEM platforms, supporting proactive protection, operational continuity and clear reporting. LECS is also suitable for OEM and embedded applications. Available in scalable hardware and virtual versions, it serves SMEs, corporate environments, industrial networks, multi-site infrastructures, critical contexts and governments. Active through distributors in 24 countries, Cyber Evolution brings compliant, security-by-design European cybersecurity to the global market.

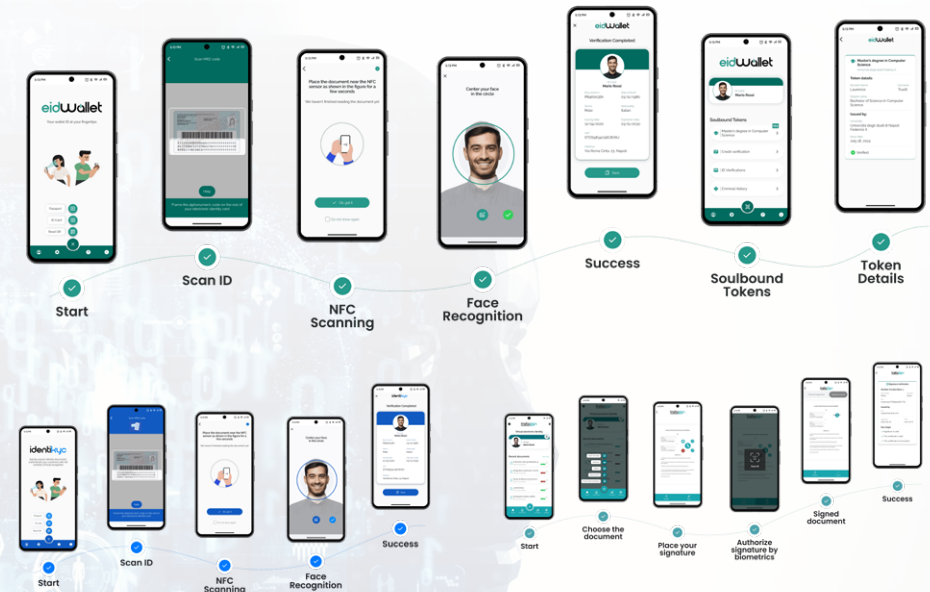

Cyberneid

B60-8 CYBERNEID SRL

Contact: Ugo Chirico
Email: info@cyberneid.com
www.cyberneid.com

-  cyberneid

Cyberneid is an Italian company delivering trust infrastructure for enterprises and public administrations: electronic identity, digital signature, wallets – AI-powered and post-quantum ready. Our solutions combine NFC document verification, biometric KYC (ISO 30107 certified, 186 countries), qualified eIDAS signatures and national eID integration. Flagship products: IdentiKYC, Instasign, Firmo con CIE. Trusted by Zagrebačka banka, Azercell, IPZS, PagoPA and the Swedish Police. 100% Italian technology, full source control. Three-time SMAU Innovation Award winner

B60-9
ERMES CYBER SECURITY SPA

Contact: Alberto Nasi
Email: info@ermes.company
www.ermes.company

Ermes is a European AI-driven Browser Security Platform that protects enterprises where many modern attacks originate: the browser. The platform delivers real-time AI protection, session control, and contextual DLP to stop threats, prevent data leaks, and mitigate GenAI-related risks at every click. Ermes deploys via a lightweight browser extension with no VPN, no proxy and no additional infrastructure, and is trusted by 200+ customers including large enterprises.

B60-10
FIFTH INGENIUM SRLS

Contact: Roberto Mangano
Email: roberto.mangano@fifthingenium.com
www.fifthingenium.com

FifthIngenium is an innovative SME in the field of software development, founded in 2016 and specialized in the use of emerging technologies such as Augmented Reality (AR), Virtual Reality (VR), 5G, IoT, and Artificial Intelligence (AI).

Our mission is to support companies in solving operational challenges by leveraging advanced technologies to increase production efficiency and drive the technological evolution of processes.

FifthIngenium operates in the Industry 4.0 sector with clients in Italy and over 20 countries worldwide, collaborating with commercial and technology partners such as Vodafone, Fastweb, Politecnico di Milano, ESA, Microsoft, and others.

The company has a multidisciplinary team of about 30 professionals, including engineers, designers, and developers.

Within the industrial market, FifthIngenium provides software and hardware solutions that enable digital transformation, integrating IoT technologies for remote monitoring of industrial machinery, augmented reality remote assistance systems, and immersive AR/VR training platforms.

In addition, the company develops advanced Computer Vision and AI solutions for automatic object and defect recognition, quality control, and production process optimization, as well as technologies for 3D reconstruction of environments and products to support digital twins, simulation, and advanced maintenance.

Key clients operate in the manufacturing sector, including food, automotive, and machinery production, with active projects in Italy, the United States, Europe, Asia, and the Middle East.

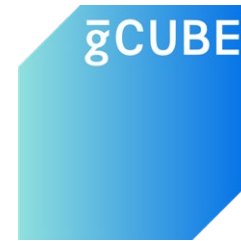

B60-11
GANIGA INNOVATION SRL

Contact: Nicolas Zeoli
Email: n.zeoli@ganiga.it
www.ganiga.ai/en

Ganiga is an Italian deep-tech startup developing AI- and robotics-driven solutions to transform waste management. Through proprietary smart bins like Hooly, the company enables real-time waste recognition, automated sorting, and data analysis, turning each disposal point into a source of actionable environmental insights. Its technology supports companies, infrastructures, and cities in reducing operational costs and emissions, improving recycling quality, and enhancing user engagement. By combining hardware, software, and data, Ganiga helps organizations meet sustainability targets and advance their ESG strategies, while creating smarter, more efficient, and more responsible environments.

B60-12
GCUBE

Contact: Giacomo Paolozzi
Email: info@gcube.digital
www.gcube.digital

gCube transforms cultural heritage with cutting-edge digital solutions. Through augmented reality, 360° virtual tours, and immersive platforms, we create accessible, barrier-free experiences that enhance tourism and engagement. Our mission is to make cultural sites more attractive and interactive, driving digital sustainability with ethical responsibility.

gCube operates primarily in the B2B sector, targeting: public institutions, cultural organizations, tourism companies, and brands seeking innovative digital experiences to enhance visitor engagement and promote heritage accessibility.

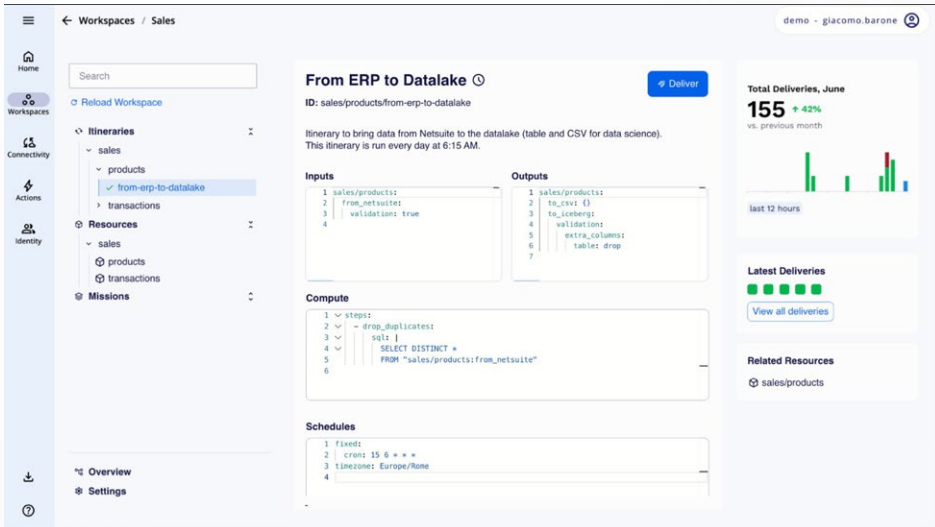

B60-13
HIOP SRL

Contact: Vincenzo Marino –
Email: hello@hiop.io
www.hiop.io

Hiop is a data integration platform that lets teams connect, organize, and unify data from any source – without building or maintaining complex infrastructure. Business logic is defined in simple and versioned configuration files, and deployed as self-adapting data pipelines. Orchestration, quality checks, and lineage are built in. The result: a single, coherent view of your data, always in sync with how your business actually works.

B60-14
HUMANS SRL

Contact: Vincenzo Ruffa
Email: welcome@humans.tech
www.humans.tech/en

Humans.tech is an Italian tech company that develops custom software and AI solutions for businesses seeking measurable impact.

We write end-to-end code, from discovery to production, with high-caliber engineering teams experienced in building complex, data-driven, AI-native products.

We operate 70% globally in the United States and have launched over 700 digital products, contributing to the growth of multinational players.

What sets us apart is that we always start from business KPIs: conversions, costs, efficiency. Tech is our means, Humans our purpose.

We are a partner that builds software that works, scales, and creates measurable value.

B60-16
INCOMEDIA SRL

Contact: Federico Ranfagni
Email: info@incomedia.eu
www.websitex5.com/en

Incomedia is a leading software company specializing in website and e-commerce creation solutions. Our flagship product, WebSite X5, is an all-in-one platform that empowers businesses, entrepreneurs, and creatives to build professional, responsive websites and online stores with ease—no coding required. Chosen by over 2 million users worldwide, WebSite X5 offers intuitive drag-and-drop tools, customizable templates, and built-in SEO, security, and marketing features to help users grow their online presence.

WebSite X5 is the leading software for creating websites and e-commerce also with AI.

Pay Once. Use it forever | Trusted by 2 Million users

B60-17
INNOVATECH SRL

Contact: Giuseppe Giorgianni
Email: info@innovatech.info
www.innovatech.info

Innovatech is a leading Italian AI company delivering scalable, high-impact solutions for global markets. Our portfolio includes Kelly, the 24/7 multilingual Digital Concierge for tourism, healthcare and shopping malls; Sofia, the AI HR Assistant that improves workforce efficiency; Olivia and CheckMed for next-generation digital health; and Evora, the AI-powered business intelligence platform transforming data into predictive insights and strategic decision-making. Powered by UFLOtA® and driven by the Effective Innovation approach, Innovatech helps organizations reduce costs, enhance customer experience and accelerate digital transformation.

Redefine how tourists explore cities

Kelly is a conversational interface available through interactive totems, smart interfaces and chatbots.

Key Features
This hybrid model combines AI-powered dialogue with urban data intelligence, to provide:

- Conversational interface available in multiple languages
- Real-time flow analysis via connected cameras
- Dynamic, on-demand itinerary generation
- Integration with local events, transport, and weather data
- Smart tour planning with POI recommendations
- Public totems and kiosks across key tourist areas

Train her easily
No technical skills needed: Just upload your files and talk to her.

- I can generate personalized itineraries based on interests, timing, and location
- I can recommend neighborhoods, landmarks, and real time events
- I can optimize routes and visit durations for more meaningful experiences
- I understand and speak any language
- I can integrate with citywide sensors and cameras to analyze visitor flows and suggest alternative routes

B60-15
IOTIQUE

Contact: Samuele Dassatti
Email: hello@iotique.it
www.iotique.it

IoTique is a software company specialized in the design and development of end-to-end IoT platforms. We support hardware manufacturers and enterprises in connecting devices to the cloud, enabling real-time data collection, monitoring, and control. Our solutions are built with a strong focus on scalability, reliability, and security, and we retain full ownership of the source code to ensure maximum flexibility for our clients. By reducing time to market and simplifying complex integrations, IoTique allows companies to turn connected products into robust, data-driven services.

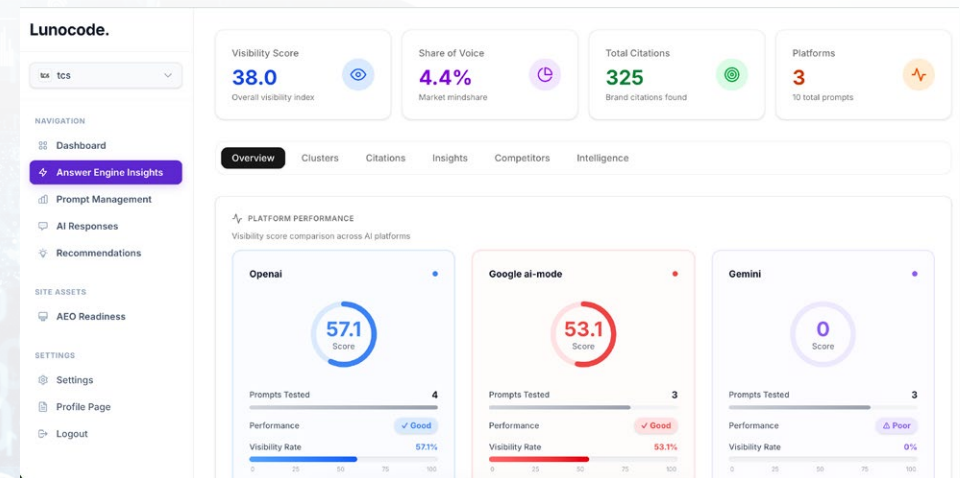

B60-20
LUNOCODE

Contact: Dario De Micheli
Email: business@moonify.it
www.lunocode.eu

Lunocode is a specialized analytical engine for Generative Engine Optimization (GEO), acting as a monitoring suite akin to Semrush for the AI search era. It focuses on auditing brand visibility and tracking real-time citations across Large Language Models like ChatGPT, Gemini, and Perplexity. The platform provides deep data-driven insights into brand share of voice, citation frequency, and sentiment within AI-generated answers. By mapping how LLMs retrieve and present information, Lunocode enables companies to measure their digital authority and identify visibility gaps, offering the technical intelligence required to track and optimize brand presence in the competitive landscape of generative discovery.

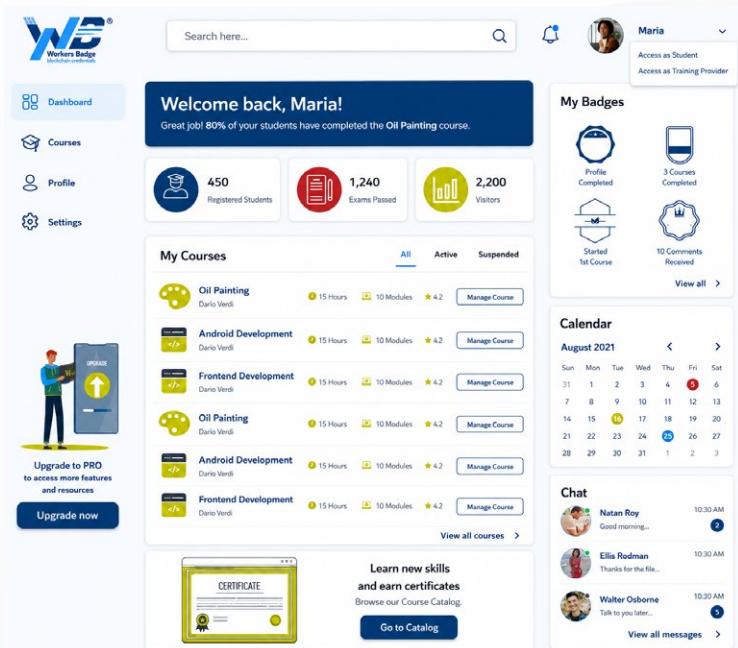

B60-18
MEDITERRANEO LAB 4.0 SRL

Contact: Giampiero Zito
Email: info@mediterraneolab.it
www.mediterraneolab.it

- mediterraneo-lab-4-0
- @mediterraneolab4.0

Mediterraneo Lab 4.0 is an innovation company focused on digital transformation projects, Web3 solutions and blockchain-based credentialing. It supports organizations in digital transformation through expert-led courses, applied research and verified skills systems powered by Workers Badge/Blockchain Credentials platform.

Mediterraneo Lab 4.0 by Workers Badge unifies career and learning credentials in a secure Web3 wallet, using patented technology and blockchain-verified open badges. It delivers instant, trusted skill verification, HR automation, and full EU compliance—offering unmatched transparency and efficiency.

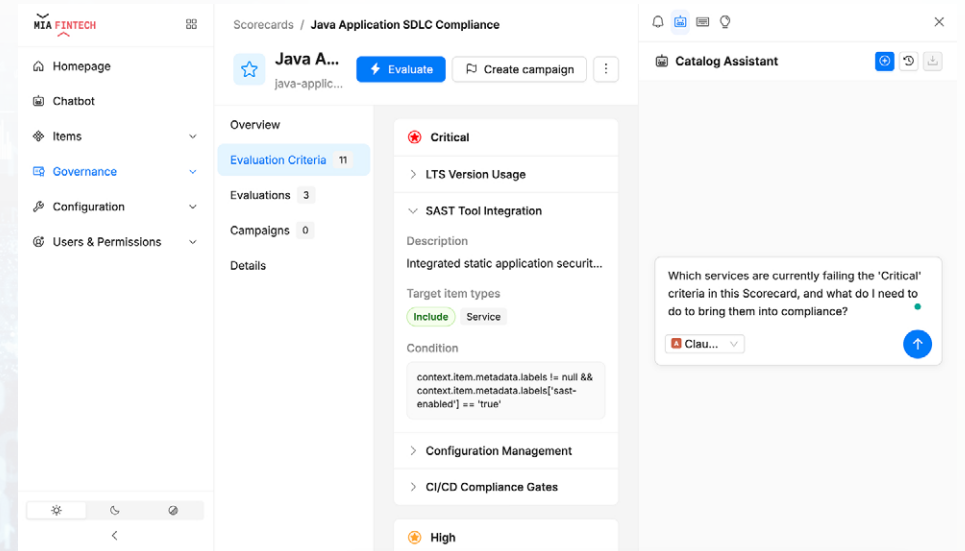

B60-19
MIA-FINTECH SRL

Contact: Bruno Natoli
Email: info@mia-fintech.io
www.mia-fintech.io

- mia-fintech

Mia-FinTech is the fintech startup redefining how regulated digital platforms are built. Its cloud-native suite empowers banks and FinTechs to rapidly develop, launch, and scale future-proof digital financial services – bridging legacy constraints and modern IT demands while ensuring regulatory alignment. Part of the Mia-Platform ecosystem, it delivers an AI-Native Developer Platform combining platform engineering, application composability, and data management at scale.

B60-21
MYMONEY

Contact: Mara Vendramin
Email: mara.vendramin@my-money.it
www.my-money.it

MyMoney is a next-generation biometric identity and payment platform designed to make digital access and transactions safer, faster, and more inclusive. By replacing passwords, cards, and complex onboarding flows with secure biometric authentication, MyMoney helps reduce fraud, identity theft, and account abuse while simplifying the user experience. The platform enables seamless KYC, access control, and payments through a device-agnostic approach that works across industries including fintech, hospitality, healthcare, transport, and retail. Our mission is to make digital payments seamless, secure and accessible for everyone.

B60-22
MYSCORE

Contact: Mauro Cicognini
Email: info@myscore.is
www.myscore.is

mySCORE is a SaaS platform by Rexilience, designed to provide a comprehensive and continuous assessment of an organization's cybersecurity posture, delivering precise insights and actionable remediation guidance.

Our approach is built on three core pillars:

- A structured assessment questionnaire
- A vulnerability assessment
- An Open Source Intelligence (OSINT) component

The platform delivers results within a few hours, both via a web-based dashboard and a downloadable PDF report. It provides full transparency on the assessment scope, highlighting not only identified vulnerabilities but also areas where no issues were detected, and vulnerability remediation in the form of Solution Cards.

To ensure continuous security posture monitoring over time, mySCORE tracks the evolution of vulnerabilities and OSINT results (both remediated issues and newly emerging risks) on a monthly basis.

This functionality is well-suited for organizations seeking to perform self-assessment, as well as for those aiming to monitor the cybersecurity posture of their vendors, making it particularly effective for third-party risk management and supply chain security.

**B60-5
NOTARIFY**

Contact: Federico Monti
Email: office@notarify.io
www.notarify.io/eng

- notarify
- notarify.io

Notarify is an Italian blockchain-based SaaS platform providing digital certification, legally binding e-signatures, and fraud prevention for enterprises. Accelerated by Techstars, awarded Top 200 Fintech Global (CNBC 2023–2024) and Blockchain CEO 2025, Notarify serves 100+ enterprise clients – including Banca Mediolanum, BNP Paribas, Forbes, and GAS Jeans – across finance, healthcare, energy, fashion, and media. With 10M+ notarizations completed and full eIDAS/NIS2/ESPR compliance, Notarify delivers mathematical immutability, tamper-proof traceability, and independent verification.

**B60-23
SNAPALL BY TIMELAPSELAB**

Contact: Damiano Bauce
Email: info@snapall.io
www.snapall.io

- snapall

SnapAll by TimelapseLab is a real-time construction site remote monitoring software based on AI and neural networks, that simplifies the management of construction site development. The platform can be integrated with every existing IP camera connected to the internet, allowing complete and easy project oversight directly from smartphones via a comparing tool of images, automatic timelapses, automatic reports and real-time alerts. Our AI software can detect the number of people, type of vehicles, lack of helmets in the construction sites, it can view the progress of the work schedule automatically and it can blur sensitive data in the images.

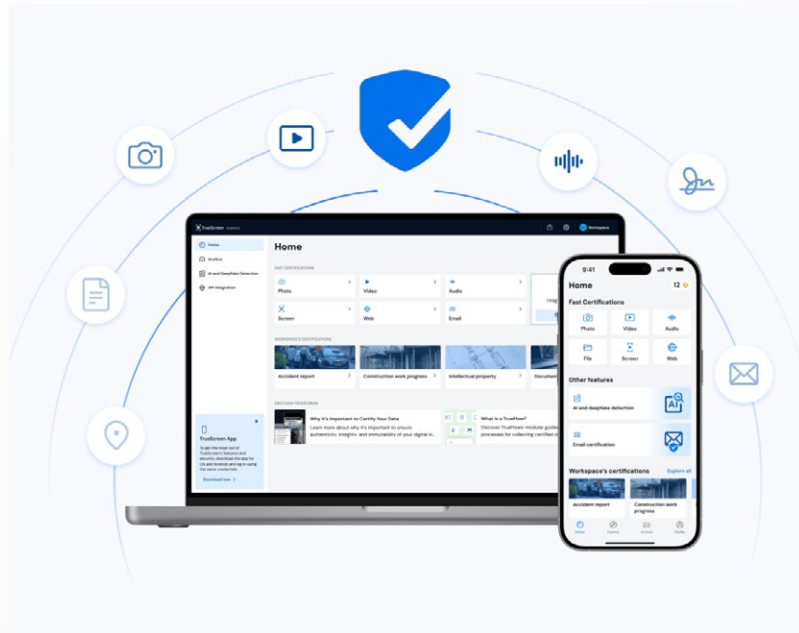

B60-24
TRUESCREEN S.R.L.

Contact: Fabio Ugolini
Email: info@truescreen.app
www.truescreen.io

truescreen-data-authenticity-platform

TrueScreen is the Data Authenticity Platform that enables companies and professionals to ensure the authenticity and reliability of digital information, making critical processes faster, fraud-proof, and compliant with regulations.

Through forensic-grade data capture, verification, and certification, combined with end-to-end provenance, TrueScreen guarantees the authenticity, traceability, and legal validity of digital information throughout its entire lifecycle.

B60-25
WETAXI / WETECHNOLOGY.AI

Contact: Max Curto
Email: info@wetaxi.it
www.wetechonology.ai/en

WeTechnology is a tech company driving urban mobility through an AI-powered multimodal MaaS platform. Built for global scalability, our software seamlessly integrates transit ecosystems for smart cities and corporate partners.

Leveraging our market-proven App "Wetaxi", we are currently in the internationalization phase of our scale-up process. Our platform already powers major transport operators, having surpassed 1M trips in 2025 and reached operational break-even with a 170 % YoY transaction growth.

At GITEX, we showcase how scalable AI infrastructure optimizes urban networks. Connect with us to scale smart mobility globally.
