WELCOME

BENVENUTI!

THE ITALIAN TRADE AGENCY (ICE) AT BAU 2025

Dear visitors,

I would like to welcome you to Munich to BAU 2025, the world's leading trade fair for architecture, materials, and construction systems.

This year, the Italian Trade Agency will participate with a national Pavilion of 23 Italian companies, which will exhibit in Halls A4 and B4. With their innovations in the fields of architecture, construction and building systems, they will provide visitors with information about their products, emphasizing the creative and technical expertise of Italian design. Among the products showcased, there are sustainable building materials, advanced construction technologies and innovative architectural solutions.

The construction sector in Italy experienced a robust year in 2023: according to estimates, it ended the year with a turnover of around 109.4 billion euros, a growth of 2.7% compared to the previous year. Significant growth was recorded in the production of eco-friendly materials and smart building technologies, leading the sector, followed by traditional construction materials and architectural services. The sector's trade surplus grew by approximately 1.2 billion euros compared to the previous year.

BAU 2023 has seen a significant growth, with 190,000 visitors from around 200 nations and 2,260 exhibitors from 49 countries, marking a 10% increase in exhibitor numbers compared to the previous edition. Bau 2025 has set new standards for resilient, climate-friendly construction and resource efficiency.

I would like to invite you to visit the Italian exhibiting companies as a starting point to know more about Italy's construction and architectural industry.

In renewing my wishes for a successful participation at BAU 2025 and fruitful new business prospects, our Berlin Office remains at your disposal for any information and assistance you may require.

Yours sincerely,

Ferdinando Fiore
Director
ITA Berlin Office

ITALIAN TRADE AGENCY

**ICE - Agenzia per la promozione all'estero e
l'internazionalizzazione delle imprese italiane**

A4 115

B4 326-A

ABOUT

The ICE – Italian Trade Agency is the Italian government organization working to develop, facilitate and promote economic and commercial relationships abroad and marketing Italian goods and services internationally. It further promotes the “Made in Italy” image around the world and Italy itself as a destination for foreign investment.

The ICE – Italian Trade Agency operates under the authority and supervision of the Ministry of Foreign Affairs and International Cooperation (MAECI). Through its international presence, alongside the Italian diplomatic network, the ICE – Italian Trade Agency works together with business organizations and other public and private entities to offer coordinated support for businesses and Italian organizations involved in the globalization process.

Rome Headquarters

ICE – Agenzia per la promozione all'estero e
l'internazionalizzazione delle imprese italiane
Via Liszt, 21
00144 Roma/Italy
costruzioni@ice.it
www.ice.it

From its Rome headquarters, with offices in Milan and around the world, the ICE – Italian Trade Agency provides information, assistance and promotion services to businesses and institutions, encouraging cooperation within the industrial, agricultural and agrifood sectors, distribution and tertiary businesses, to expand the presence of Italian companies on international markets. In order to support the Italian industrial and foundry sector the ICE – Italian Trade Agency offers a wide range of initiatives worldwide, such as participation in trade fairs, presentations and bilateral workshops.

In Germany the ICE – Berlin office organizes many promotional events with Italian regions, provinces, manufacturers associations, chambers of commerce, private companies and collective pavilions in international trade fairs.

ABOUT

FINCO - Italian Federation of Industries for Products, Systems and Services for Construction, Maintenance, Mobility and Cultural Assets and Heritage. As Federation Finco is not directly related to firms but to National Associated Organizations of Construction Sector. At the moment it puts together 40 Associations representing, among the others, the following fields: historical and monumental restoration, renewable energies (e.g. biomass, geothermal and hydroelectricity), doors, overhead doors, shutters, roofings, technical curtains, mosquito nets, external and sunscreen protection systems and components, safety harnesses and belts, metal carpentry, fireplaces and stoves for interiors, safety fire systems, fastening tools, sound barriers, scaffoldings, geognosy surveys, accident prevention signs, façades with integrated sunshade systems, metal sheet building piece, solar shields, zenithal systems, curtain wall, aluminium and pvc windows, doors and gates, rolling shutter, loading systems, roofing systems, pluvial and gutters, condominium administration companies, remediation and asbestos removal services, parkland and landscaping companies (realization and maintenance), plant system suppliers, war mine clearance and other services sectors linked to construct. The Federation aims to increase the value and the visibility of each Federated Association. FINCO mainly operates when its action can be more effective than the single Associations operating alone, helping firms to get in touch with the international market.

FINCO operates on behalf of its own Association through:

- parliamentary and Ministerial lobbying for the adoption of laws and decrees in order to help the represented sectors: providing amendments in the general legislative procedures (for example the Financial Law and related measures); following and stimulating the Public Administration work in significant issues (e.g. the Inter-ministerial Decree about the CE marking on the building products);
- coordination and strengthening of the Italian producers of materials, equipment and services inside the construction sector;
- involvement in working groups on Ministerial issues, integrating and strengthening the weight of each Association;
- collaborations with public or private national or international organizations belonging to the building and infrastructural sector;
- organization and management of internal Working Groups to deal with the considerable issues of the Associations;
- supplying the Associations with Counseling Services through experienced subjects in different sectors;
- promotion of events which allow to expand the market of the building materials, services and equipment.

CONFINDUSTRIA MARMOMACCHINE

ASSOCIAZIONE ITALIANA MARMOMACCHINE

ABOUT

The Italian MARMOMACCHINE Association - briefly, CONFINDUSTRIA MARMOMACCHINE - is the Italian Association of Producers and Processors of Marbles, Granites and Natural Stones in general, and of Manufacturers of Machinery, Complete Plants, Tools and Complementary Products to quarry and processing Natural Stones.

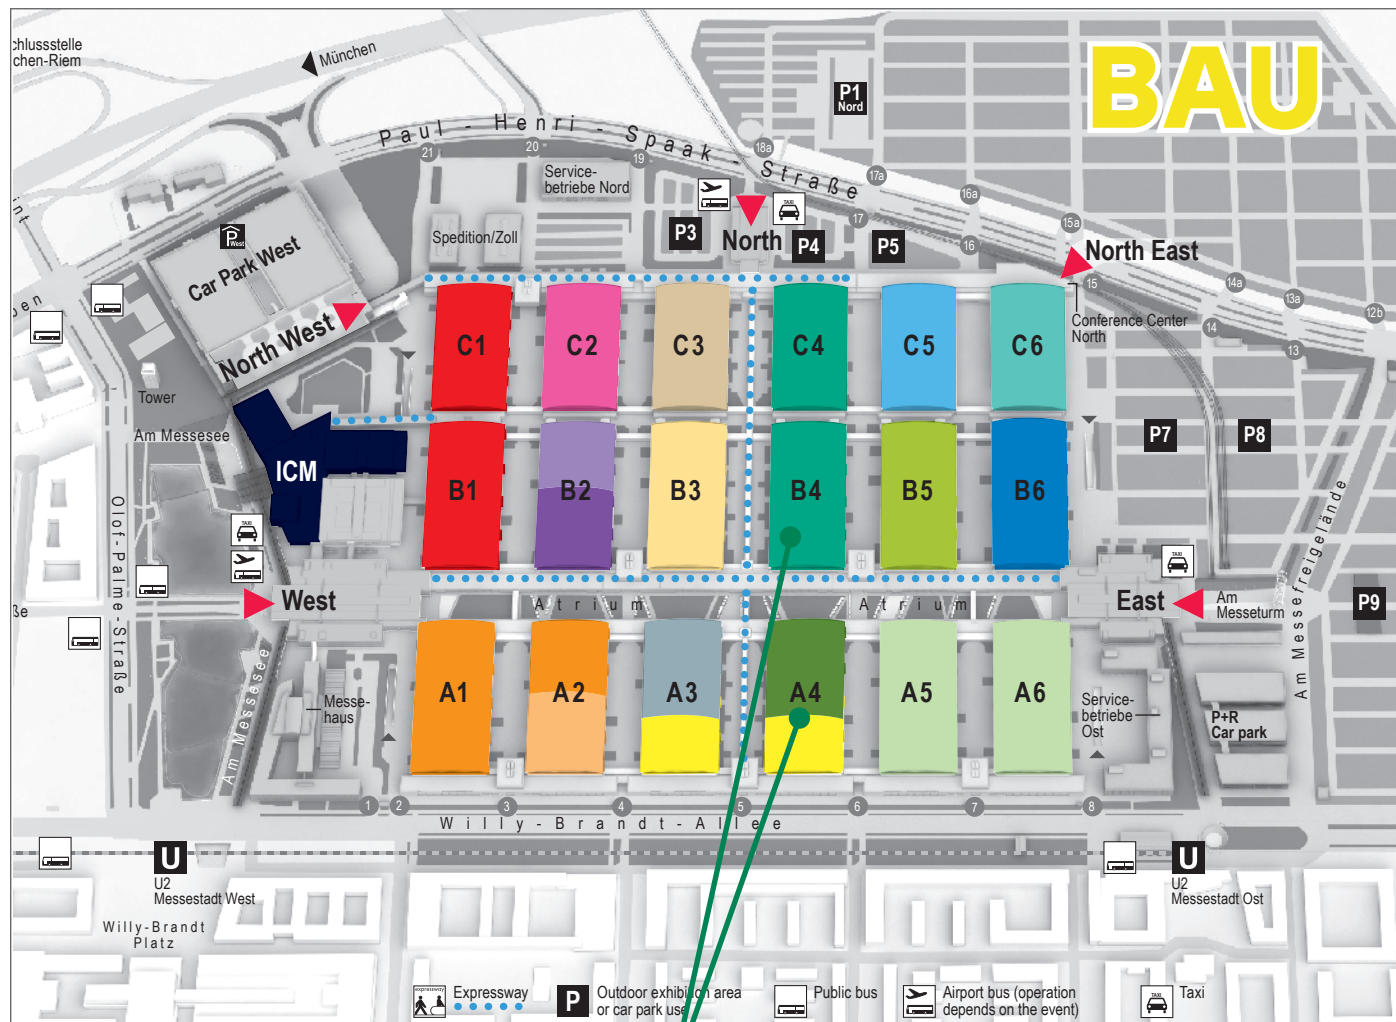

The more than 350 companies and territorial consortia belonging to CONFINDUSTRIA MARMOMACCHINE, located in all the major Italian production districts, guarantee the association broad representation in Italy and worldwide, as well as a role as sole sector interlocutor with ministries, ITA-Italian Trade Agency, Confindustria, standardization boards like UNI and CEN, labor unions, universities and polytechnics, Italian and foreign federations and associations, Tradefairs in Italy and around the world.

The association has always engaged in intense technical job training in Italy and abroad, organizing, managing and creating highly specialized educational programs and technological centers in various parts of the world, with the involvement of local governments, institutions and associations.

Architectural & Design Evolutions

GammaStone is internationally recognized as a leader in the production of innovative panels for ventilated facades and architectural cladding. Our extensive experience and continuous commitment to research and development enable us to offer cutting-edge solutions that combine sophisticated aesthetics with outstanding technical performance.

Specializing in the creation of natural stone, glass, porcelain, and UHPC (Ultra High Performance Concrete) panels, we strive to meet the needs of architects around the world. Our panels stand out for their lightness, weather resistance, and exceptional durability, making GammaStone products the ideal choice for prestigious residential and commercial projects. Innovation is at the heart of our company. The patented GammaStone AIR system is a testament to our ability to blend state-of-the-art technology with traditional materials, creating expansive surfaces that significantly reduce structural weight without compromising strength.

This system provides architects with creative freedom, allowing them to design unique projects without the constraints imposed by heavier materials.

We collaborate with leading architectural firms and actively participate in iconic projects that serve as milestones in contemporary architecture. The versatility of our solutions perfectly adapts to various design styles, from contemporary minimalism to more classical and traditional lines. In addition to facade panels, GammaStone introduces LayerStone, an exclusive line of large-format natural stone panels for interior wall and floor cladding. LayerStone is designed to offer a solution that combines the timeless beauty of natural stone with ease of installation and long-lasting durability. This line is ideal for both residential and commercial environments, such as hotels, spas, lobbies, and offices, where a high-end visual impact is desired.

MARMI FAEDO

For over three generations, Marmi Faedo has been a trusted name in natural stone, celebrated for its craftsmanship, innovation and sustainability. Based in Northern Italy, just steps from our quarry, we specialize in the extraction and processing of Grolla Limestone. Formed through ancient volcanic activity, Grolla Limestone is unique among natural stones. Its volcanic origins give it exceptional technical properties, setting it apart from other limestones. The stone is frost-resistant, highly durable and capable of withstanding heavy use without cracking or wear. Unlike many other materials, it remains timelessly beautiful, resisting darkening or deterioration over time. Its natural resistance to chlorine and saltwater makes it an ideal choice for swimming pools, coastal projects and other demanding environments. Whether you're designing contemporary facades, intricate bespoke elements or functional surfaces for interiors and exteriors, Grolla Limestone offers the perfect blend of strength, elegance and versatility.

Our expertise lies in blending traditional craftsmanship with innovative techniques to meet the most ambitious design challenges. From large-scale architectural projects to smaller, bespoke elements, Grolla Limestone is adaptable to a wide range of applications. Its strength allows for thinner, lightweight formats without compromising durability, enabling bold, creative solutions for modern architecture.

At Marmi Faedo, respect for the environment is a guiding principle. Our production facility, powered entirely by solar energy, is located just 200 meters from the quarry. This proximity not only ensures the highest standards of customization and quality but also significantly reduces transport-related emissions. We follow a strict zero-waste policy, reusing every by-product from our production process. In addition to minimizing our environmental footprint, we actively contribute to the rehabilitation of the land, planting thousands of trees annually and hosting biodiversity programs, including beekeeping initiatives and educational activities for children. Sustainability is not just a commitment – it's a part of who we are.

Carrino's Company has been involved for a long time to develop a high quality product. This company was born at the beginning of the seventies from a small firm manufacturing handcrafted goods into a bigger business. In a short time it was possible to conquer the attention of the market thanks to the professionalism and the originality of its

creations. Carrino's Company was always able to increase and diversify its production because the reached successes encouraged its development during the years. So real small masterpieces were born, in which the great aesthetic value, the sophisticated construction technology, the incomparable precision, and the high material quality live together in a mix of handicrafts and high technology. This side of the work was attended very carefully by the company. The interior doors of the new collection are nice, functional, elegant, solid, durable, safe, valuable and versatile. So they are able to renew the challenge in a field where it is very difficult to find innovations. Thanks to an advanced project, concentrated towards the newest trends of the sector, the collection of CARRINO DESIGN doors presents itself as today's true flexible system, able to fulfil every aesthetic and functional demand in any furnished environment. It is with great satisfaction Carrino's Company presents its products, trustful in the reached results, and confident in the product quality.

Casma designs and manufactures more than 3800 accessories for tempered glass doors, hydraulic hinges and floor closers. Together with our brands, we provide a full range of architectural solutions based on innovative technologies and outstanding experience. Casma, founded in 1942 by Valentino Marinoni, guarantees quality, originality and

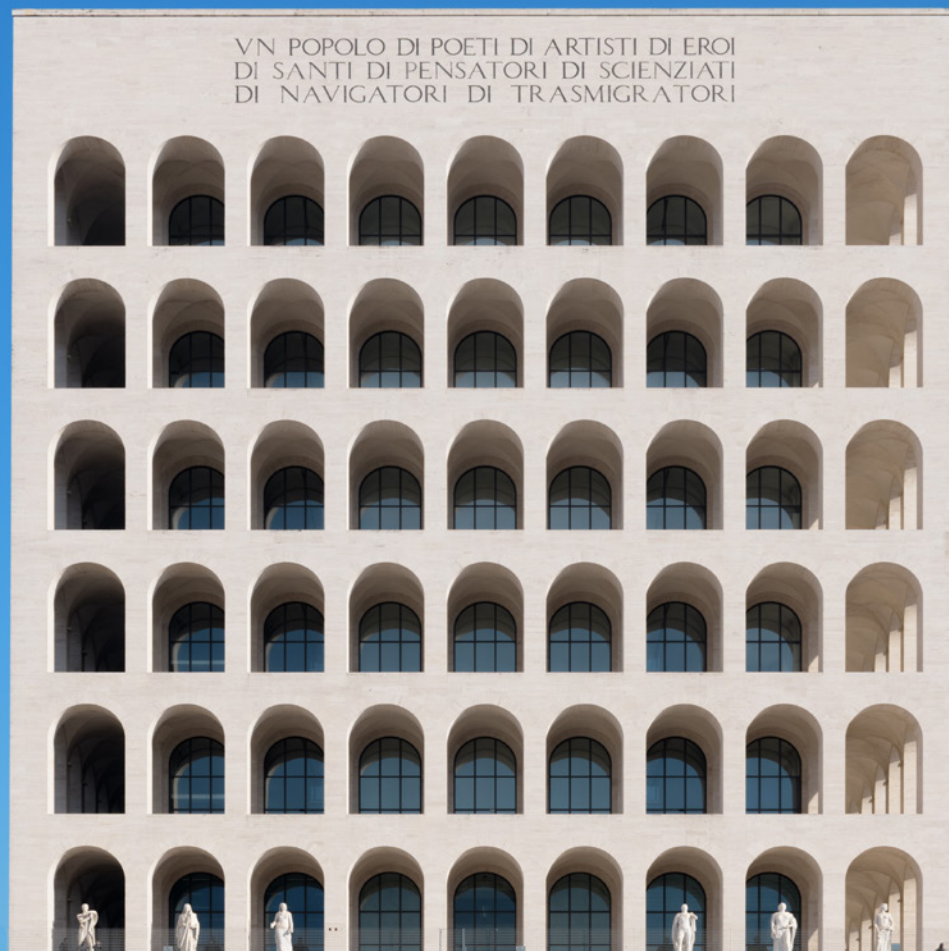

innovation in glass fittings design and production. In our 5000 sqm manufacturing plant, we produce all fittings for exterior and interior glass systems such as patch fittings, hydraulic hinges, door rails, floor springs, sliding systems, handles, profiles for fixed panels either for shop-fronts or for interior partitions, shower enclosures etc. Our employees transfer the passion for their job on all our products. This means a great attention for details, fine aesthetics and hi-end finishing. Testing operations and quality controls, using the latest available technology, are carried out by employees with more than 20 years' experience in our company. The attention on details and on quality, together with the friendly installation, makes our products unique in the market. From US to Australia Casma is considered a premium brand.

Thanks to our international experience in more than 60 different countries, we can offer solutions suitable to satisfy the needs of each single market. In most of 60 different countries, we can count on direct sales besides Partners and Distributors which support our customers on any issue. This makes Casma a "reliable supplier". Our mission is to make our customers' job as easy as possible and to help them in choosing the best solution for any enquiry.
