### Precision mechanical machining

IATF 16949:2016 - ISO 9001:2015

ISO 14001:2015

## DESCRIPTION

Our company was born in 1976 as a small artisan reality mainly specialized in turning; with the years following various investments in research and development, we have come closer and closer to the world of machining on a multi-pallet machining center to become a company in all respects

completely dedicated to high precision machining on machining centers reaching a total of 7 independent factories and a new plant with an extension of 12.000,00 square metres.

Our main markets are Automotive and Hydraulics field, but we are also involved in the production of: solar power, wind energy, marine transmission and robotics parts.

We are now certified as 100% energy green users, because part of our usage is directly produced from our solar panels, and the other energy that we buy are 100% CO2 free.

## TORNI AUTOMATICI

Stand: B03:115

### High precision mechanical machining

ISO 9001:2015 - ISO 45001:2018

ISO 14001:2015 - SA 8000:2014

## DESCRIPTION

Torni Automatici srl is a leading firm in metal precision machining. High technology, quality products, company organization and logistics are the strongpoints of this competitive company. We are the choice of leading national and international companies for the execution of their products in the various fields of application of the industry: hydraulics, agricultural, naval, automotive and others.

Thanks to the constant updating of their technological level, the quality system and the consolidated experience in the processing of raw materials, today they can satisfy the needs of any type of application

After the introduction of Kyoto protocol and "emission trading" directive, all European signatory countries, as Italy implemented plans to reduce CO2 emissions. Since 2005, aligned with this commitment, Torni Automatici srl's using 100% clean energy from renewable sources.

## ISAG

Stand: B03:116

**Rubber - silicone - rubber-metal moulding**

ISO 9001:2015 - IATF 16949:2016

### DESCRIPTION

Rubber, silicone, metal-rubber items produced through moulding injection process. Thanks to the different tonnage of our machines, we can produce items weighting less than 1g up to 4kg. Moreover, we work with all types of rubber, like: EPDM, FKM, AEM, ACM, VMQ, FVMQ, NBR, EPI, CR.

Our experienced know-how allows us to play a consulting role with our customer needs, being a guide during product development phase. Isag Srl has got an artisanal approach: focusing on quality rather than quantity, manufacturing articles requiring visual checks and post-processing manual finishing and testing, due to their delicate geometry and application. Gaskets, grommets, bumpers, pipes, sleeves, elastic and anti-vibration elements, are just some examples of our production.

ISAG Srl main markets are: automotive, agricultural, construction, textile machinery, lifts, household appliances, toy and fashion.

## MA.BO.

Stand: B02:110

**Small Precision Mechanical Parts - Turning and Grinding**

ISO IATF 16949 - ISO 9001:2015

ISO 14001:2015

### DESCRIPTION

Backed by 54 years of experience MABO is the epitome of excellence in the Small Precision Mechanical Components industry. The machinery comprises 50 fixed, Swiss type and sliding headstock CNC lathes with automatic loaders for machining from 2 up to 50mm diameter bars, as well as orbital thread-cutting machines, rolling machines, lathes for machine hardened materials, 8 centreless and plunge grinders and centre-type grinders, honing and lapping machine. Self-production of automation (CE Certified). The company's business system produces according to ISO TS 16949, ISO 9001 and ISO 14001. A modern company that has never stopped its investments in research, where the machine tool inventory is regularly innovated, and workplace upgrading is always on-going. 80 employees, 14 million Euro turnover.

## MANOMETAL

Stand: B02:106

**Precision - Ecobrass - BRASS - Leadfree - Turning - CNC**

ISO 9001:2015 - ISO 14001:2015

ISO 45001:2018

### DESCRIPTION

Manometal is your partner when it comes to sophisticated precision turned parts and assemblies made of BRASS and drinking water alloys, Ecobrass, stainless steel, lead-free alloys as well as aluminum and free-cutting steel.

High customer satisfaction, high-quality products, compliance with all relevant legal requirements and the continuous improvement of product quality, our environmental performance and occupational safety are our overarching goals.

See for yourself!

## PALMIERI TOOLS FORGING

Stand: B02:116

**Hammer Hot Drop Forging - Forging - Ring Rolling**

ISO 9001:2015 - PED2014/68/EU

### DESCRIPTION

The Company part of the Palmieri Group, was founded in 1908.

With its 100 years of know-how, it is specialized in hammer hot drop forging, ring rolling and machining.

Its production capacity, the efficiency of a dedicated engineering and design department and the high quality of raw materials are the excellences for which the Palmieri Tools Forging represents the most reliable partner for some of the most important international industrial groups.

The Company can supply semi-finished as well as finished products in small, medium and big sized series for several fields of use: Transmission Components, Agricultural Machinery / Industrial Vehicles, Oil and Gas Industry, Shipbuilding /Offshore, Rolling Stock, Mining/Drilling, Handling, Hydraulics, Energy/Wind Turbines, Recycling.
