**ANNOVI[®]
REVERBERI**
The Power of Experience

Annovi Reverberi, founded in 1958, is a leading Italian manufacturer of diaphragm pumps for crop, orchard and vineyard spraying, fertigation and seeder treatments, street cleaning and firefighting installations, and a wide range of high pressure triplex plunger pumps for a multitude of industrial cleaning applications. We also offer a range of high pressure washers, vacuum cleaners and water pumps. Innovation, technology and quality are our guiding principles. Ace Pumps, producer of centrifugal pumps and Valvolmeccanica, producer of agricultural accessories are part of the Agricultural Division of Annovi Reverberi Group. First Choice When Quality Matters.

Geoline® is Tecomec's brand name of a product line designed for the agriculture sector and it mainly includes components and accessories for spraying and fertilizer application machines. The Geoline® trade mark has grown in recognition around the world, and we are considered to be a winning alternative for those seeking top quality accessories and parts. Our catalogue of over 2300 items has grown from the company's innovative way of thinking and outstanding design capabilities, offering the possibility to fully equip sprayers of all styles.

Tecomec is leader in three different product lines:

1. Accessories and parts for chain saws and brushcutters – Tecomec®
2. Accessories and parts for orchard and crop spraying machines – Geoline®
3. Accessories and parts for industrial high pressure cleaners and washers – Meline®

LaCruz® is the leading manufacturer of aftermarket spare parts for grape harvesters. Italian company founded in 2006 by Mr Andrea Cruzzolin, it started its activity with the production of foliage clips both for manual trellising and wire lifters. Then a full range of trellising material was developed, including rubber bands, PVC tube, twine, vine protections and ties compatible with several manual binding guns.

However LaCruz® is known worldwide as producer of high quality AFTERMARKET PARTS for all the brands of grape harvesters in the market. It produces wear-off components for NEW HOLLAND, PELLENC, GRÉGOIRE, ERO, NAIRN GRAPE HARVESTERS, among others. It offers also alternative parts for trimmers, shoot removers and pre-pruners. On our website page www.lacruz.biz you can find also our offer of second-hand grape harvesters.

Polmac has been manufacturing components and accessories for sprayers for more than half a century, with great care taken to protect the environment and the operators' health. Designing these sprayers has helped Polmac realize that the field requires the measurement, monitoring, and management of the chemical products used for crop protection and to increase crop yields. The purpose of our research has always been to find the best working solutions. In fact, Polmac's equipment allows you to quickly and simply achieve: greater precision in the amounts applied, greater safety of operations, observance of the strictest standards, and excellent end results.

TIERRE
there's a difference

From more than 55 years agricultural flail mowers wear a unique name: TIERRE.

From 1963, its founder, Aldo Tiso, has led its activity towards a production of high quality agricultural machines cured in each detail with which it is possible to cut grass, wine shoots, bushes and maintain roadsides. Twenty lines are dedicated to agriculture with working width from mt 1,00 to mt 8,30.

From 2004 the company has enriched its offer with professional machines for the maintenance of green areas. Eight lines are dedicated to this purpose from which three are used to collect grass professionally. You can visit the following link to discover our product:

<https://issuu.com/tierre/docs/catalogo-light>

All the components used to build the machines are brand ones. The motto of the company is "the best guarantee we can offer is to build excellent products".

Tierre: there is a difference.

We are an Italian company (Bologna-based), in business since the early 1950s. We have grown steadily becoming a European leader in designing and manufacturing boron steel wearable parts to be fitted on all kinds of agricultural machines, such as blades for rotavators, hammers and flails for mulchers, knives and blades for shredders and rotary mowers, spades, beet digger blades, blades for trenchers, power harrows tines, plow parts, cultivator parts, discs and any other components on customer's samples and drawings. We produce around 5 million pieces a year, covering more than 8 thousand different models. Our components are made of European boron steel, hot hardened and tempered giving special attention to the heat treatment. Our company acts as a renowned partner of the most important Italian and European OEMs for more than 60 years now, and our sheer passion for the agricultural industry allows us to provide long-lasting components with outstanding quality, that are both impact-proof and wear-resistant.
