Dear trade fair visitors,

As Director of the ICE, the Italian Trade Promotion Agency in Germany, I am pleased to welcome you to the ANUGA 2023 and the joint ICE stand in Cologne. The Italian exhibitors at our stand will present to international visitors their original Italian quality products, which are created using traditional recipes and production techniques. Here, every product is a true original – Made in Italy! A large number of the products presented already bear the European seal denoting the protected place of origin (PDO and PGI).

Our 186 exhibitors will this year present a highly diverse and innovative selection of products. These range from exquisite olive oils and aceto balsamico, fresh and dried pasta products, coffee, confectionery specialities and truffles through to superlative ham and sausages, cheese, pasta sauces and tomato products and regional delicacies made from conventional and organic produce.

At this year's ANUGA, most of the Italian exhibitors will be represented in hall 11.2 (fine food). At the main information stand of the Italian Trade Agency (hall 11.2 Fine Food, B058), you will have the opportunity to meet the Italian exhibitors, further develop contacts and obtain further information.

The ICE team and the Italian exhibitors are looking forward to seeing you at the Anuga 2023!

ITALIAN TRADE AGENCY

The ICE-Italian Trade Agency is the Italian government organization working to develop, facilitate and promote economic and commercial relationships abroad and marketing Italian goods and services internationally. It further promotes the “Made in Italy” image around the world and Italy itself as a destination for foreign investment.

The ICE-Italian Trade Agency operates under the authority and supervision of the Ministry of Foreign Affairs and International Cooperation (MAECI). Through its international presence, alongside the Italian diplomatic network, the ICE-Italian Trade Agency works together with business organizations and other public and private entities to offer coordinated support for businesses and Italian organizations involved in the globalization process.

From its Rome headquarters, with offices in Milan and around the world, the ICE-Italian Trade Agency provides information, assistance and promotion services to businesses and institutions, encouraging cooperation within the industrial, agricultural and agrifood sectors, distribution and tertiary businesses, to expand the presence of Italian companies on international markets. In order to support the Italian agricultural and food sector the ICE-Italian Trade Agency offers a wide range of initiatives worldwide, such as participation in trade fairs, presentations and bilateral workshops.

In Germany the ICE-Berlin office organizes many promotional events with Italian regions, provinces, manufacturers associations, chambers of commerce, private companies and collective pavilions in international trade fairs such as Fruit Logistica, Biofach, ProWein and Anuga.

The value chain for Made in Italy traceability

Among the wide range of initiatives put in place by the Italian Trade Agency to support Italian companies and Made in Italy around the world, at Anuga 2023 we are delighted to present **Track IT Blockchain**, launched by ITA in 2022 and using the **Blockchain technology** to boost the competitiveness of Italian companies. The project envisages **the selection of 470 Italian companies operating in the Fashion and Food sector**. As of July 2023, 232 companies have been admitted to the project (67% of them from the Food&Wine industry), 87 of which already have their landing pages ready.

The project consists of recording a certain amount of information concerning the firms' products (about sourcing, processing, production, etc.) on a Blockchain system, i.e., a digital distributed ledger. The service is made available by nine selected Service Providers working together with the Italian companies. The basic concept of Blockchain involves a chain of blocks, where each block contains a set of data and a unique code (called a "hash") that identifies the block. This results in a chronologically ordered chain of all the information recorded since the blockchain was created, which, because of its immutability characteristics, is often described as a digital ledger. The data recorded are, therefore, immutable, and the company takes full responsibility for the truthfulness of what is recorded.

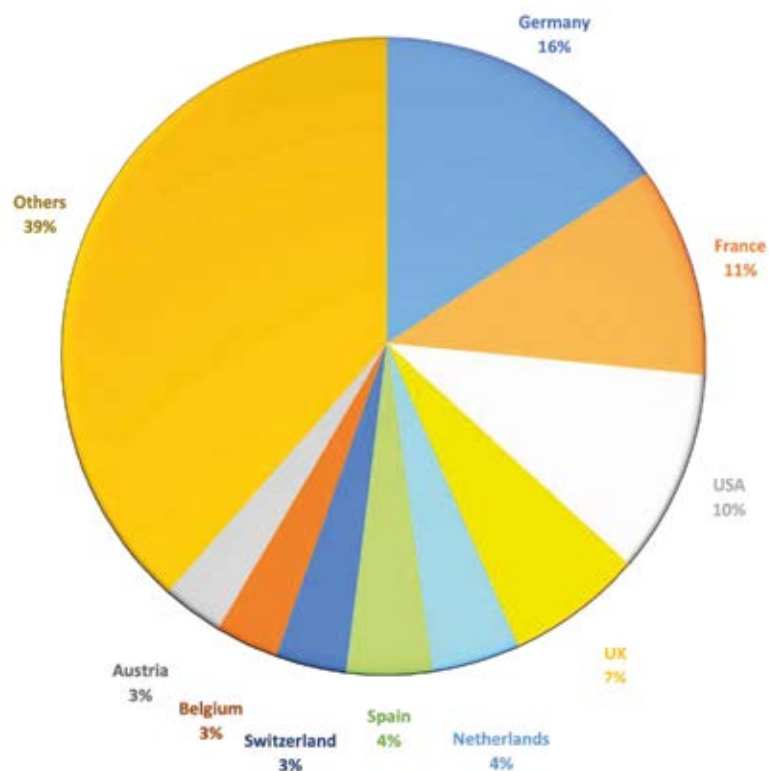

The traceability of the product ensures that they are indeed Made in Italy, the disclosure of more information to consumers can enhance brand loyalty and consumers trust, since consumers will buy with more confidence if they know what they are actually buying, where the ingredients come from and how the product was processed. Another aspect that should not be underestimated is the fast access to the **“story” of the product**, that can be of great importance whether it is necessary to trace the supply chain to identify production flaws.

Track IT Blockchain is now at its first edition, nevertheless it was received with great enthusiasm and confidence by the companies that applied. The integration of technology into business processes is one of the great challenges that companies face these days, and it brings with it substantial opportunities for the further development of a business. Meeting this challenge is vital for the increase in competitiveness and for the growth of Italian companies, therefore ITA is ready to support them on their journey toward innovation and internationalization.

The Italian food industry

The Italian food industry follows directly after the metal and mechanical engineering industries in terms of its importance for Italy, measured by sales.

One of the strengths of "Made in Italy" in the food sector is the numerous EU-certified DOP and IGP products (products with protected designation of origin PDO and products with protected geographical indication PGI). Currently, 320 agri-food products and 527 wines from Italy are recognized with this European label. Certified quality PDO and PGI products remain among the most dynamic, with a value of 19,1 billion euros (+16%) in 2021.

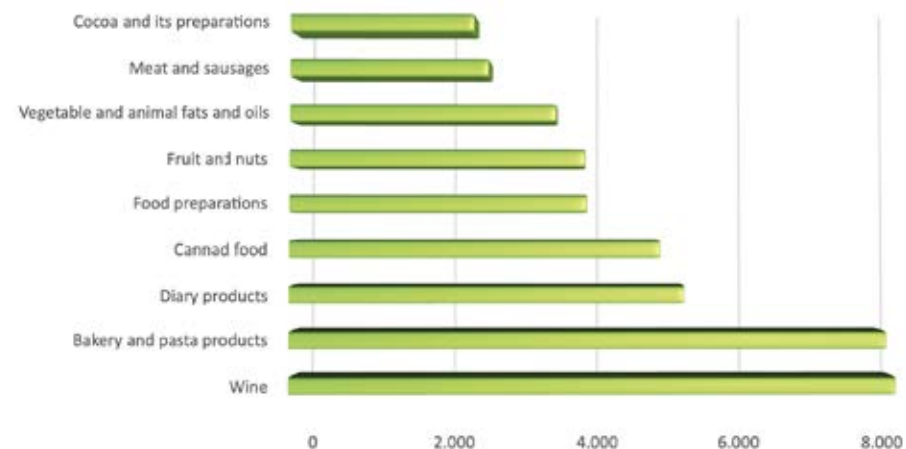

THE MOST IMPORTANT SALES MARKETS OF ITALIAN FOOD PRODUCTS (2022)

The export of Italian foodstuff and agricultural products

Italy exported 57 billion euros worth of agricultural products and foodstuffs in 2022 (+16% year-on-year). The main customer countries were Germany, France, the United States and the United Kingdom. Italian exports of food products continued to develop positively in the first months of 2023 (Jan-Apr), increasing by 9% year-on-year. Among the main consumer countries, exports in 2022 to Hungary (+47%), Czech Republic (39%), Croatia (30%) and Poland (+29%) recorded a significant increase in demand.

The main Italian export products in 2022 were wine (+10% compared to 2021), pasta (+23%), milk products (+19%) and animal and vegetables fats and oils (+32%).

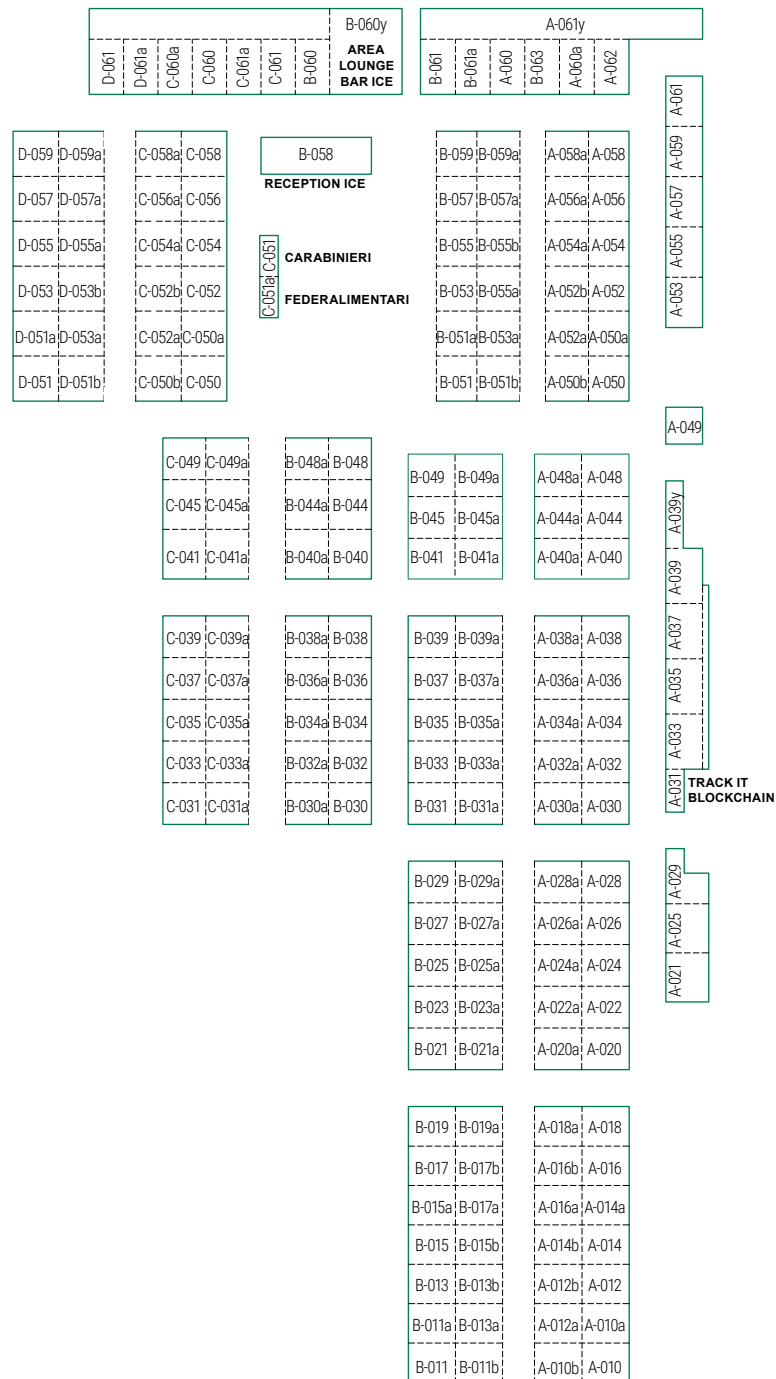

ITALIAN FOOD EXPORTS ACCORDING TO THE TYPE OF GOODS IN 2022 (IN MIO EURO)

The most important commodity groups imported by Germany from Italy in 2022 were fruits and nuts (1.1 billion euros), wine (1.1 billion euros) and pasta and baked products (1.07 billion euros). Coffee and tea (+41%), cereals (+21%) and mill products (+35%) showed above-average growth year-on-year (2021-2022).

Important export products are fruit and vegetables, milk substitutes, cereals and flour, bakery products, wine, animal feed and similar products, meat, extra virgin olive oil and germ oil, jams and marmalades, dairy products and cheese, pasta and similar products, canned vegetables, processed tomatoes, and many others.

Pasta Producers ... since the beginning of time!
Please Welcome THE Authentic, Finest, Artisan,
Traditional, PGI Gragnano's Pasta! Pasta has been
produced in Gragnano for over 500 years. Produc-
ing Pasta for us is an art, which we perform every
day, following the same traditions as our ancestors.
A unique mix of history, culture, traditions and of
course ... secrets! Our Ancestors used to mix only 2
ingredients, High Quality Durum Semolina & Water
from the Natural Spring in Gragnano's Mountains.
The ingredients were then pressed through a Bronze
Die and the pasta was dried in the town's streets,
under the sun! Today, after all these generations, we
follow exactly the same traditional methods!

PMC - Prodotti Meridionali Conservati - is a factory located in Pontecagnano, Salerno, South of Italy. Our production takes place in Salerno, midway between two of the most fascinating places in the world: the Amalfi and the Cilento coast, where the Mediterranean weather allows the tomatoes to follow their natural growth. We produce and export to more than 80 countries worldwide all range of tomatoes and beans.

Oil requires passion: extracting it is a profession, knowing it is a pleasure, combining it is an art. We've been producing it in Puglia for over a century and we've been studying it every day since 1894. For four generations we have studied the 539 varieties of Italian olives and selected the best for our oils. The "Raguso" method is based on control of times and temperatures, to guarantee our products maximum excellence, through cold extraction within a few hours of harvesting.

Extra virgin olive oil: bambina bio - gli abbinabili - raguso classico - raguso biologico - raguso igp puglia - eidos - gran cru millenario

Tartuflanghe
Loc. Catena Rossa, 7
12040 Piobesi d'Alba CN
Piedmont

+39 0173361414
tartuflanghe@tartuflanghe.com
tartuflanghe.com

Our Alba roots led us to envision truffle in unprecedented forms, contexts or usage. While truffle was used "on top" of tagliatelle in the past, we have incorporated it "inside" pasta instead. While truffle was able to be stored for only a couple of days, we went ahead and cryo-dried it. While truffle was a product for a few chosen ones, we are now able to offer truffle to everyone: for every occasion, from sophisticated gourmet dishes to simple moments of indulgence.

We design and manufacture all of our products in our artisan laboratories using certified raw materials, selected by trusted local producers.
