# ITALIAN TRADE AGENCY

## Italian Trade Agency

### Trade Promotion Section of the Italian Embassy

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses.

Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

# AGUZZOLI

**ISO 9001:2015**

**Contact:**

✉ [aguzzolisrl@gmail.com](mailto:aguzzolisrl@gmail.com)  
🌐 [www.aguzzolisrl.com](http://www.aguzzolisrl.com)

**STAND: B02:110A**

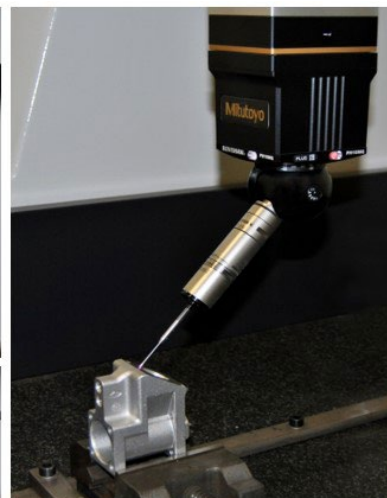

**Description:**

Aguzzoli srl specialized in alluminium die casting, mould construction and precision die casting machining operations. We are able to follow and assist the customer through the design process, in order to optimize the best project.

Die casting is handled by robotic islands from 350 to 650 ton. We can handle high volume production batches or small series. We offer precision machining on machining centres for finishing die-cast parts. Our staff performs continuous checks, to ensure constant quality.

In addition we are equipped with an X-ray inspection machine, a testing office equipped with three-dimensional measuring machine Mitutoyo and roughness tester.

Our company is ISO 9001:2015 certified.

# AMSAGOMMA

**ISO 9001:2015; IATF  
16949:2016; ISO 14001:2015;  
ISO 45001:2018**

**STAND: B02:110A**

**Contact:**

✉ [info@amsagomma.it](mailto:info@amsagomma.it)  
🌐 [www.amsagomma.it](http://www.amsagomma.it)

**Description:**

Amsagomma manufactures technical item: hoses, gaskets, grommets, buffers, and bellows in different materials like EPDM, NBR, MVQ, AEM, FKM, HNBR, CR, SBR and MVQ, using injection moulding machines, in the Northeast of Italy

Amsagomma since 1979 offers a full-service approach, from compound R&D to mould co-design and top-quality control, to meet customer specifications.

Amsagomma mainly manufactures technical parts for house-hold appliances, home devices, industrial components, aftermarket components and automotive industries.

# BROVEDANI GROUP

**IATF / ISO14001-2015 / ISO 9001-  
2015 / ISO 45001**

**STAND: B02:110A**

**Contact:**

✉ [info@brovedanigroup.com](mailto:info@brovedanigroup.com)  
🌐 [www.brovedanigroup.com](http://www.brovedanigroup.com)

## **Description:**

We are a leading company supplying solutions based on state-of-the-art technologies, trusting on reliable automated processes suitable both for high precision mechanical parts and low and high volumes, realized with automations and special machines to assure the highest quality standards.

Since 1947 Brovedani has been looking towards a sustainable future: with a lean DNA and technologies that are ever more green.

New components for electric motors, innovative design for fuel cell and hydrogen internal combustion engines, components where precision engineering is a key success factor.

The challenge continues.

The Brovedani Group's constant commitment to quality is attested to by the many certifications it has obtained over the past years. Our certifications are: IATF / ISO14001-2015 / ISO 9001-2015 / ISO 45001.

# CARNIAFLEX

## carniaflex

Hi-MEC  Flex & Stay

ISO 13485, ISO 9001, ISO14001,  
ISO 45001

STAND: B02:110B

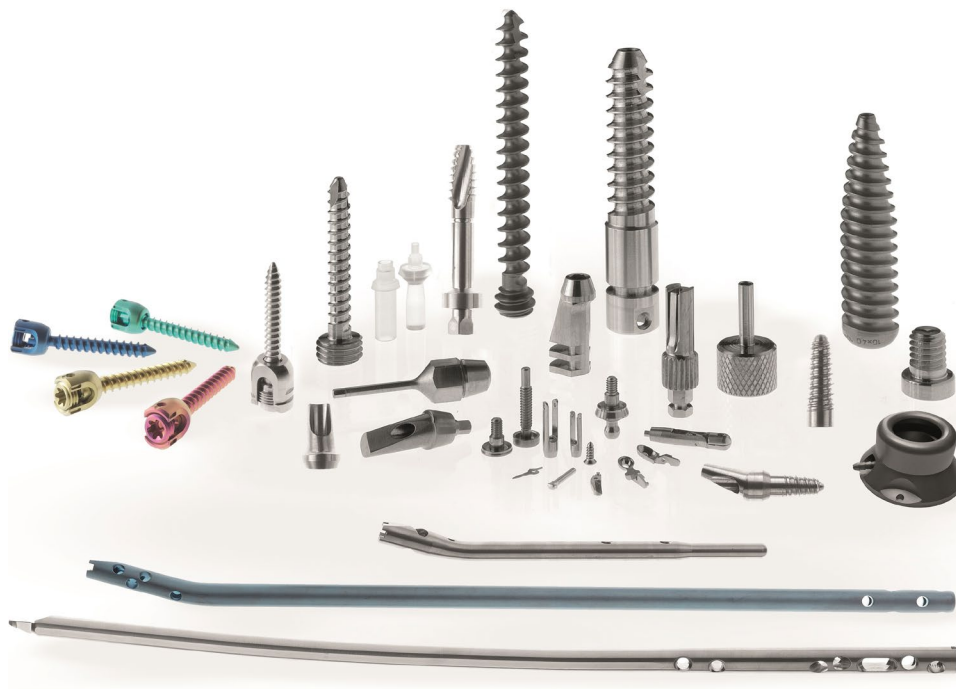

### Contact:

✉ [carniaflex@carniaflex.com](mailto:carniaflex@carniaflex.com)  
🌐 [www.carniaflex.com](http://www.carniaflex.com)

### Description:

Internationally experienced, it has two product lines: "Hi-Mec", which produces high-precision and complex-shaped titanium components for medical devices, targeting niche markets in orthopaedics, traumatology, spinal surgery, dental implantology and vascular access systems; "Flex & Stay", which designs, manufactures and sells "flexible gooseneck arms" for the medical, industrial, microphone and lighting sectors.

Flexible and reactive in manufacturing and validating new processes, with product technical support always focused on customer needs. Deeply experienced in following up complex quality procedures.

# FIMA BRASS FORGING

**UNI EN ISO 9001:2015**

**STAND: B02:110A**

## **Contact:**

✉ [fima@fimaitalia.it](mailto:fima@fimaitalia.it)  
🌐 [www.fimaitalia.it](http://www.fimaitalia.it)

## **Description:**

FIMA is an Italian company with thirty years' experience in the brass and copper processing and hot forging sector. FIMA exports 90% of its production in several European countries and overseas.

Its business covers a surface area of over 10,000 sqm, including about 4,000 undercover. Its facility incorporates all production processes, starting from design and continuing with the manufacturing of equipment, forging, CNC mechanical machining and even finishing with assembly and packaging.

# IMA

**Friction Materials and  
Braking Systems**

**ISO 9001:2015**

**STAND: B02:110A**

**Contact:**

✉ [ima@imafreni.it](mailto:ima@imafreni.it)  
🌐 [www.imafreni.it](http://www.imafreni.it)

## **Description:**

IMA Srl has been working in friction material for over 50 years, focusing on everything related to industrial brakes and clutches.

To meet the needs of each business category and specific applications we have developed 30 types of friction materials.

Thanks to our internal laboratory, we can realize every application according to the customer's drawing and overhaul brake shoes, brake blocks, and sectors with the most suitable material.

We specialize in constructing industrial, hydraulic, or pneumatic brake calipers.

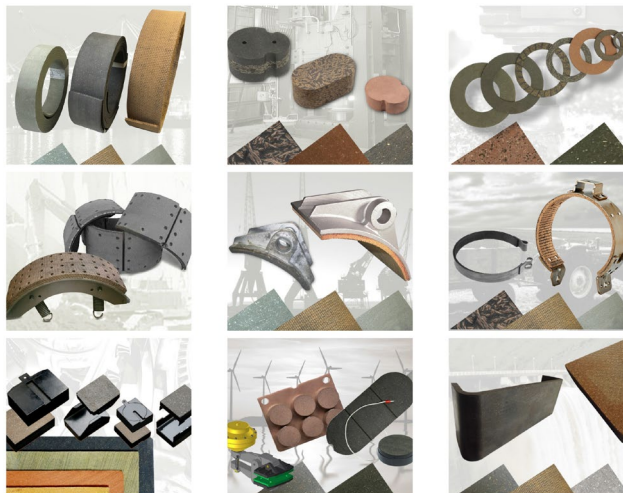

We can customize each type of caliper according to our customer's technical requirements and needs.

The needs of our clients are our core business.

Thanks to our skilled professionals and the excellence of our partners and suppliers, our customers is always satisfied – whether we are rebuilding an existing system or building from scratch – from design to creating and testing of prototypes and, finally, to the production and installation of the final product.

The market is constantly evolving and staying on top of technological innovation as we develop customized products and materials is crucial.

[WWW.IMAFRENI.IT](http://WWW.IMAFRENI.IT)

# ISAG

**ISO 9001:2015 , IATF 16949:2016**

**Contact:**

✉ [isag@isag.it](mailto:isag@isag.it)  
🌐 [www.isag.it/en/](http://www.isag.it/en/)

**STAND: B02:110B**

## **Description:**

ISAG srl was born in 1991, through Armaroli family's will and intuition, developing itself mainly around automotive cluster in Piedmont.

The core business is the injection moulding production of rubber, metal-rubber and silicone items. However, its presence goes above automotive industry, like building, fashion, textile, food and toys.

Thanks to its experienced know-how, ISAG can play a consulting role with its customer needs, being a guide during product development phase. It is applied an artisanal approach: focusing on quality rather than quantity, manufacturing articles requiring visual checks and post-processing manual finishing and testing, due to their delicate geometry and application.

# MANOMETAL

**ISO 9001:2015 / ISO 14001:2015  
/ ISO 45001:2018**

**Contact:**

✉ [manometal@manometal.com](mailto:manometal@manometal.com)  
🌐 [www.manometal.com](http://www.manometal.com)

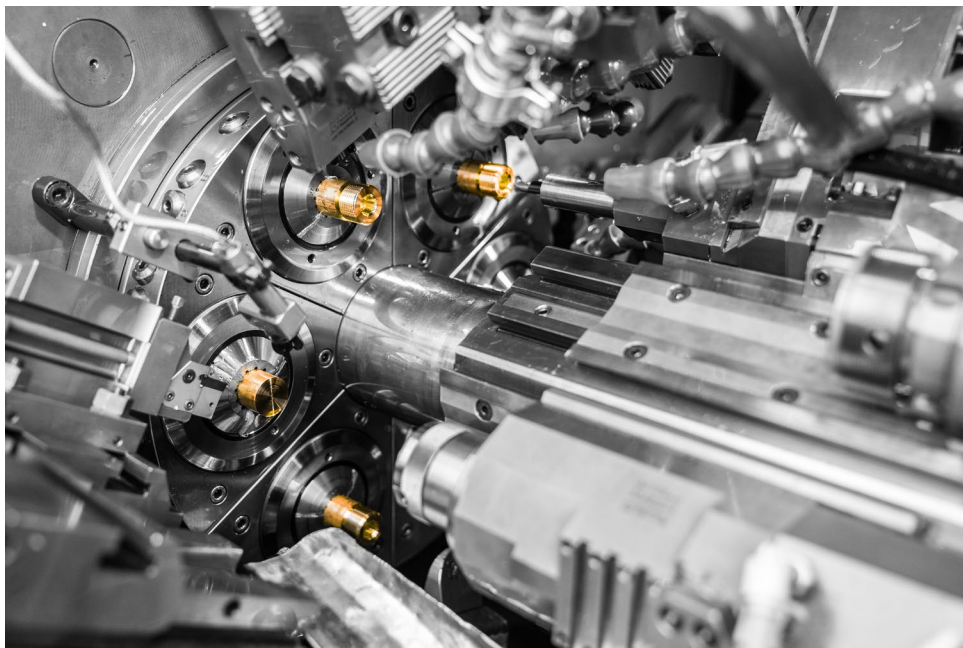

**STAND: B02:110B**

**Description:**

Manometal stands for the highest precision, the best quality and is constantly growing.

Manometal produces turned parts using state-of-the-art automatic lathes, in large quantities, from high-quality metals, for the international industry: electrical industry, cooling and heating industry, pneumatics and hydraulics, control technology, sanitary, automotive industry and much more. A wide variety of brass alloys and lead-free brass alloys, as well as stainless steel and free-cutting steel are processed.

In order to meet the constantly growing demand for such precise turned parts, an expansion project has been underway at Manometal since October 2022. State-of-the-art, efficient and automatic production and assembly processes together with ultra-modern storage and logistics systems require a lot of space and the necessary high challenges.

# MECCANICA RIZZELLO

**ISO 9001**

**STAND: B02:110B**

**Contact:**

✉ [commerciale@mecrizzello.it](mailto:commerciale@mecrizzello.it)  
🌐 [www.mecrizzello.it](http://www.mecrizzello.it)

**Description:**

Active from over 40 years Meccanica Rizzello Srl has experience in turning and milling of mechanical components. The company got a specialization in producing different mechanical works, using sophisticated and high-tech numeric control machines (CNC).

The company is on the market with the production of hydraulic parts, including blocks, flanges, bushings, spacers, bolts, valve caps, hubs and fittings using different materials, such as the steel of all types and alloys. The best products are realized with steel 11SMnPb30.

The company works exclusively as subcontractor for third parties and produces high quality mechanical components according to the drawings provided by customers. In the last five years we expanded our fleet machines with different spindles and transfer machines. The company has also a Quality Control Room, supplied

with the main equipment and devices, such as Machine for measuring three-dimensional polar coordinates, hardness, roughness tester, optical gauges etc.

# OFFICINE ARFINO

**ISO 9001, ISO 14001, ISO 45001****Contact:**

✉ [info@officinearfino.it](mailto:info@officinearfino.it)  
🌐 [www.officinearfino.it](http://www.officinearfino.it)

**STAND: B02:110A****Description:**

Officine Arfino SRL, founded in 1974 by Mr. Flavio Arfino, brings 50 years of expertise in producing turned and milled metal components for plumbing, HVAC+R, and precision mechanics. The company's key attributes include a strong commitment to quality, attention to customer needs, and a focus on continuous growth and improvement, all while maintaining respect for the environment.

For over a decade, Officine Arfino has been working with low-lead and lead-free alloys that comply with the latest REACH and RoHS regulations. These environmentally friendly materials are particularly suitable for use in drinking water applications, helping reduce environmental impact. Through strategic partnerships, the company ensures the use of high-quality brass alloys such as CW614N, CW617N, CW601N, CW602N, CW625N, CW626N, CW713R, and more. Officine Arfino also manufactures high-precision bronze components using cutting-edge CNC machining technology, enabling the production of complex parts with

tight tolerances and high-quality finishes. Additionally, aluminum machining offers an interesting alternative, with the company's ability to work with various aluminum alloys, providing high-precision turned components suitable for a wide range of sectors. The company further enhances its offerings with an assembly service for turned parts, ensuring top-tier quality and precision. Each component undergoes rigorous quality and functionality tests before being carefully packaged, as part of a fully integrated production process that guarantees high standards throughout.

In line with its commitment to excellence, Officine Arfino holds three ISO System Certifications: ISO 9001 for quality management, ISO 45001 for occupational health and safety, and ISO 14001 for environmental management. These certifications reflect the company's dedication to maintaining the highest standards in product quality, employee safety, and environmental responsibility.

# O.M.L.

TORNERIA

**ISO 9001, ISO 14001**

**STAND: B02:110A**

**Contact:**

✉ [commerciale@torneriaoml.it](mailto:commerciale@torneriaoml.it)  
🌐 [www.torneriaoml.it/](http://www.torneriaoml.it/)

**Description:**

O.M.L. SRL is a CNC turnery based in Castelgomberto (VI), Italy. Since 1982 we have been operating in various sectors, including oleodynamics, gas and fluid control as main cores of our business.

We produce for third parties high precision components, normally dealing with medium to long series, with production batches from 3000 to 200.000 pcs.

We work diameters from 3 to 80 mm. The materials used include various types of stainless steel, automatic steels, brass, ecob brass and aluminum. We are a young, flexible and dynamic company and we constantly aim at the full satisfaction of our customers' needs.

# PM

**ISO 9001, IATF 16949 , ISO 14001**

**Contact:**

✉ [info@pm-spa.it](mailto:info@pm-spa.it)  
🌐 [www.pm-spa.it/](http://www.pm-spa.it/)

**STAND: B02:110A**

## **Description:**

Our company was born in 1976 as a small artisan reality mainly specialized in turning; with the years following various investments in research and development, we have come closer and closer to the world of machining on a multi-pallet machining center to become a company in all respects completely dedicated to high precision machining on machining centers reaching a total of 7 independent factories and an new plant with an extension of 12.000,00 square metres.

# RETTIFICA TERRENI

**STAND: B02:110A**

## Contact:

✉ [info@rettificaterreni.it](mailto:info@rettificaterreni.it)  
🌐 [www.rettificaterreni.it](http://www.rettificaterreni.it)

## Description:

The company Rettifica Terreni & c. snc is a dynamic company with a lot of experience in the field of precision mechanical grinding.

Today the company is able to provide various types of processing, on materials such as steels and alloys, hard metal and ceramics. Rettifica Terreni works from internal to external grinding on centers and without centers, from tangential grinding to radius grinding, from complete special grinding of ceramic details with machinery and diamond tools exclusively dedicated to sphere grinding, in addition to lapping, to balancing and laser marking.

The company is able to grind pieces with external diameters of up to 350 mm with a maximum length of 2000 mm; internal diameters from minimum 3 mm to maximum 300 mm for a length of 300 mm.

The company also supplies and processes small and medium-sized parts, in medium series batches, such as rings, bushes, bushings and rollers; shafts and pins; special bearings; pistons; hydraulic details; chucks; punches; gears and guides in general.

# T.M.G.

**ISO 9001**

**STAND: B02:110A**

**Contact:**

✉ [info@meccanicatmg.it](mailto:info@meccanicatmg.it)  
🌐 [www.meccanicatmg.it/](http://www.meccanicatmg.it/)

**Description:**

T.M.G has been producing turned and milled parts of the highest quality since 1996.

In 2012 we became ISO 9001 certified and in the following years we have embraced Industry 4.0, always offering our customers a better service.

Our machine park consists of sliding headstocks, multi-axis lathes with bar pusher, multi-axis lathes with manual loading and CNC milling machines. Our production sizes range from Ø3 to Ø100 with bar machines and up to Ø250 with manual loading machines.

Our production batches start from 100pcs up to 10000pcs. We process materials such as: alloy steels, iron, stainless steel, cast iron, aluminium, brass, plastics. Our main sectors are automation, food, industrial, hydraulics, automotive, agriculture, refrigeration, thermo-hydraulics.
