**TENDER FOR STAND CONSTRUCTION ICE-STAND AT FAIR PROWEIN 2025
(Duesseldorf, 16.-18.3.2025, Stand: 228 sqm)**

Procedure: by invitation

Updates/precisions: Wall structure

The tender conditions are updated as follows:

In the list "List of structures, furnitures, equipment ICE-stand Prowein.pdf" which is part of the tender documents we described the walls as:

Wände Gipskartonwände, gespachtelt, RAL 085 80 30 - Mondscheingelb matt gestrichen /
Walls Plasterboard walls, levelled, painted opaque RAL 085 80 30 - Mondscheingelb matt

These walls can also be constructed in a different way, such as timer frames covered with painted raw chipboard. As long as the final product will have a smooth surface with no gaps and the upper curved edges of the walls will be cut in a clean smoothed method, other construction methods are acceptable too.
