

LUCE1987.

lighting projects

With over 30 years of experience and the support of our skilled technical staff, we excel in the design, development and production of custom lighting fixtures. Approximately half of our production is dedicated to unconventional models, showcasing our flexibility and ability to adapt to the specific needs of our clients.

Our specialty lies in custom production, allowing us to craft unique lamps in practically every imaginable shape and size. The heartbeat of our company resides in our cutting-edge technical office, where advanced skills in metalworking and the use of modern production methods come together to bring complex projects to life with meticulous attention to detail.

Our products are often requested for residential projects, but they can also be proposed for commercial projects such as entrance halls, lounges, or VIP rooms in hotels or restaurants.
