FABBRICA OCCHIALI

dal 1973

A 50-YEAR FAMILY LEGACY IN EYEWEAR

Welcome to a family-run company where craftsmanship and vision have defined luxury eyewear for over 50 years.

We are dedicated partners and master artisans. Every collection - from sunglasses to prescription frames - begins as a simple pencil drawing. Our integrated process moves from this initial concept through prototyping, detailed development, and finally, to the flawless finished product.

COLLABORATIVE CREATION

Our expertise lies in working closely with our clients. We develop the entire project in collaboration with you, acting as active listeners to meet every specific need. This commitment ensures the final design is technically superb and perfectly aligned with your brand's identity.

Leveraging five decades of accumulated design mastery and advanced manufacturing techniques, we bring even the most complex ideas to life, maintaining an exceptional standard of quality at every stage.

Sunglasses: Mod.E0311

size 56□15 length 135

"Crafted from milled cellulose acetate, the frame is hand-finished and meticulously polished to a high luster. Its vibrant transparent red color exudes energy and pure optimism. Paired with perfectly coordinated gradient CR39 sun lenses, this piece achieves a contemporary, spirited aesthetic

Sunglasses: Mod. E1608 size 55□15 length 145

Milled cellulose acetate frame, hand-finished. The elegant, youthful shape evokes the mysterious gaze of a cat. Delicate, tonal brushing creates a lustrous matte effect that makes this model truly unique. Fitted with CR39 solid grey sun lenses that discreetly veil the eyes from prying glances

In literature, the cat and its gaze embody the ambivalence between mystery and charm, often being associated with qualities such as independence, inscrutability, and an almost superhuman intelligence. Authors like Charles Baudelaire, in his writings, and Italo Calvino have explored the profound relationship with these animals, utilizing them as a mirror for human internal conflicts and as symbols of an unfettered existence

Estyl: Beyond Eyewear Chains and Accessories

Estyl is more than just eyewear. Our production includes chains and accessories crafted exclusively from cellulose acetate. Each component is milled and hand-assembled with extreme precision. Our passion results in the rigorous inspection of every single link and model, designed to best enhance the material's reflections and the precision of its facets. This technical and artisanal process ensures a finished product that is refined in every detail

Style is the pure expression of one's essence, a lasting value that ignores fleeting trends. It is the balance between simplicity and character, a way of being reflected in every gesture and detail. As the great voices of Chanel, Armani, and Hemingway remind us, true elegance is never ephemeral: it is individuality that makes style eternal and memorable. Our acetate accessories are born for this: to be distinctive hallmarks capable of enduring through time.

CREATIVE PASSION

Since 1973, our creative passion has fueled the production of exclusive, limited-edition sunglasses, prescription frames, and jewelry. We blend artistic design with expert craftsmanship

COLORS

We meticulously select colors, patterns, lenses, and finishes to craft our exclusive designs. Our careful choices ensure every model is unique and high-quality

CRAFTSMANSHIP

Superior craftsmanship is achieved by merging automated precision with meticulous hand-finishing. Each piece undergoes detailed manual assembly, polishing, and rigorous quality checks to guarantee perfection

CELLULOSE ACETATE

Cellulose acetate is a plant-based plastic made from cotton or wood pulp. It's used for glasses because it's lightweight, durable, hypoallergenic, and holds rich colors/patterns better than petroleum-based plastics.
