

Conveyors

MONTENERO
OFFICINA MECCANICA

Conveyors

New concept of 2 way and 4 way conveyor lines.

GENERAL FEATURES:

- Easy handling and easy installation for all kind of roller
- All legs are easily removable. A complete line can be stored in one container only
- Transmission belt with simplified tensioning system
- Replacement of belt can be done without dismantling the machinery
- Adjustable height of the structure
- All components are first level

Distinguishing features of OMM 2way ROLLERS

High mechanical strength and friction coefficient. Easy tensioning system.

Distinguishing features of OMM 4way ROLLERS

Balanced lifting: guarantees an extremely light structure. It allows to use one air-piston only.
