

River Lab

VENEER EDGES
SINCE 1990

www.riverlab.eu

Italy

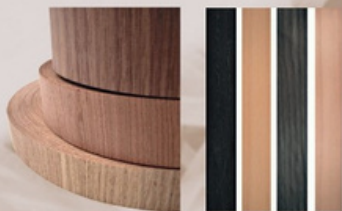

River Lab è impegnata nella trasformazione di tranciati di legno e precomposti per la bordatura e il rivestimento di profili. Sono destinati ad aziende di trasformazione del legno, molto esigenti dal punto di vista qualitativo, che pretendono un servizio efficiente e personalizzato.

River Lab is engaged into the transformation of natural and fine line wood veneer for the edge-banding and for profile wrapping. These products are intended to manufacturers working in the wood processing, who are looking for quality products as well as an efficient and customised service.

In bobine fino a 250 metri lineari
anche in lunghezze fisse
Available in rolls up to 250 linear
metres, even in fixed lengths

Larghezza da 16 a 300 mm
Width from 16 to 300 mm

Spessori da 3.2/10 a 50/10
Thicknesses from 3.2/10 to 50/10

A close-up photograph of a wooden table edge, highlighting the end grain of the wood. The wood has a warm, medium-brown tone with a prominent, wavy grain pattern. The edge of the table is visible, showing the thickness of the wood. The text "End grain edge example" is overlaid on the image in a bold, sans-serif font. The word "End" is in red, "grain" is in blue, "edge" is in red, and "example" is in blue. Below this, the Italian translation "esempio di Bordo di testa applicato" is written in a smaller, dark brown font.

End grain edge example

n° ICILA-COC-000280***

FSC CERTIFIED

FORESTS FOR ALL, FOREVER

The working spaces, assigned to the processing phases, are spacious and designed for an easy machines' feeding. The functional and advanced equipment is mainly built according to River Lab specifications and used by skilled workers, thanks to a very low turn over.

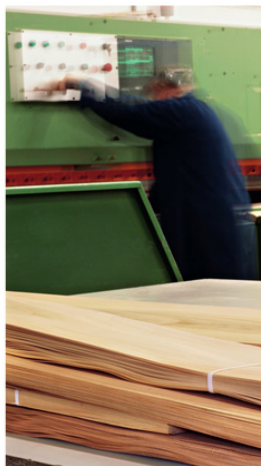

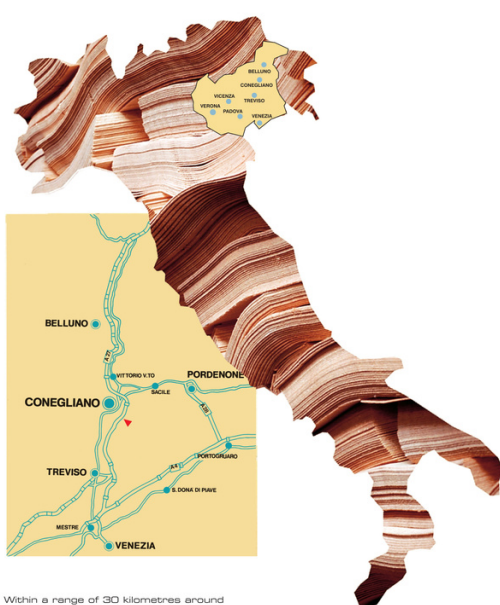

La marcata specializzazione, sviluppata in oltre vent'anni di attività, consente a River Lab di individuare con precisione le necessità del cliente e di fornire un servizio just in time, puntuale anche sotto il profilo tecnico-qualitativo.

The high specialization, thanks to more than 20 years of experience, allows River Lab to exactly understand the customer needs and to offer a just in time service and a careful work, as far as the technical and qualitative aspects are concerned, too.

All'interno di uno stabilimento funzionale, le linee produttive sono strutturate per raggiungere livelli di efficienza e di garanzia tecnica del prodotto.

In a modern equipped plant, the productive lines are designed to reach both the highest efficiency levels and the technical guarantee of the product.

Within a range of 30 kilometres around River Lab, there are more than 600 furniture or furniture components industries.

The stand-out River Lab service is already appreciated by many of them and this is an incentive for us for a constant innovation, facing more and more demanding requests.
