SUBJECT: Equivalence of technical Pyrethrins of the alternative manufacturer La General Chimica GM, produced in the manufacturing plant located in [REDACTED]

To whom it may concern.

La General Chimica GM has submitted the documentation required for the evaluation of the equivalence of technical Pyrethrins in the manufacturing plant located in [REDACTED]
The name and the exact location of the new production site is the following:

Manufacturer: [REDACTED]

Address: [REDACTED]

Italy, as the RMS assessed the submitted information and produced the related report on the assessment of equivalence that has been placed on CIRCABC website in order to make it available to all Member States for comments.

The final result of that assessment, taking also into account the comments received from MSs, is that in the context of the guidance document SANCO/10597/2003-rev.10.1 (13th July 2012), it can be concluded that Pyrethrins manufactured by La General Chimica GM, in the site [REDACTED] can be considered tier I equivalent to the Pyrethrins source considered for Annex I inclusion.
