

PROFESSIONAL CLEANING & DISINFECTION

Our steam protects your future

For over 40 years, steam has been the secret behind Polti products. It lies at the core of our innovation to offer you a sustainable and natural method for cleaning and disinfection.

Choose a powerful, effective element for your home or your workplace — steam, your ally for well-being and protection.

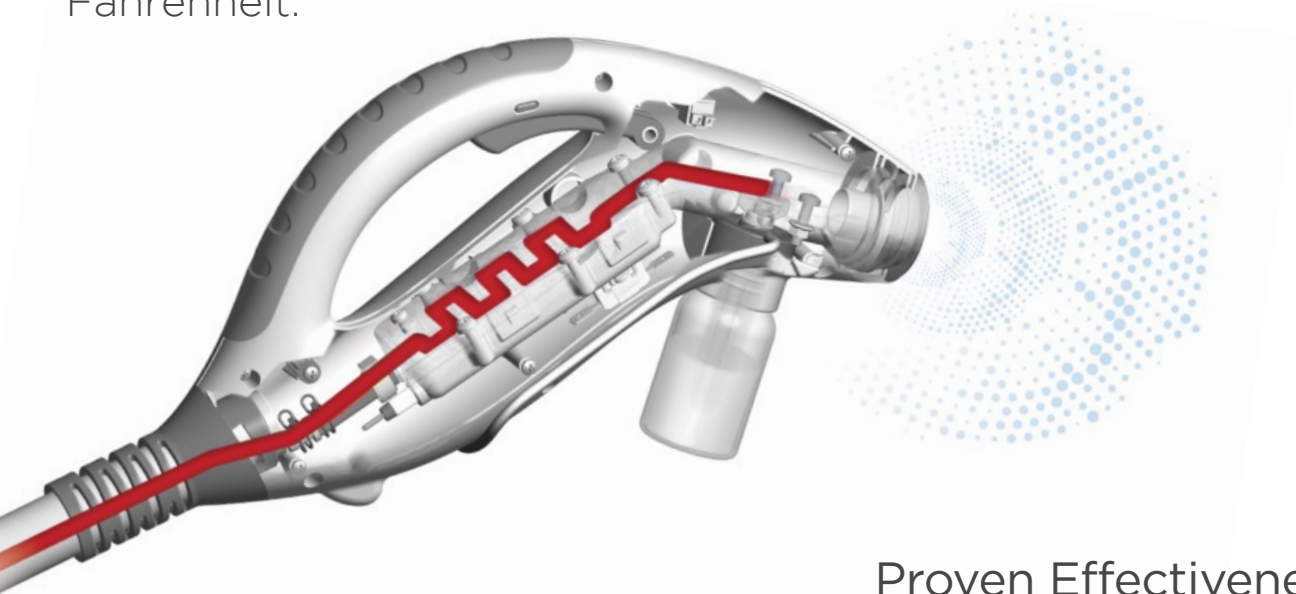

-  **Deep cleans**
-  **Eliminates microorganisms**
-  **Designed and manufactured in Italy**
-  **No chemicals**
-  **Suitable for all surfaces and fabrics**
-  **Patented Super Heated Chamber technology**

POLTI PROFESSIONAL CLEANING

Patented Technology

The worldwide-patented superheated chamber technology inside the dispenser of Polti Steam Disinfection Devices generates superheated dry steam at up to 356 degrees Fahrenheit.

Proven Effectiveness

The tests carried out on our Steam Disinfection Devices have shown that with the power of superheated dry steam Polti products are suitable for use in professional cleaning and disinfection against viruses, bacteria, fungi and more.

POLTI HOME CLEANING

#homelovers

Choose a sustainable method to take care for your home with Polti household appliances: clean and disinfect chemical-free with steam.

Ideal for all surfaces: fabrics and objects of any shape and size

Can be used safely in the presence of people
