CHEMICAL TREATMENT SECTIONS  
FOR GALVANIZING LINES

Horizontal Chemical Coater and IR Chemical dryer

Vertical Chemical Coater

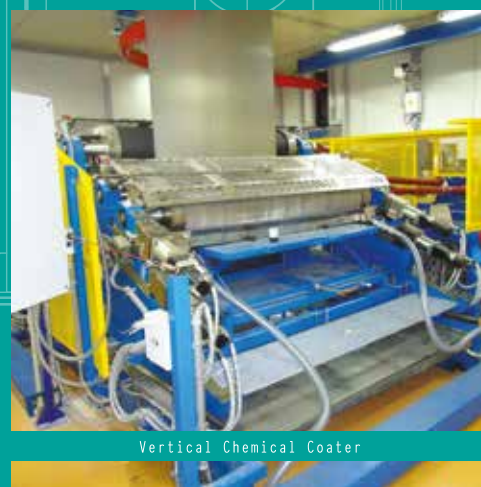

# CHEMICAL COATING SECTIONS IN GALVANIZING LINES

Continuous development of new coating products for specific final uses of galvanized coils make chemical coating sections an ever more important part of any galvanizing line.

Whether you need to apply passivation, anti finger print or corrosion resistant products for any subsequent application (from automotive to organic painting), you will need equipment that fits into the available space (in retrofits), allows a continuous operation (even when you need to change product), guarantees uniform and controlled coating thickness, minimum energy consumption.

Horizontal Chemical Coater

Vertical Chemical Coater

THAT'S WHAT GLOBUS DELIVERS TO ITS CUSTOMERS, CONSISTENTLY, WORLD-WIDE.

## CHEMICAL COATERS

Vertical, Horizontal, Side shifting; manually controlled or fully automatic.

Chilled Rolls Unit

Horizontal Chemical Coater and HOT AIR Chemical dryer

## DRYERS

Hot air, Infra red, NIR

Vertical NIR Chemical Dryer

Vertical Hot Air Chemical Dryer

## PRODUCT FEEDING SYSTEMS

Single product; multi-products.
