

special VOLTA

=euromet

Today Euromet is present in over 60 countries worldwide, it boasts an international reputation in the professional field and enjoys partnerships with the major multinationals operating in the AV sector, thanks to the guaranteed reliability of the products, with the unchanged and authentic "MADE ONLY IN ITALY" and the high-quality service that has characterized our business for years.

Every EUROMET product is manufactured in conformity with regulatory standards CE, regarding IEC 60065 paragraph 19 and IEC 60950-1 paragraph 4.2.1, inherant to the security of suspended loads and anti-tipping monitor supports.

VOLTA is the new original STAND or CART for large-sized LED WALLS.

A stable, modular, linear and unique structure to foster image perfection in Led walls, an effective support solution for new technologies thanks to its unmistakable style and Italian design.

Easy to install, thanks to its modular structure, perfect from all points of view for Rental Service providers, it can be adapted to various environments.

Slide

Slide is a new mounting concept that can meet all the needs of stand alone monitor installations.

Slide is perfect for Digital Signage, Touch Screen or any other conventional use. Its sturdy structure is designed to guarantee total reliability of load and stability in compliance with the regulations in force, above all on anti-overturning. It allows to install one or more monitors in the "Landscape" or "Portrait" position and to adjust the height in a millimetric way thanks to the new system created by EUROMET for side hooking and sliding on two side rails.

The SLIDE solution can accommodate multiple monitors simultaneously and is available in both the floor and ceiling versions.

The support is designed for a very wide range of applications: videoconferencing, company presentations, ports, airports, medical and school environments, offices, hotels, shops, shop windows, public spaces, exhibition stands.

A new Monitor floor stand / floor stand for monitors ideal for digital signage applications, touch screen or any other conventional screen.

Turn is the new professional revolving stand/cart for touch screens available for all the best monitor brands.

Thanks to the new Euromet patent system, Turn has a constant and regular 90° screen rotation, with both horizontal and vertical positioning without a fixing mechanism.

Fully designed and produced in Italy.

Quality and durability are guaranteed as with all Euromet products.

TURN is an ideal monitor floor stand / floor stand for monitors for meeting rooms, conference rooms, classrooms, television studios and offices in general.

This support has been equipped with wheels and made with dimensions designed

specifically to allow easy

transport within any

environment.
