

Prato leather goods

A success story that has its roots in the past

Pelletteria Pratese was founded in 1989 with the focus on the production of high quality genuine leather belts. The brothers Corrado and Emilio Carradori, partners in Pelletteria Pratese, are the third generation of leather goods manufacturers, before them their grandfather Umberto and their father Mario. Today, having accumulated several years of experience in the leather belts sector, we are able to create products of great value and, being a purely artisan company, we do not need large minimum quantities to put the ordered items into production. For these reasons we believe we can be valid collaborators for Stylists who want to launch new lines and who, especially in the early days, do not have the volume of work necessary to turn to large producers, of course we are also able to satisfy requests for large quantities. We have our own rather large collection of men's belts that we can show to our customers as an indication of what we can do, both in terms of workmanship and materials, on the other hand we also develop prototypes on an exclusive design for both men and women. We think that, in today's fashion industry, it is very important to be recognizable for your style, so we try to help our customers achieve this goal.

Do you have a collection of belts to develop?

If you want, you can try our prototype development system which is already being used successfully by various companies and design studios.

You can send us drawings of the belts to be made accompanied by the following information:

Belt height and waist length (from the center hole to the buckle fold).

Belt section: flat or rounded (see explanatory figure).

With side seam or without seam (welded).

Preferred type of leather according to the character to give to the belt (vegetable tanned leather = sporty – nappa calfskin = elegant classic – printed calfskin = fashion – suede – hand woven leather or leather – etc.).

Approximate buckle shape and preferred finish (Silver – Gold – Gun metal – etc.). If desired, we can also develop customized buckles based on a drawing, in which case we will inform you of the costs and lead times.

Possibility of marking your logo on the back of the belt (in addition to the words: Made in Italy – Genuine leather – Size), also in this case we will inform you, in advance, times and costs (which are not high).

Any price target as a reference to be able to choose the most suitable processing for your needs.

Once this information has been acquired, we will take care of communicating our estimate for the sample collection and, once the prototypes have been made, the selling price of each model for production.

For very particular items we will be able to tell you, always in the estimate, if they need specific equipment and related costs.

We hope that this service we offer will be useful to you and will allow us to develop a fruitful working relationship.
