All the **excellence** on a fork

## GENERAL CATALOGUE

# EUROPI

Experience and know-how to produce and distribute food specialities, fruit preserves and meat products.

**EUROPI** srl operates on both the Italian and the international market as an established company in the production and marketing of a wide range of typical products.

Three brands join together at the headquarters in Reggio Emilia:

**TERRA MARIS**<sup>®</sup>, a full range of preserves and typical food specialities: in jar, in tin, in aseptic bag intended for the Horeca, the Large-scale Distribution and the Large-scale Organized Distribution channels;

**THODY**<sup>®</sup>, a selection of the best fresh fruit and the best sweet corn from GMO-free countries of origin, in jar and in tin;

**BRAGLIA**<sup>®</sup>, ageing of the finest meat products of the Italian tradition.

The company's success lies in the three main values EUROPI makes itself bearer of: experience, quality and innovation.

## EXPERIENCE

A strong commercial dynamism and the know-how in logistic and management allowed the company to establish itself, in a few years, in more than 50 countries in the world as producer and distributor of the best Italian food specialities.

## QUALITY

The particular care in the selection of the raw materials, the careful control of the production processes and the efficient management of the logistic, makes EUROPI an excellent partner from a global quality point of view. The company has its own quality control department, supported by an external laboratory, so as

to scrupulously and constantly check that the established quality parameters are complied with.

Besides the quality of the products, EUROPI also constantly invests in its image with targeted marketing and communication projects.

An area of 5000s q.mts allows the storage of the products processed by fresh at campaign; besides, the company can count on a widespread net of distribution and

agents, assuring deliveries within 9 days from the receipt of the order.

The continuous pursuit of high quality standards, during all phases of the business management, is confirmed by the achievement of the ISO 9001, IFS, BRC certifications.

## TRADITION AND INNOVATION

With an overall catalogue of more than 400 items, EUROPI constantly pursues strategies for improving and growing.

From this point of view, the company started some acquisition policies so as to enlarge the range of its historical TERRA MARIS<sup>®</sup>, by supporting it in 2001 with THODY<sup>®</sup> and then with BRAGLIA<sup>®</sup> brand.

Moreover, considerable resources are invested in research and development, with the aim to improve the characteristics of the products already in the range and to include some new quality items which can meet the market trends.

Besides the marketing under its own brand, EUROPI is also accredited as supplier of private labels of some important groups in the Large-scale Organized Distribution, as evidence of its strong specialization and reliability strengthened over time.

## Handmade pasta drawn through bronze dies

Terra Maris® handmade pasta is exclusively produced from durum wheat semolina with and without flavours and by using traditional milling methods (millstones) followed and controlled by us by means of modern technologies. The time elapsing from the milling and the production of the pasta is very short, not longer than 24/36 hours.

Most of the processing and of the production processes are done by hand and the wire-drawing is exclusively done through bronze dies; the drying and the dehydrating process of the pasta is carried out at low temperature (from a minimum 36° to a maximum 53°), from a minimum 24 hours to a maximum 72 hours. These methods respect the natural characteristics of the wheat used thus making our pasta a 100% handmade product.
