COMPANY PROFILE

---

**"FOR US, FOCUS ON QUALITY  
IS A WAY OF LIFE. A CHOICE THAT  
MEANS WE REPRESENT THE HIGHEST  
EXPRESSION OF ITALIAN STOCKING  
DESIGN. PASSION AND SKILL SHOULD  
GO INTO EVERY DETAIL. WE'VE BEEN  
APPLYING THAT ENTHUSIASM TO  
OUR WORK EVERY DAY FOR OVER  
50 YEARS."**

  
SERGIO PEZZINI

# ABOUT US

## WHO WE ARE AND WHAT WE DO

---

Our story began in 1965. Since then we made **high quality natural** fiber stocking, socks and tights for women, men and kids, we've developed our passion for craftsmanship together with targeted investments in the most advanced industrial technology. That's how we've progressed from a single workshop to an international company. Still proudly family-run, we now employ more than 200 people over two locations: historic headquarters in Castel Goffredo near Mantua, in the heart of the Italian hosiery industry, and a plant in Brus, Serbia, in the Balkan's manufacturing area. Each Pezzini-branded or private-label product is the result of our forward-looking vision, designed to deliver excellence.

---

# PHILOSOPHY

## QUALITY AND PASSION

---

We've always worked hard to build solid and long term commercial relationships with stakeholders.

The common value we share is attention to detail and passion for quality. Pezzini products are much more than stockings, socks or tights: they are the unique sensation of a light caress on your skin.

That's how we succeed in satisfying the most demanding customers, taking inspiration every day from creating something beautiful to wear and to show off a product valued by those in search of uncompromising quality.

---

# THE INGREDIENTS OF OUR SUCCESS

## RESEARCH AND DEVELOPMENT, CREATIVITY AND DESIGN

---

A flair for capturing trends, predicting, and reworking with creativity and taste making them our own by focusing on every aesthetic and tailoring detail.

We master a craftsmanship enhanced by cutting-edge machinery and the most advanced production techniques. Our knowledge of traditional materials is combined with our choice and selection of innovative yarns.

We constantly look for technical solutions to improve the experience of wearing our products.

This mix of indispensable expertise is the magic formula behind Pezzini products, and the secret of our success.

---

# HIGH QUALITY

## FROM OUR CHOICE OF SUPPLIERS TO QUALITY CONTROL OF RAW MATERIALS

---

We look for quality in every detail and throughout every single phase of our supply chain.

Natural fibres are our DNA - from organic cotton to the softest angora, and from classic Filo di Scozia to viscose - alongside high-performance elastomers, which ensure stability, elasticity and resistance.

These key characteristics guarantee long-lasting quality and result in products that cannot fail to impress.

---

# RESPONSIBLE PRODUCTION

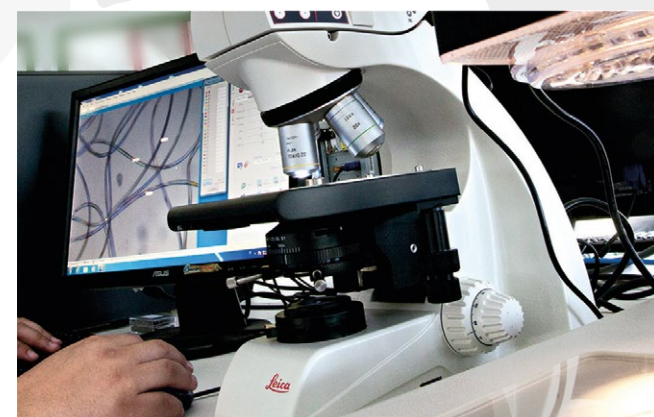

**OUR 100% IN-HOUSE  
PRODUCTION PROCESS MEANS  
TOTAL CONTROL OVER QUALITY**

---

From weaving to ironing, and from stitching to packaging, right up to quality control, we manage each phase of the production process ourselves and pay special attention to the manual finishes, which require high levels of craftsmanship. That makes us a trustworthy and flexible partner – including the timescales we give. And when it comes to private-label products, we apply the same exceptional standards as we do to our own brand products.

# OUR FACTS AND FIGURES

# EXCEPTIONAL STOCKINGS, SOCKS AND TIGHTS

## STAND-OUT DETAILS THAT MAKE THE DIFFERENCE

---

Our socks, stockings and tights possess exceptional features, which stand out from competitors' offerings and differentiate us on the market. Light and soft, fine and opaque, they fit perfectly, even after repeated washing. They don't felt and feel unique when touched. These features are the result of years of research into textile techniques and raw materials, which has led us to choose quality, high-performing materials.

---

# SUSTAINABILITY

## WE CAN DO IT

We let the facts do the talking when it comes to respect for people and the environment. The strict certifications we have worked hard to secure over the years are testament to our desire to make a practical contribution to the health of our planet and its inhabitants.

• **OCS (Organic Content Standard) and GOTS (Global Organic Textile Standard)** guarantee that the textile fibre used in our products is organic.

• The **Oeko-Tex Standard 100**, one of the strictest safety standards, guarantees the complete absence of harmful substances in the final product.

• We are part of the **BSCI (Business Social Compliance Initiative)**, a programme featuring members from some of the world's leading companies committed to human rights, and which certifies ethical working conditions throughout the production chain.
