ADVANTAGES IN USING A LOCATELLI MECCANICA PRESS, A MACHINE WHICH IS DIFFERENT FROM OTHERS

1. Welded iron frame.

Very good ratio costs/benefits with large working space.

2. World wide access to the computer systems of our machinery for analytical diagnostics and subsequent modification / update / tailoring / fine-tuning of our software (option);

3. Three guiding points on the ram plate for a perfect parallelism of the table: main piston + two side pistons;

4. Control of part's thickness, thanks to the control of pressure, timing and position;

5. Multiple pressing in closed mould, for a full control of the material flow inside the mould;

7. Safety for the mould: alarms on double charging, wrong charging (by standard software), no charging (by optional special device);

8. Memory of thousands of programs, with alphanumeric name for an easy recall.
