Engine supply and configuration for Manufacturers and OEMs

We support machine manufacturers and OEMs in engine availability and configuration, creating specific setups and adaptations based on the application project, in compliance with regulations and the technical requirements of the end machinery.

Engine solutions, replacements, and spare parts for B2B professionals

In the B2B industrial engine sector, delays and spare parts availability issues can cost more than the engine itself. Cirifalco Group was founded on one principle: **operational continuity**.

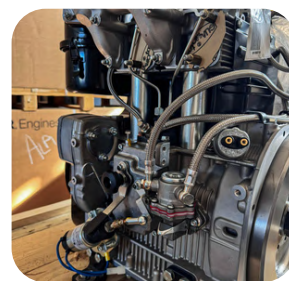

Our origins

In 1980, in a context where mechanical work consisted mainly of workshops, practical expertise, and direct relationships, **Salvatore Cirifalco** founded the company with a precise idea: to offer concrete, reliable, and technically solid solutions to those who work daily with engines and operational machinery.

It was not born as a mere commercial activity, but as a point of reference for farmers, artisans and businesses that needed continuity, not promises.

From the beginning, the company's growth has been guided by a clear principle: the engine is not just a component; it is the **operational heart of a business**.

And when it stops, everything stops.

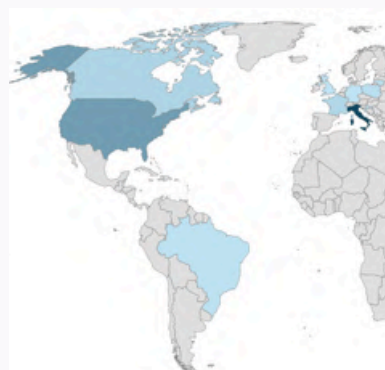

WHO WE ARE TODAY

From a reality born to meet local and concrete needs, Cirifalco Group has grown into a consolidated structure operating on an international scale.

From local to global

64%

Over the years, we have expanded our reach, building a **network of customers and partners** extending far beyond Italian borders, earning the trust of companies in the agricultural, industrial and professional machinery sectors across various **international markets**.

Our role with OEMs and manufacturers

82%

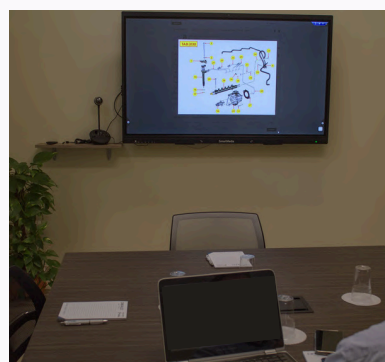

Today we operate as **official distributors** of Rehlko engines and spare parts, ensuring availability and continuity of supply. Above all, we have become a **reference point for manufacturers** and OEMs requiring dedicated configurations, **customized setups** and integrated engine solutions based on the application project.

Digital processes, faster and more transparent service

95%

Simultaneously, we have decisively invested in process **digitalization** and brand **positioning**, developing online tools, digital channels and platforms that make our service more accessible, transparent, and oriented toward the global market.

WHY COMPANIES CHOOSE CIRIFALCO

Immediate warehouse availability

Il nostro magazzino è strutturato per garantire alta disponibilità di motori e ricambi a elevata rotazione, riducendo i tempi di attesa e prevenendo ritardi operativi.

Fast and trackable worldwide shipping

We ship globally with reliable and trackable logistical solutions, ensuring predictable delivery times and full visibility throughout the process.

Clear and direct communication

Direct contact with our team ensures quick responses, transparent information and a simplified decision-making process in both pre-sales and post-sales phases.

Pre-sales technical support

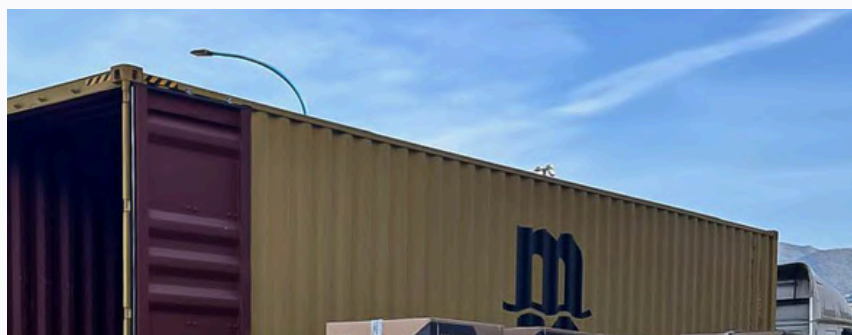

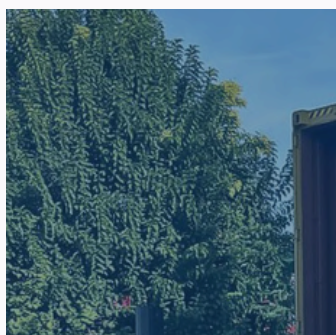

We assist customers in choosing the correct engine or spare part before purchase, reducing errors, incompatibilities and unnecessary delays.

Reduction of operational risk

Structured stock management and efficient order fulfillment reduce backorders, supply interruptions, and operational uncertainty, helping to protect production continuity.

Urgency and breakdown management

We prioritize critical requests to reduce downtime and slow restarts.

A TECHNICAL PARTNER THAT PREVENTS PROBLEMS

In the supply of engines and spare parts, errors are rarely small. Incorrect configurations, incompatible parts, or delayed compliance adjustments can generate **costly interruptions**.

At Cirifalco Group, technical support begins **before the order is confirmed**.

We assist our customers in:

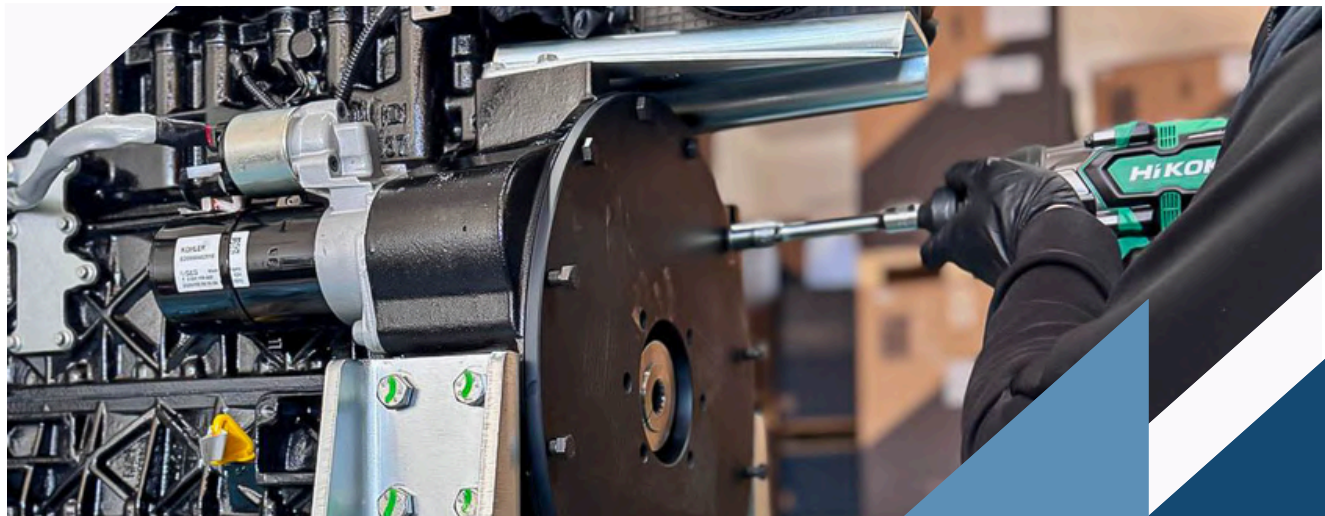

Selecting the correct engine configuration

Verifying compatibility with application requirements

Identifying the right spare parts

This proactive approach helps reduce errors, prevent machine downtime, and protect **operational continuity**.

Reliability is not just about fast delivery: it also starts with making the **correct technical choice**.

WHAT WE DO

Cirifalco Group provides **structured solutions** for engines and spare parts, designed for professional applications and operational continuity.

We do not limit our activity to distribution: we design supply solutions around our customers' **operational needs**.

D

Distribution

Immediate availability of OEM engines and Rehlko original spare parts, with extensive stock and structured warehouse management.

C

Customization

Configuration and setup of engines based on the customer's project, with technical integration oriented toward regulatory compliance, stability and application performance.

L

Logistics

Air, sea, and road shipments with national and international carriers. Rapid fulfillment (48-72h for stock products) and full traceability.

S

Support

Differentiated approach for OEMs and parts dealers: project and configuration technical support for manufacturers; rapid assistance and compatibility verification for workshops and retailers.

DISTRIBUTION

A reference point for professionals

Distribution is one of the Cirifalco Group's **operational pillars**. Our warehouse manages over **400 engines in stock** and **15,000 spare part references**, with particular attention to high-volume components.

Optimized inventory management helps reduce waiting times and **prevent operational disruptions**.

For workshops, companies and retailers

We provide engines and parts with **immediate availability**, assisting in component **identification** and ensuring rapid fulfillment.

For manufacturers and OEMs

We ensure scheduled availability of engines intended for **integration into machines** and production lines, planning supplies according to the customer's production needs.

CUSTOMIZATION

Technical integration and project-based configuration

We support manufacturers and OEMs in the **configuration** and **setup** of engines according to the final application. We collaborate with the customer's technical team to analyze:

- Compliance with **emission regulations** in different markets.
- **Acoustic** impact, **noise** limits, **vibrations** and structural **stability** of the machine.

The goal is to develop a technically coherent engine solution, compliant with international standards and **perfectly integrated** into the customer's production process.

LOGISTICS

Operational speed and international coverage

Our logistics are organized to ensure speed and reliability on a global scale.

Thanks to a robust and constantly updated warehouse, we manage **national and international shipments** by air, sea and road, collaborating with selected couriers to ensure traceability and predictable delivery times.

For products available in stock, we guarantee rapid fulfillment with **shipments within 48-72 hours**, reducing downtime and ensuring operational continuity even in foreign markets.

Over the past year, we have handled over 55,000 spare parts and 2,500 engines.

SUPPORT

Differentiated technical assistance for spare parts, engines and OEMs

Spare Parts: Code verification via engine serial number and alternative proposals for discontinued components

Engines: Support in selection and configuration with emission compliance verification.

OEMs: Technical partnership before, during, and after setup, focusing on integration and regulatory requirements.

We guarantee pre-sales, during the order process and after-sales assistance.

OUR PRODUCT LINES AND SERVICES

Complete solutions for motors

Cirifalco Group organizes its offering into two main product lines and an area of complementary technical services, to ensure performance, integration, and operational continuity in various application areas.

ENGINES

Our range includes

- Diesel engines,
- Gasoline engines,
- Marine engines,
- Alternative engines.

Designed to meet performance requirements and regulatory standards in various international markets.

GENUINE SPARE PARTS

- filters (oil, fuel, air),
- injection system components,
- electrical components,
- gaskets,
- cooling system parts,
- high-rotation lubrication components.

Structured stock availability ensures rapid replacements and reduced downtime

INSTITUTIONAL WEBSITE

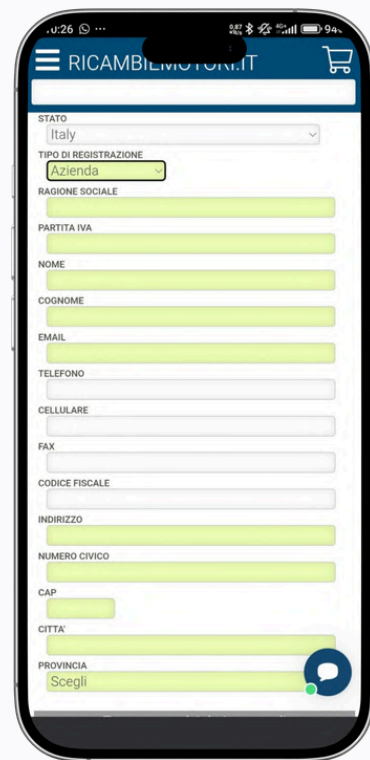

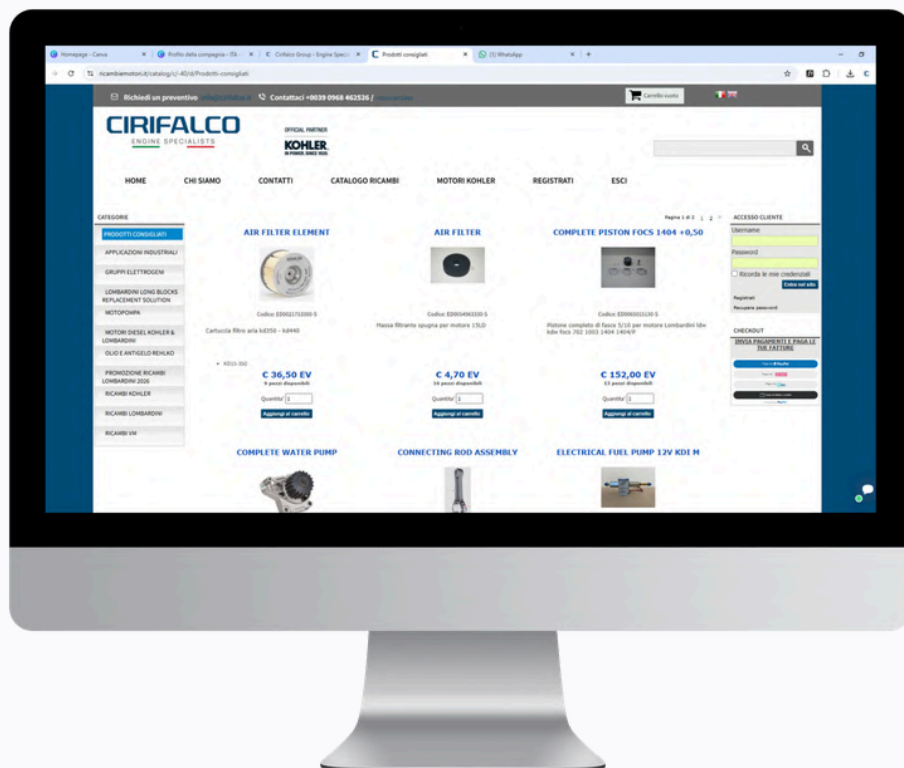

The institutional website is the reference point for learning about our company, our history, and the areas in which we operate.

On the website, you can:

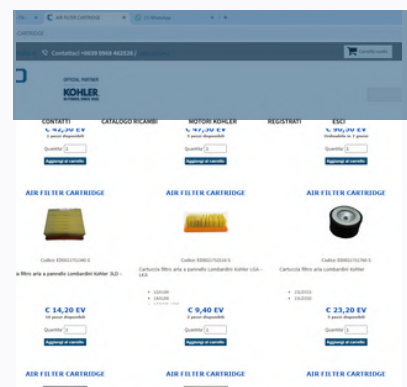

- Learn more about the **history** and **evolution** of the Cirifalco Group
- Consult the **services offered**, from distribution to customization for OEMs
- View the **range of motors available**, divided by category and application

To purchase motors, you can request a **dedicated quote** using the contact form, so that you can receive a personalized proposal based on your technical and application requirements.

The contact page allows you to **communicate directly** with our sales and technical team by phone, email, or online form for specific requests, information, or advice.

www.ricambiemotori.it

SPARE PARTS E-COMMERCE

E-commerce is the **B2B platform** dedicated to the sale of original spare parts, designed to guarantee speed, autonomy, and immediate access to information.

By registering on the portal, you can:

- View **availability updated** in real time
- Consult **spare part prices** with **price lists dedicated** to operators in the sector.
- Search for components by item code or engine serial number

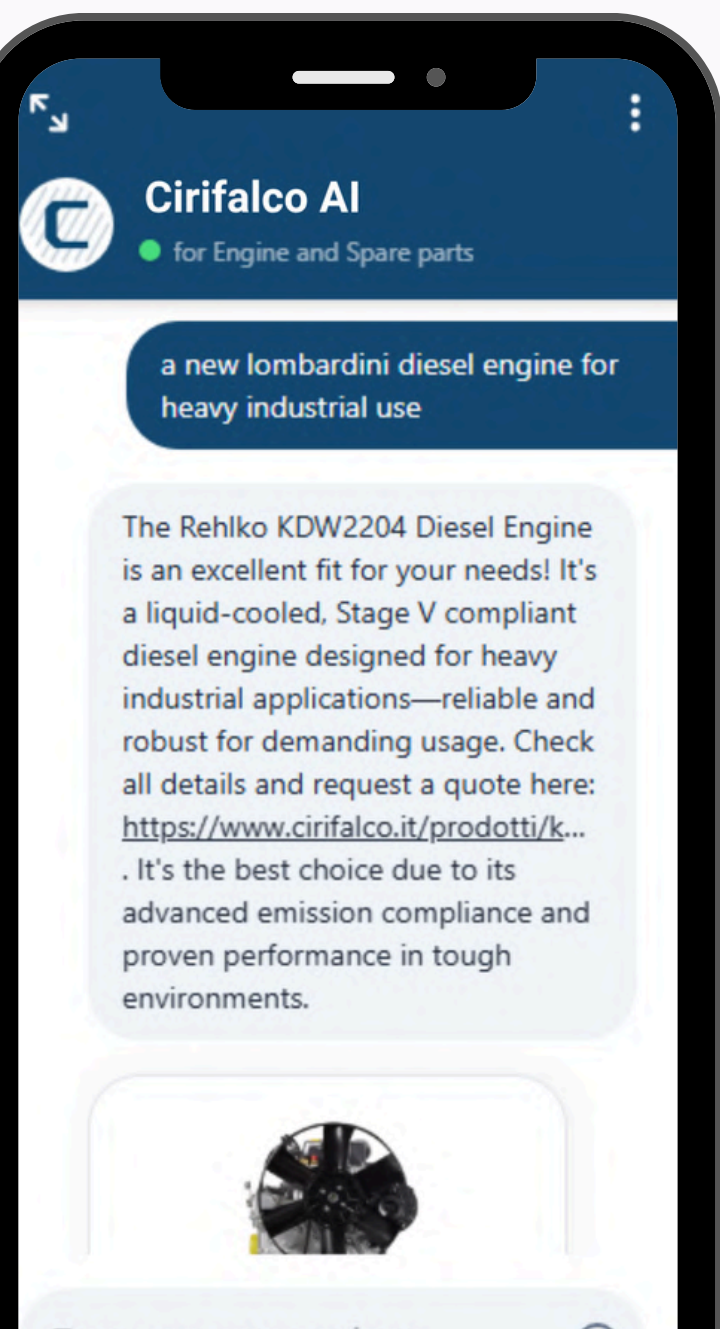

There is a dedicated B2B area for companies, with access to exclusive conditions and **personalized discounts**.

The platform allows for fast and accurate order management thanks to the division of products into categories, while maintaining direct support from our team for technical checks or specific requests.

INTEGRATED ARTIFICIAL INTELLIGENCE

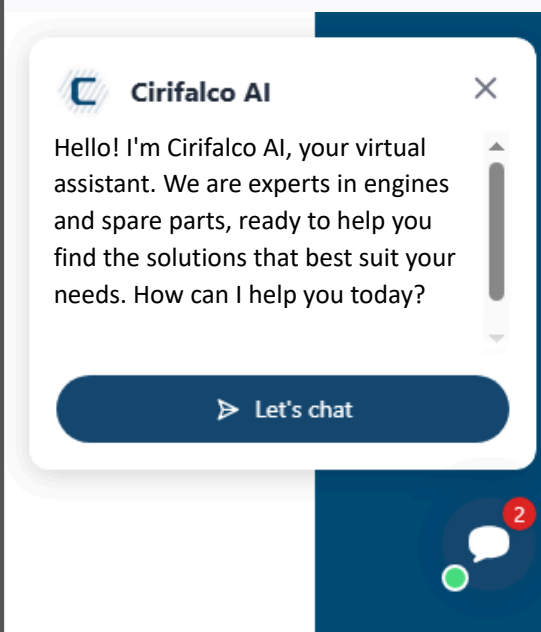

Both of our websites feature an AI-powered assistant designed to **support** customers and professionals in the engine and parts industry.

The AI is trained to:

- Answer **technical questions** and **industry queries**
- **Provide information** about our products and services
- Assist in the **search for engines and spare parts**
- Support the **purchasing process** in a quick and guided manner

This tool allows you to get immediate answers and operational guidance, while still maintaining the possibility of direct interaction with our team.

STRUCTURED FOR OPERATIONAL CONTINUITY

Cirifalco Group combines technical expertise and systematic logistics to ensure reliability at every stage of supply, from configuration to worldwide delivery.

HOW WE WORK

Technical validation -> Clear quote (price, availability, lead time) -> Order management (accuracy checks) -> Worldwide delivery.

SERVICE PROMISES

Rapid response • Clear lead times • Trackable shipping • Immediate availability • Direct contact • Reserved B2B price lists.

CHOSEN BY OEMS, WORKSHOPS AND PROFESSIONAL FLEETS WORLDWIDE.

PROTAGONISTS OF THE FUTURE

with vision, solidity and courage

Our growth path is continuous and long-term oriented.

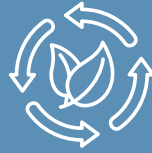

We want to evolve from a structured and consolidated reality to an even more solid international benchmark, strengthening infrastructure, sustainability, and digital innovation to support an increasingly demanding and global market.

Expansion of the logistics facility

We are planning to move to larger, more modern premises with the aim of **increasing warehouse capacity**, optimizing stock management, and further improving the efficiency of **logistics flows**.

The structural expansion will enable us to guarantee greater availability, faster delivery times, and an even more reliable service on an international scale.

Investments in sustainability

We intend to progressively reduce our **environmental impact** through more responsible operational choices, optimization of logistics processes, and adoption of more energy-efficient solutions.

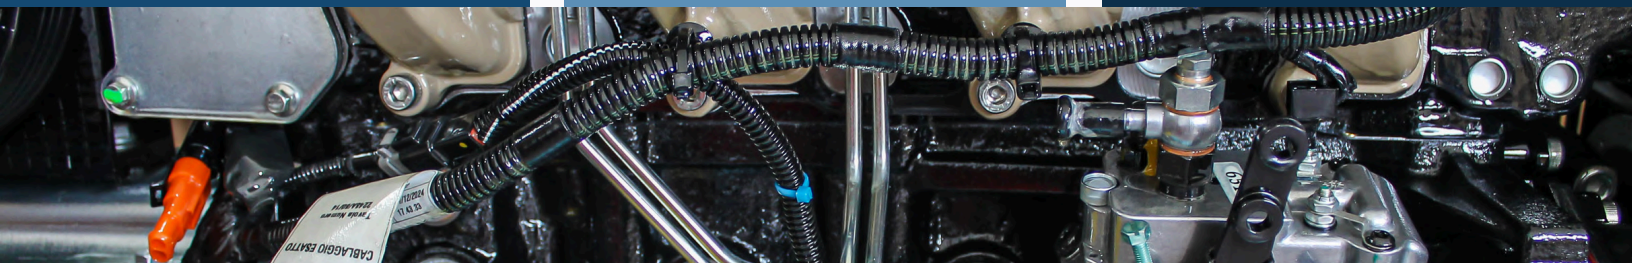

Growth must be sustainable, both economically and environmentally.

Digital innovation and advanced tools

We will continue to invest in digitalization, adopting increasingly **innovative** tools to improve the customer experience, speed up processes, and integrate intelligent solutions to support technical consulting and order management.

The goal is to make the service increasingly accessible, transparent, and oriented toward the global market.
