

CIRIFALCO

ENGINE SPECIALISTS

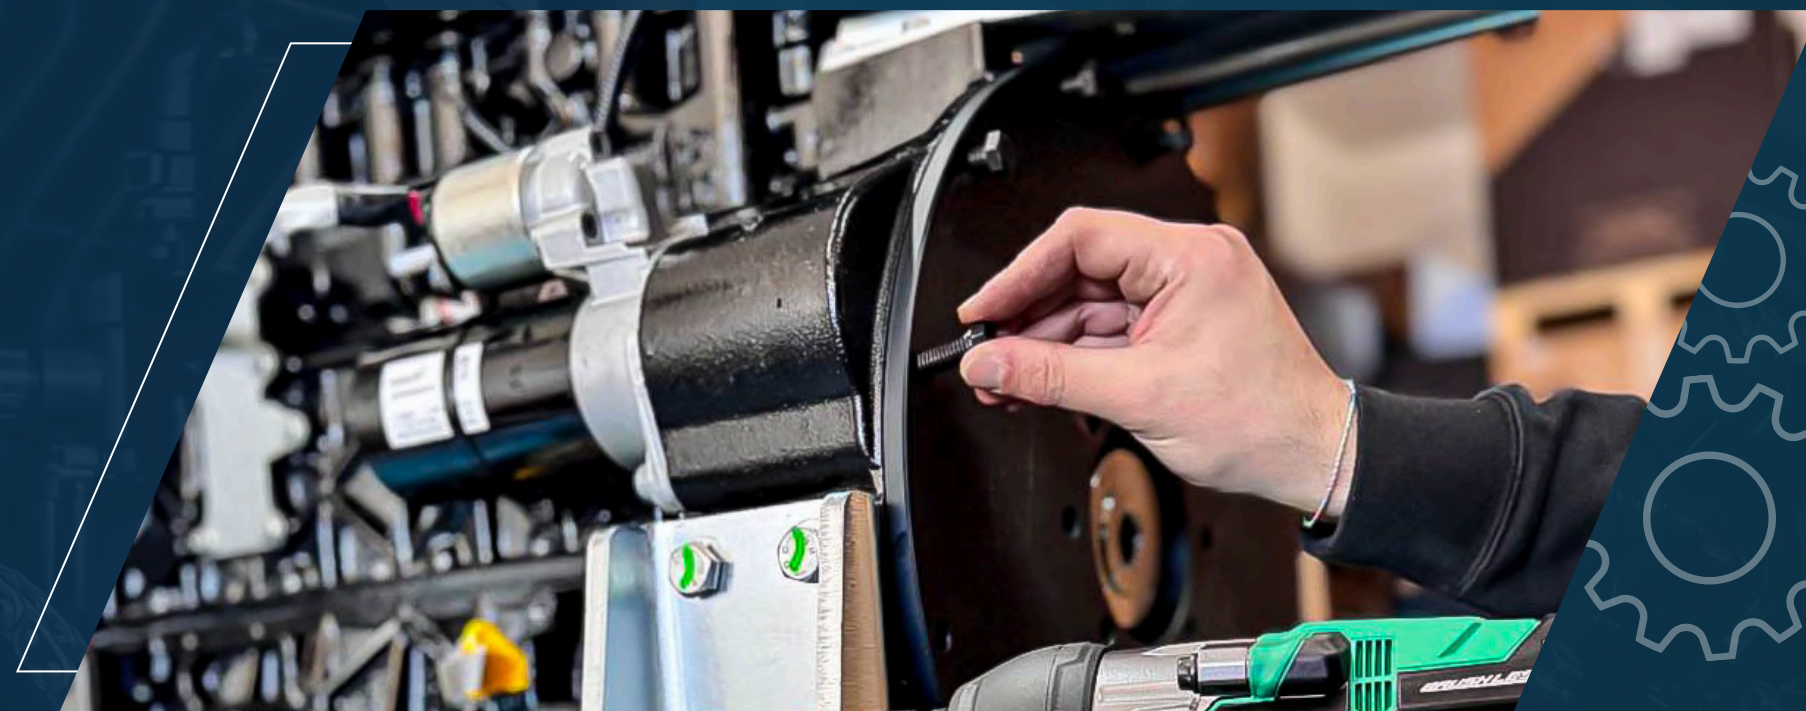

*What we do, where our engines are used and the
international partners we serve.*

ENGINES, APPLICATIONS AND INTERNATIONAL

WHAT WE DO

Cirifalco turns an engine into an application-ready solution: we select, configure and supply Rehlko industrial engines for OEMs and manufacturers, supporting customers at every stage to best meet their needs.

01 INDUSTRIAL ENGINES

We distribute and supply diesel and petrol engines for machinery and professional applications, with ready stock and transparent lead times.

02 APPLICATION SUPPORT

We start from the customer's application to define the most suitable configuration, adapting the components required to integrate the engine into the machine.

03 SPARE PARTS AND AFTERMARKET

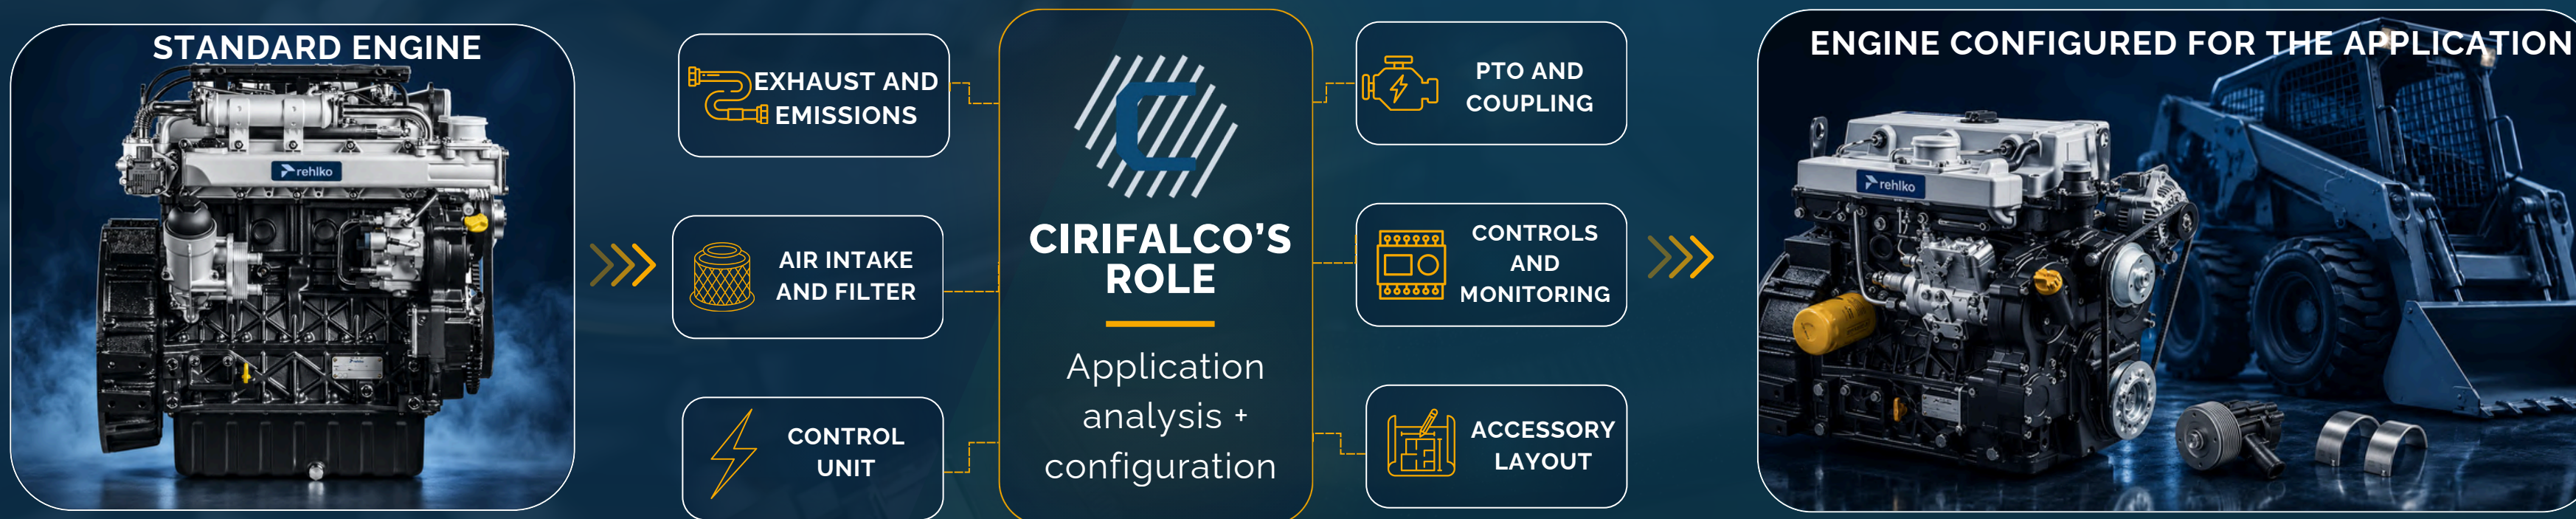

We ensure long-term continuity through genuine spare parts, technical component identification and support throughout the engine's life cycle.

04 INTERNATIONAL DISTRIBUTION

We manage B2B supplies and international projects with a direct, flexible approach focused on the needs of OEMs, distributors and professional partners.

FROM A STANDARD ENGINE TO A MACHINE-READY SOLUTION

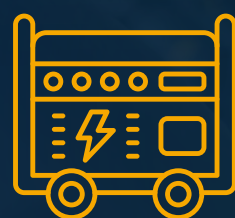

Every application has different requirements. The engine configuration can therefore be adapted to the machine, its layout and operating conditions.

We do not adapt the machine to the engine. We configure the engine to integrate into the machine.

APPLICATION EXAMPLES

GENERATOR SET

Shaft, exhaust system, filtration, wiring and connection configuration.

SELF-PROPELLED MACHINE

Integration with the drive system, hydraulic circuit and machine architecture.

PROCESSING MACHINERY

Power and transmission configuration for demanding operating conditions.

A CROSS-SECTOR MARKET

Our industrial engine range serves an exceptionally wide variety of machinery and industries:

Construction and earthmoving

Mini excavators, dumpers, roller compactors, platforms, skid steers, aerial work platforms and concrete mixers.

Energy and power generation

Generator sets, generators, lighting towers and auxiliary power systems.

Agriculture and professional machinery

Compact tractors, sprayers, self-propelled machines and specialised agricultural equipment.

Industry, pumps and special applications

Motor pumps, compressors, hydraulic power units, industrial machinery and custom OEM applications.

Below are some representative examples of applications and engine options...

CONSTRUCTION AND EARTHMOVING

MINI EXCAVATORS

THE BUSINESSES WE SUPPORT

We serve businesses that design, integrate, distribute or manage professional machinery and engine systems, using industrial engines with customised configurations and genuine spare parts.

Distributors and commercial partners

Companies interested in distributing engines and spare parts in their markets.

OEMs and machinery manufacturers

Companies that design and manufacture professional machinery and equipment requiring an engine.

Workshops and service centres

Businesses specialising in the maintenance and repair of engines and machinery.

Rental companies, fleets and professional operators

Companies managing machinery fleets that need spare parts, engines and technical support.
