

“

*thanks to my parents, who have always
supported and encouraged me in pursuing
my dreams*

”

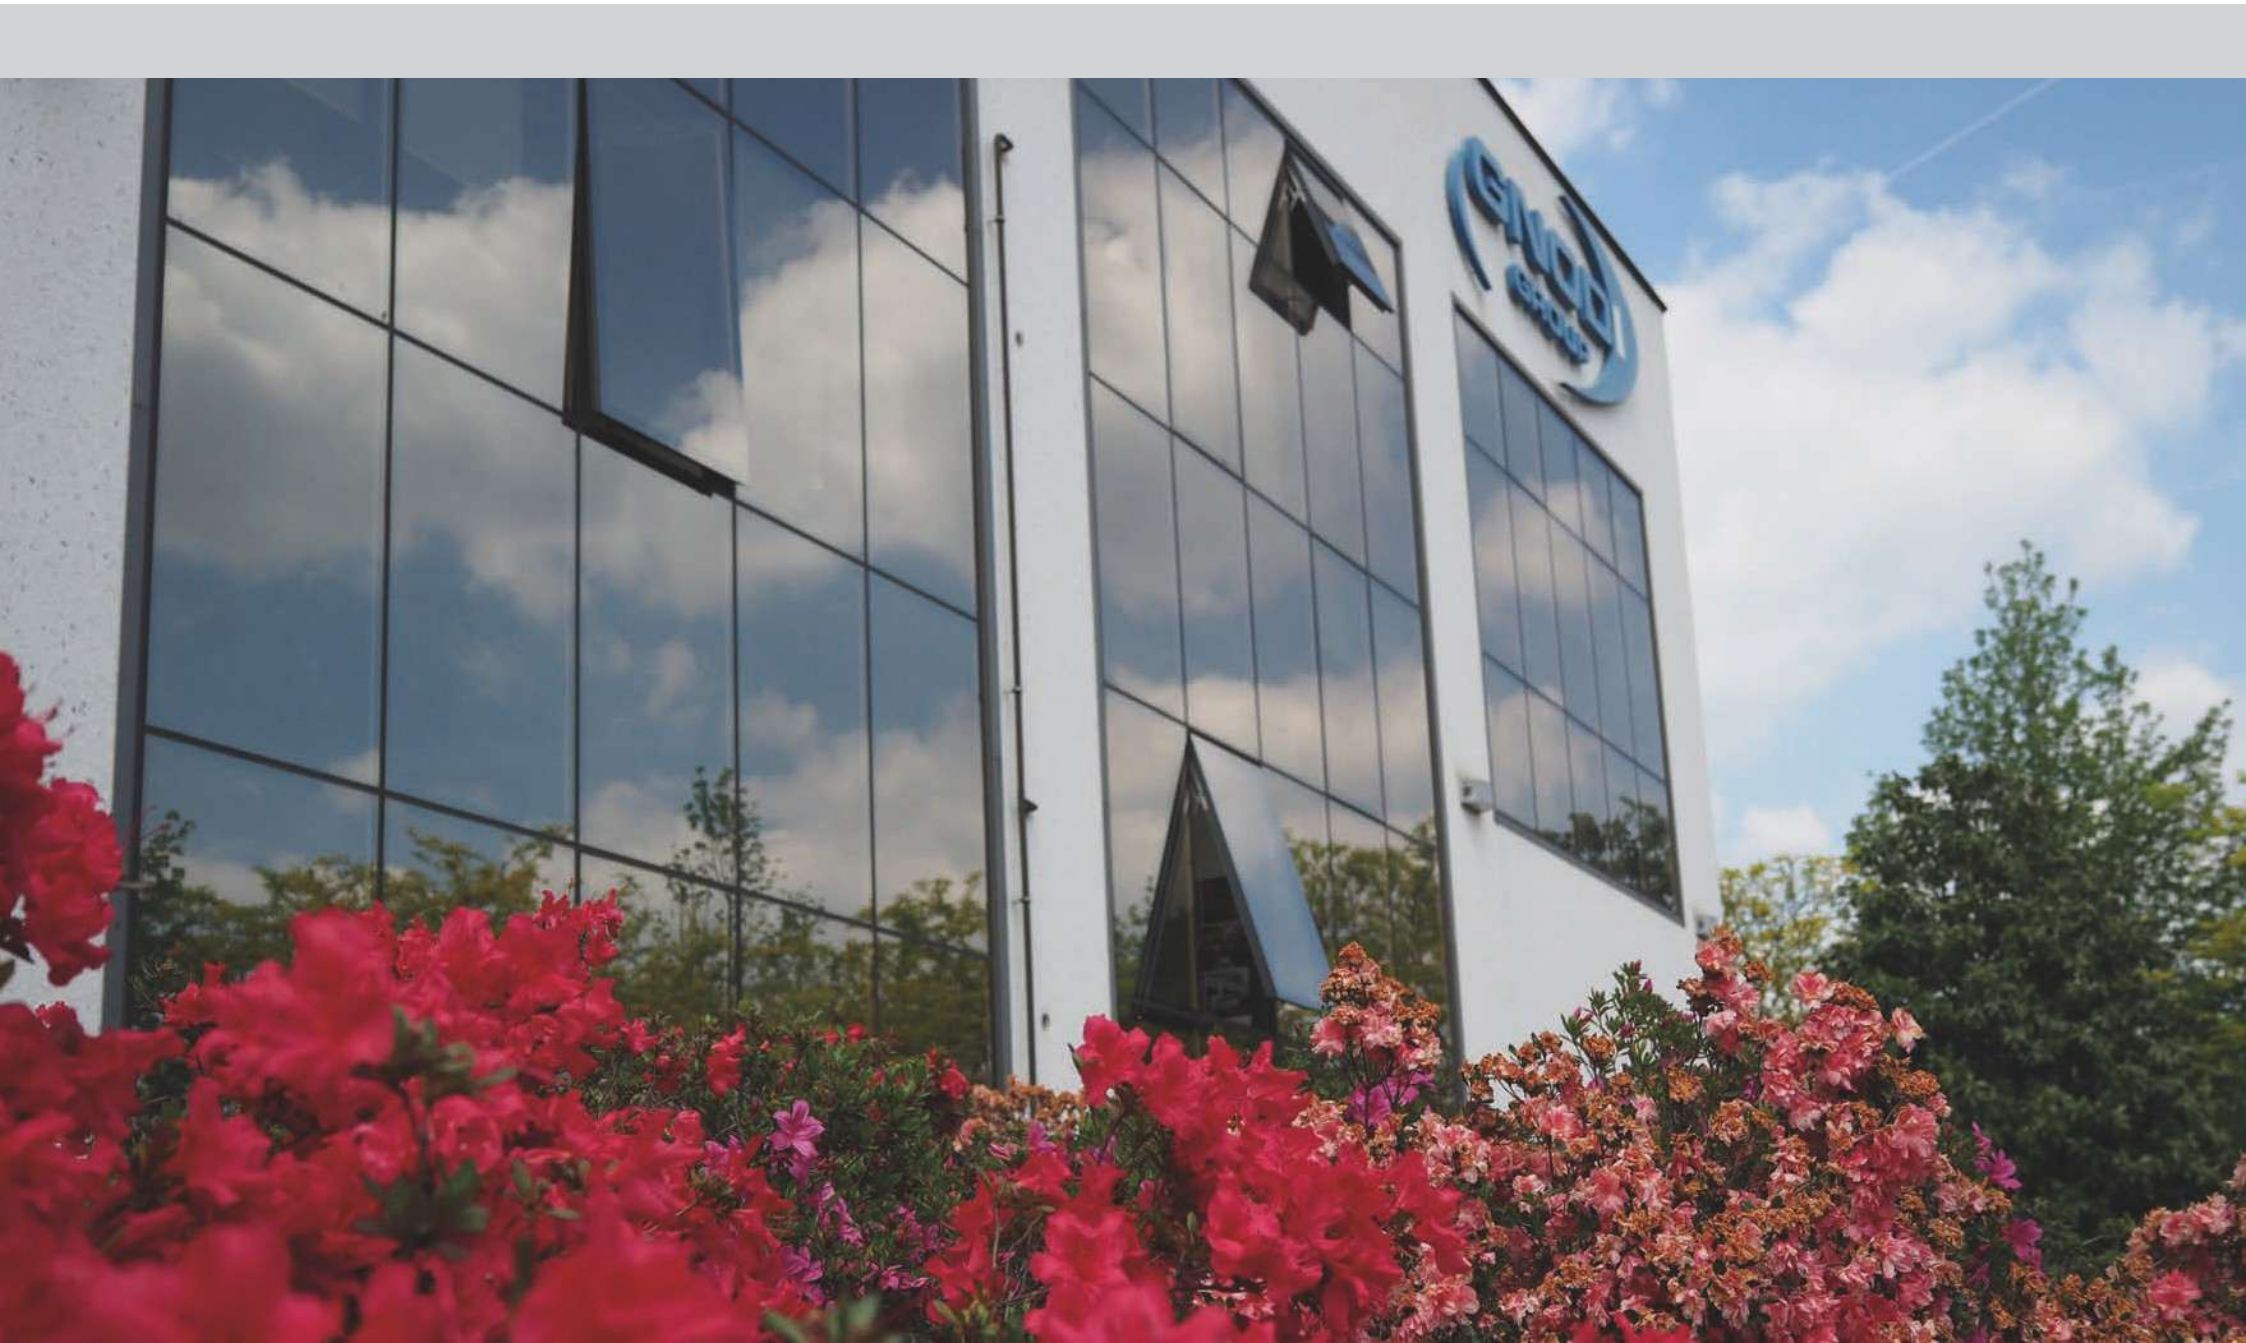

HISTORY

Gnode Group is the realization of a dream, the evolution of a small artisan company founded in 1995, the ambition of an entrepreneur who has been able to realize his goals.

Composed of several companies, it diversifies and customizes solutions and projects according to the customer's needs, addressing the national and international market.

It is based in Somma Lombardo (5 minutes from Milan Malpensa International Airport) with a production site of about 7500 m² with low environmental impact, with over 400 solar panels located on the roof of the building that are able to generate the energy necessary for the entire plant.

VALUES

The group has always aimed to ensure its professionalism, experience, qualifications, and technological capabilities by applying a forward-looking corporate policy that constantly expands its range of customer services.

Hence the evolution of the products over the years. The conviction of renewing itself over time to adapt to a constantly changing market.

“

*the group's strength lies in product
diversification*

”

“

an important partnership with the Ferrari Driver Academy ”

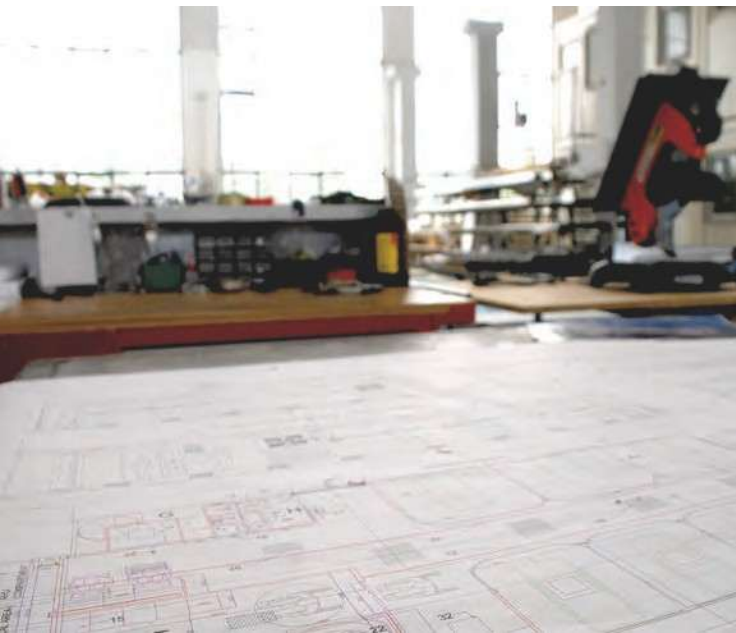

INTERNAL ORGANIZATION

The success of a large company is determined above all by its internal organization.

A united and well-coordinated work team, collaboration between the various offices, fluent communication dynamics and synergies between the professionals who lead the various projects are the strengths that confirm the Gnodi group as the ideal, fast and flexible contact person for anyone who needs complete, reliable and quality support.

“

*not just technology, but expertise too
the importance of training*

”

NATIONAL MARKET ORGANIZATION

Gnodi Group works directly with the main players and leaders of the reference markets on the national scene.

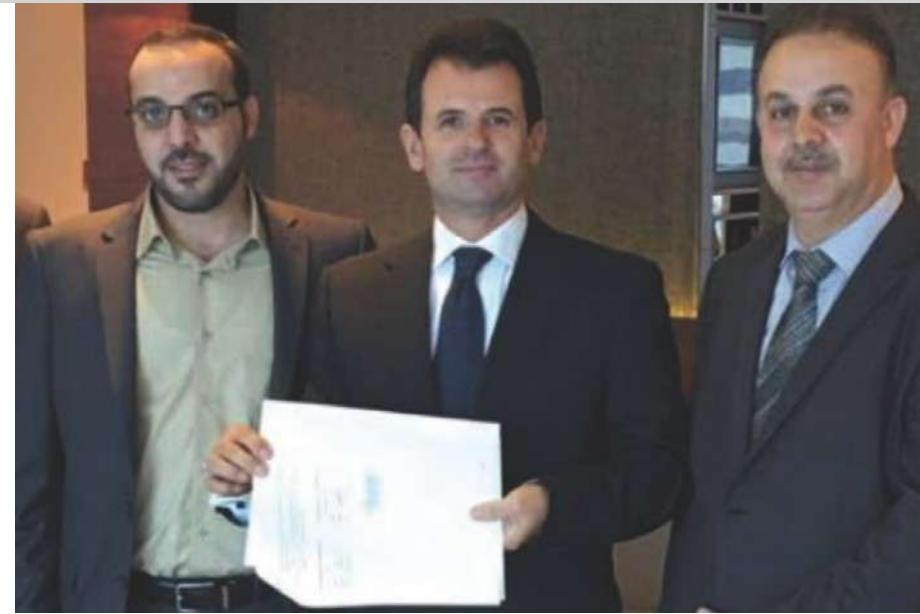

It is equipped with a technical office available for project solutions. A specialized technical team and a fleet of vehicles equipped for every type of intervention, installation and assistance.

It offers its customers a training service by organizing specific courses at the appropriate facilities in the company.

“

*qualified distributors and partners are the secret to
overcoming challenges in international markets* ”

INTERNATIONAL MARKET ORGANIZATION

The Gnode group relates to international markets through a network of qualified distributors and collaborators, carefully selected and trained by the same.

It operates all over the world providing its partners with its know-how for solutions and support of local projects.

”

GNODI SERVICE

Historically known on the Italian territory in the maintenance sector of industrial catering.

Gnodi Service has all the skills and deep-rooted experience in the design, supply, installation and assistance of equipment up to the entire management of structures, plants and technologies for production logistics complexes in any area.

GNODI SERVICE :: CATERING EQUIPMENT

Gnodi Service designs and manufactures systems for collective catering and baking.

The most important brands, the best price and a consultancy and design service of the highest competence are available to the customer for any need.

The experience in the sector, consolidated by years of work in the field, means that the sales force of Gnodi Service is able to offer a customized solution, based on the best choices available, suitable for every specific request.

GNODI SERVICE :: MAINTENANCE

Everywhere, the efficiency of a kitchen is essential. Gnode Service plans and ensures a scheduled and extraordinary maintenance service on call that results in concrete savings and benefits for the customer as a guarantee of checks on the equipment, replacement of worn parts and continuity of operation. The emergency service is aimed at fast and decisive action on equipment and systems within 12/24 hours. Gnode technicians have a mobile workshop equipped for a first action.

Gnode Service, in addition to the large storage areas, has installed a fully automatic warehouse at its headquarters. A vertical robotic warehouse, built in modules, which operates according to the principle of "materials to people". All this gives Gnode Service efficiency and speed in responding to the numerous requests for assistance from customers.

GNODI SERVICE :: THE GAT SERVICE APPLICATION

Gnodi Service has a proprietary system called Gat Service. Thanks to this technology, it computerizes the maintenance service of the customer's kitchens, all in a single application to be installed on a mobile phone or tablet.

NO MORE SURPRISES! The customer will always know how much he spends because with a simple click he will have the history of all the equipment surveyed available on his device.

QUICK AND EASY! To open a call, simply scan the QR Code on the equipment from the app, indicating the problem, and in a very short time a specialized technician will be scheduled to leave the Gnodi Service offices to perform the intervention.

NO MORE PAPER! Bills of lading and intervention report will be sent in digital format.

GNODI SERVICE :: FULL SERVICE SYSTEMS

Over the years, Gnodi Service has grown and has obtained certifications and attestations such as SOA in the OG11, OS3, OS28, OS30 categories and the qualification from Ministerial Decree 37/2008 for the installation, transformation, expansion and maintenance of:

- Technological systems
- Electrical systems
- Water and sanitation systems
- Heating and air conditioning systems
- Kitchens and laundries

Today Gnodi Service is committed to the creation of a "turnkey" package for the customer. The great advantage is that you have a single fixed cost fee for the entire duration of the contract and a single contact person. Guarantee of continuity of the maintenance service and agreed quality standards, intervention times, flexibility and simplification of communication procedures.

MOBILE SYSTEM

Mobile System provides spaces set up and transportable in Italy and abroad.

Mobile structures on wheels, shelters or in modules, completely self-sufficient, versatile, designed and built to meet the precise needs of the customer according to the situation of need, in a variety of scenarios.

MOBILE SYSTEM :: MOBILE BARS AND KITCHENS :: MODULES

Bars and mobile kitchens in modular design can be installed in a very short time, all you need to do is set up a base and connections and are operational immediately.

The units can be assembled together to obtain the appropriate combination for the needs of the applicant.

The set-up can be designed according to the precise needs of the customer and always with the utmost attention also to the staff who will be able to enjoy suitable and high quality work environments.

The modules are installed by a highly specialized technical team both in the assembly of the same and in the preparation of the systems and equipment. All the professional equipment used for the set-up is of the highest quality and is tested and delivered to the customer with the relevant certifications.

MOBILE SYSTEM :: MOBILE KITCHENS :: ITINERANT

Itinerant mobile kitchens on rubber allow you to provide a fast and temporary service. They are vehicles (B, C or C+E license depending on size and weight) not subject to motorway traffic restrictions for heavy vehicles and not considered exceptional transport, which allow you to provide a fast and itinerant service.

Suitable environments as they can be designed expandable, once parked, through automated tail lift systems. The trailers can be moved comfortably and can be immediately functional as they are equipped with a generator and tanks that make them completely autonomous.

A professional kitchen on wheels is the ideal solution to bring a service wherever it is needed. Typical situations of use include tastings, catering in particular locations, sporting events, road shows...

SENOLOGY AT THE

The Senology at the Center project was born from the Gnodi group's desire to bring breast prevention throughout Italy. In fact, although a lot has already been done in the fight against cancer in terms of scientific and technological progress, there is still a very strong need to keep the focus on prevention very strong precisely because breast cancer is among the highest survival cancers that can benefit from adequate therapies, early and timely diagnosis.

EVENTS, RENTAL AND WELFARE FOR COMPANIES

The sensitivity of the Gnodì group, with respect to the issue of breast prevention, has therefore materialized in a corporate objective: to support various associations present on the national territory, companies that want to organize welfare activities, medical centers that need a mobile clinic in order to prevent and raise awareness on the issue of breast cancer.

CSD DIAGNOSTIC STUDIES CENTER

CSD - Centro Studi Diagnostici is the group's medical center specialized in diagnostic imaging.

A trained medical team made up of radiologists and breast specialists works professionally on a daily basis to offer an excellent service.

CSD CENTRO
