

Motorsport Solutions

Our Solutions

In the fast-paced world of motorsports, **the real race begins in the paddock**. Logistical **efficiency**, the team's **image**, and **control over operational spaces** are the true drivers of success. With Gnodì's Mobile System solutions, we provide racing teams with an operational and branding ecosystem designed for excellence. Our facilities offer tailor-made solutions to meet every need: ultra-secure **semi-trailers** for the flawless **transport** of cars and motorcycles, hospitality trailers with exclusive designs to enhance the team's image with sponsors, and **advanced technical units** for mobile workshops and telemetry rooms. We bring cutting-edge technology directly to the track, ensuring setup in record time, total autonomy in any weather conditions, and premium comfort for drivers and staff. **Because to aim for the podium, reliability, organization, and speed of action must travel at the same speed as your race vehicle.**

Car/Motorcycle Transport

Semi-trailers designed to ensure the complete safety of vehicles. Thanks to extendable sides, space is maximized to accommodate mobile offices and technical areas. Quick-assembly exterior awnings complete the setup, transforming the vehicle into a full-fledged paddock pit.

Hospitality

Exclusive mobile lounges with extendable sides to maximize space. We design living areas, professional kitchens, and suites with meticulous attention to detail. High-end finishes and dramatic lighting: the perfect setting to welcome VIPs and enhance the team's image.

Technical Transport

Custom-built technical units to optimize space in the paddock. From transporting spare parts and tires to fully equipped mobile workshops and telemetry rooms for engineers. Customized spaces to ensure maximum operational efficiency on the track.

Why choose our semi-trailers

4 key benefits for you

01

Unparalleled logistical efficiency and operational speed

In the paddock, time is the most precious commodity. Our mobile solutions allow you to **drastically reduce setup and teardown times**.

03

Exclusive styling and premium comfort

Not just semi-trailers, but true **luxury lounge** areas. Our hospitality units combine exclusive **design**—to enhance your image with VIPs and sponsors—with privacy and comfort.

02

Autonomy and flexibility in any condition

Our structures guarantee the team **100% autonomy**—from workshops to relaxation areas—providing **climate control** in any weather conditions to keep concentration at its peak at all times.

04

Extreme reliability and investment security

Transporting racing vehicles and technology means moving millions of euros. Our semi-trailers offer structural reliability to protect your cargo, representing a **strategic investment** for your assets.

Performance on the track allows for no compromises, and the same goes for spaces in the paddock. In our engineering department, we transform the team's needs into fully functional **mobile operations centers**, designing **customized layouts** that optimize logistics flows, the technicians' work, and hospitality events.

Our solutions redefine the standard of hospitality and mobile technical support: technologically advanced environments that combine the utmost engineering precision with design excellence. Because **the team's victory and prestige stem from the efficiency of a perfect environment, designed down to the millimeter.**

Why it's worth it

6 Reasons Why Mobile System Is the Right Choice

01 Performance Boosters

We develop ergonomic layouts designed to eliminate downtime and maximize the efficiency of mechanics and engineers during the race weekend.

02 Maximum space extension

We adopt slide-out systems — extendable side panels — that multiply the usable floor space, making the most of every single millimetre allowed by regulations.

03 Quick and foolproof setup

We provide engineered structures to ensure record-time setup and takedown in the paddock, eliminating unforeseen issues.

04 100% customization

No off-the-shelf solutions: we design and build every structural and technological detail from scratch to the team's exact specifications.

05 Total Autonomy (Plug & Play)

Equipped with generators and integrated air conditioning to make the team immediately operational and independent from circuit's network.

06 Premium design for sponsors

We design and/or refurbish hospitality semitrailers: true luxury lounges to welcome VIPs, enhance the team's image and seal new deals.

Excellence in motorsports demands a **space that matches the level of performance**. We design each of our solutions around the team's unique needs, going beyond the limits of standard setups to create custom-made mobile venues that combine **Italian engineering and design**.

We select **luxury materials and finishes** for refined, ultra-durable hospitality furnishings. We combine the structural strength required for the most demanding schedules with **a superior aesthetics**. We create exclusive, durable, and distinctive spaces, designed with **unmistakable Italian style**.

Multiple configurations for maximum impact

Performance in motion: we bring efficiency to the track

Imagine being able to bring **the efficiency of your headquarters right into the heart of the paddock**. We engineer every single square meter of our semitrailers to meet the needs of drivers, technicians, and management. **Discover the range of services and functional areas we can set up on wheels for your racing team:**

Hospitality

Catering

Car/Motorcycle Transport

Technical transport

Car/Motorcycle Transport

Double-deck trailer for car transport

This semi-trailer for car transport was developed on a straight chassis to maximize operational capacity. We have organized the interior space across two loading levels, ensuring the safe handling of multiple cars simultaneously. Thanks to a high-precision hydraulic tailgate, unloading operations are quick and risk-free.

EXAMPLE OF CONFIGURATION:

- straight chassis
- two loading levels

Car/Motorcycle Transport

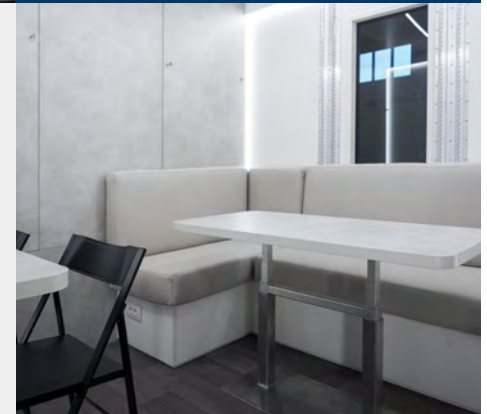

Semi-trailer for transporting race cars with a workshop and office

The ultimate solution for those seeking uncompromising flexibility in a single vehicle. A gooseneck chassis provides superior cargo volume, made fully versatile by a system of movable loading decks. The double-deck parking area instantly transforms into a fully equipped workshop simply by raising the upper level. Rounding out the configuration, the front section features an office and living area with custom furnishings.

EXAMPLE OF INTERIOR CONFIGURATION:

- gooseneck chassis
- two loading decks
- office/living area

Hospitality

One semi-trailer, two loading decks, endless possibilities

A mobile pit box that optimizes space. In addition to the double deck for loading 4 cars and the spacious through-loading compartments, the interior spaces can be transformed in no time: from a technical area to a premium office for meetings, all the way to private changing rooms. Maximum comfort and flexibility on the track.

EXAMPLE OF INTERIOR CONFIGURATION:

- two car-loading decks
- office/hospitality
- driver changing rooms
- through-dyeing

Hospitality

Hospitality Semi-Trailer Restyling

We know that the breaks between championships are short and that racing teams need to update their image quickly. In this project, we transformed and modernized an entire hospitality trailer in just 30 business days. From refurbishing the systems to in-house production of custom-made furniture, seating, and premium finishes, we recreated a completely new environment that perfectly aligns with the team's identity.

EXAMPLE OF A RENOVATION:

- bar counter
- furniture
- sofas and coffee table
- upholstery
- flooring

Technical transportation

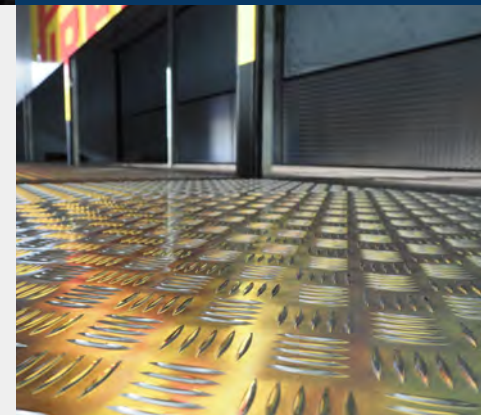

Tire transport

The ultimate solution for transporting spare parts and tire sets. Straight-frame structures on two axles, designed purely for logistics with optimized volumes and smart storage. We build every vehicle entirely in our workshop, starting from the chassis all the way down to the smallest details of the bodywork, paint, and wrapping.

EXAMPLE OF CONFIGURATION:

- straight-frame design on two axes
- storage area

Food service

Mobile kitchen on wheels

Feeding teams and guests requires efficiency. We've packed 18 square meters of professional kitchen space (cooking, prep, washing) into a trailer with high thermal and acoustic insulation. It's 100% self-sufficient thanks to its built-in generator, with stainless steel interiors and optimized refrigeration logistics featuring an external loading ramp with direct access to the cold storage compartment.

EXAMPLE OF CONFIGURATION:

- refrigerated compartment
- loading ramp
- preparation
- cooking
- washing

About Us

The **Gnodi** Group is the realization of a dream—the evolution of a small artisanal company founded in 1995—and the ambition of an entrepreneur who was able to turn his goals into reality. Comprising multiple companies, it diversifies and customizes solutions and projects according to customer needs, serving both the domestic and international markets.

The headquarters are located in **Somma Lombardo** (5 minutes from Milan Malpensa International Airport), with a production facility spanning approximately **7,500 square meters that has a low environmental impact** thanks to over 400 solar panels capable of generating the energy needed for the entire plant.

A **united** and **well-coordinated** team, collaboration among the various departments, smooth communication, and synergies among the professionals leading the various projects are the strengths that confirm the Gnodi Group as **the ideal, fast, and flexible partner for anyone in need of comprehensive, reliable, and high-quality support.**

About Us

The group has always aimed to guarantee its **professionalism, experience, expertise, and technological capabilities** by applying a forward-thinking corporate policy that constantly enhances of services offered to customers.

This has driven **the evolution of our products** over the years. Our commitment is to constantly renew ourselves over time to adapt to a constantly changing market.

A **technical department** is available to help customers identify the most suitable solution, offering **design** and **customization** services. The Gnodi Group's extensive experience in the industry allows it to recommend the best options, even providing support from the initial concept stage if needed.

Group Structure

GNODI SERVICE
