Turnkey

We can supply all the items connected to office renovation: drywalls, lightings, floors, suspended ceilings.

Straight from the factory.

All the items are certified with European stability, safety, chemicals laws, so that their quality is guaranteed.

The company is certified for quality, environmental and workers-safety standards.

Vittoria

Design
D. LO SCALZO MOSCHERI

The elements making up the project are characterized by an only one proportions language, on the linearity and dignity of the materials.

The involvement of steel, glass, laminate and engineered stone define a neutral hue but firm: the laminate tones belongs to the warm grey and natural oak, combined with bronze and metal. Vittoria is a project that reveal multiple configurations, and introduce the concept of

glass showcase: a simple accessory, that became a privacy screen or a storage compartment. Top and sides desk's are in honeycomb core with double laminate panels, with brushed oak texture in the two finishes tobacco and ash grey oak. Desks can be equipped with a 6mm Gres with Sahara Noir and Calacatta Gold finishes. On desks can be added meeting table with metal structure and smoky grey glass.

Executives

“Design is a matter of opinion, not a solution.”

Magenta

Design
D. LO SCALZO MOSCHERI

The structures with varnished frames can be equipped with sides laminate panels in different finishes. The panels for inside structures are in special silky and antiscratch finishes. Tops are in laminate, with important edged

thickness, available in Tobacco and Ash Grey finishes. Modularity of the structural frame and tops, also available in glass, allow to create different matches and innovative configurations. The pedestal drawers are available on castors wheel

or integrated on structural side desk. Cabinets are in laminate with metal glides. Magenta has multiple combinations, either with corner composition or with free standing elements.

Brera

Design
L. GLORINI

The Executive Office compact and essential, selection of finishes in Oak Walnut and Wengè, 38mm thickness of panels for a great stability. Brera collection desks can be realized as simple desk, or with side returns used as a side leg. These elements are supplied with a white metal

filing pedestal and cabinet. Brera bookcases are produced in two different way: like the classic cabinets, with wooden or glass doors, in three different heights (low, medium and high), or as a bookcase without doors, with back, sides and shelves realized in the same desk colors.

Executives

Seventy Seven

Design
PROGETTO CMR

An office furniture system, characterized by the combination and coexistence of the performance needed in the work environment and an aesthetic language able to reside in both working and domestic settings. An object with very high performance that presents, at the same time, an original, young, fresh and domestic image. The final result is an operative desk series characterized by a slim plane

that leans on top of a fleeing structure adorned by connection elements that, starting from the beams, evolve to embrace the table legs. The table top sizing is pushed to unusual depths (77 and 57 centimeters) in order to take advantage of a perfect modularity in situations in which the workstations are at a 90 degree angle between each other.

The accessories completing the system resume and take to the extremes the light aesthetics theme, working with slim metal plate and framed volumes. The aesthetic choices, as well as the material selection and hidden structural elements, give to the system a versatility of language that makes it adapt to be put in architectonic environments that present very different peculiarities.

Workspaces

Fusion

Design
J. BENNETT
S. ADACHI

Office work environment is becoming more and more versatile. It is not only a place to work, but also to meet and chat, to eat and drink, to rest and relax and to do many other activities. The office system Fusion is what makes architecture functional as well as what helps people do various activities they have to do in the office. Fusion is constructed based on a kind of three dimensional frameworks.

Every detail is carefully designed around people's behaviors and activities in office space. There are designated storage spaces for personal and workplace belongings, to articulate and get better management of space. A variety of configurations create different atmospheres and landscapes, which are not only for solo and collaborative working, but also for impromptu meetings and short breaks in a

more relaxed and home-like environment and less institutionalised context. Fusion is an office system that responds also to a new scenario like co-sharing and co-working spaces. Workplace should be like a kind of social network, but with real people. They want to enjoy themselves, express their personalities and individual characters even though when they are working as a team.

“All big changes are simple.”

Doria

Design
L. GLORINI

The modular eclectic collection, with slim and linear shapes, with glass for executives or wood for operatives, pleasant and colourful with the multicolour finishes. Worktops made of wooden panels in 18 mm thickness, ready available in white veined, light oak or dove-grey and other 20

finishes on demand. For a unique desk is possible to ask for the POP collection with a custom glass top with a print based on client image. Connecting desks, long shelves and meeting tables complete the series of horizontal supports. Legs are also available in different shapes for

DELTA and RING collections and all metal parts are available in white, bonderized grey or chromed and further 5 different Ral colours on client choice. The collection is completed with meeting tables, cabinets, libraries, coffee table and standing meeting tables with the height of 100cm.
